

C-ROB

SEPTEMBER 14, 2018

C-ROB REPORT

CALIFORNIA REHABILITATION OVERSIGHT BOARD

Chairperson Roy W. Wesley, Inspector General

Ralph Diaz, Secretary (A), California Department of Corrections and Rehabilitation

Carolyn Zachry, Administrator, Adult Education Office, Career and College Transition Division
(Designee for Tom Torlakson, State Superintendent of Public Instruction, California Department of Education)

Dr. Jeff Mrizek, Dean, Effective Practices, Workforce and Economic Development Division (Designee for Eloy Ortiz Oakley, Chancellor, California Community Colleges)

Mike Daly, Chief Probation Officer, Marin County

Brenda Grealish, Assistant Deputy Director, Mental Health and Substance Use Disorder Services
(Designee for Jennifer Kent, Director, California Department of Health Care Services)

Pam Ahlin, Director, California Department of State Hospitals

Susan Turner, Professor, Department of Criminology, Law and Society, University of California, Irvine
(Appointee of the President of the University of California)

Jennie Singer, Professor, California State University, Sacramento
(Appointee of the Chancellor of the California State University)

Darren Thompson, Sheriff, County of San Benito
(Appointee of the Governor)

William Arroyo, M.D., Regional Medical Director, Los Angeles County Department of Mental Health
(Appointee of the Speaker of the Assembly)

September 2018

SSA/SSI	Social Security Administration/ Supplemental Security Income
STOP	Specialized Treatment for Optimized Programming
SUDT	Substance Use Disorder Treatment
TABE	Test of Adult Basic Education
TCMP	Transitional Case Management Program
VEP	Voluntary Education Program

FOREWORD

Rehabilitation continues to be of paramount importance for the long-term success of California's criminal justice system. The California Rehabilitation Oversight Board (C-ROB or the Board) was created to provide guidance and recommendations to the California Department of Corrections and Rehabilitation (CDCR or the department) in this critical area. The Inspector General sits as chairperson to the Board and provides staff to conduct reviews of all 35 CDCR adult institutions.

Subsequent to the creation of the Board, the department published *The Future of California Corrections: A Blueprint to Save Billions of Dollars, End Federal Court Oversight, and Improve the Prison System* (the *Blueprint*), with goals enumerated in five distinct areas. One of those areas was the improvement of rehabilitative services. The Office of the Inspector General (OIG), as part of its regular monitoring functions, was tasked with assessing and reporting on the department's ability to adhere to its *Blueprint* goals. This resulted in some rehabilitative programs oversight overlapping that of C-ROB.

This C-ROB report combines the ongoing fieldwork performed by the OIG in assessing rehabilitative efforts in the *Blueprint* with the similar task performed by OIG staff during annual site visits to the institutions for the purposes of C-ROB reviews. We hope that by combining the two efforts, even more information can be provided on the progress being achieved in rehabilitation, and that we can give more informed guidance to the department.

EXECUTIVE SUMMARY

This is the California Rehabilitation Oversight Board's (C-ROB's or the Board's) 19th report. It examines progress the California Department of Corrections and Rehabilitation (CDCR or the department) made in providing and implementing rehabilitative programming from July 1, 2017, to June 30, 2018.

From December 2017 through February 2018, then again from June through August 2018, C-ROB staff, in collaboration with the Office of the Inspector General's (OIG's) *Blueprint* monitoring team, visited all 35 adult institutions. This report examines data obtained during the site visits as well as information provided by the department. During this cycle of *Blueprint* and C-ROB site visits, the OIG interviewed several levels of CDCR staff at the 35 adult institutions and found many successes and remaining challenges.

The department continues to ensure offenders and parolees receive risk and needs assessments, with 98 percent of the offender population and 98 percent of the parole population receiving a California Static Risk Assessment (CSRA). Significant progress took place with administering the Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) assessment to determine parolee needs. Currently, 95 percent of the total parole population (41,302 of 43,688) received a reentry COMPAS assessment, which is an increase of 25 percent from Fiscal Year 2016–17. Also, there was a slight, 2 percent improvement to 93 percent of the general population inmates who received a COMPAS assessment. There were three categories of reentry COMPAS assessments still reporting a moderate to high need for just over 50 percent of the parole population. The Board would like to see the department address this high percentage of parolees released with a moderate to high need in several key areas.

The number of inmates initially enrolled in substance use disorder treatment and actually completing the program has remained just below 50 percent for the past two fiscal years (49.5 percent in Fiscal Year 2017–18). Also, the aftercare substance use disorder treatment completion rate for parolees has remained constant at only 29 percent for the past two fiscal years. Both of these figures act as red flags regarding effective reentry efforts and recidivism reduction strategies. Program exits occur due to transfers, refusal to attend the program, behavioral issues, or other issues preventing an inmate from attending and completing the treatment program. The Board underscores the importance of an effective substance use disorder treatment program both in prison and in community aftercare, and is hopeful the department will take measures to increase the number of completions in both areas.

The department extended its data-sharing agreement with the Department of Health Care Services (DHCS) through June 20, 2019, to allow both departments to continue to exchange the Medi-Cal application status for inmates served through the transitional case management program (TCMP). The Board commends the department for screening nearly 100 percent of inmates for health benefit eligibility.

Rehabilitative programs have greatly expanded as a result of Proposition 57 and innovative programming grants. As of August 27, 2018, there are 2,507 inmate activity groups eligible for rehabilitative achievement credits (RACs) statewide. Expansion in programs has posed some challenges, as summarized in the site visits summary. Reentry programming at each institution, combined with the rehabilitative case plan provided to both parole or post-release community supervision (PRCS), furthers transition efforts and represents progress for successful reentry.

Current Recommendations

1. The Board recommends the department's Division of Rehabilitative Programs continue to work with the Division of Adult Institutions to strengthen and maximize inmate rehabilitative programming and credit earning potential. This would involve prioritizing enrollment of its highest-risk and highest-need inmates in evidence-based rehabilitation programs. Secondly, it would ensure that an inmate is able to take full advantage of available credits for rehabilitative and educational achievements to advance his or her release date or initial parole hearing date. The department should determine if its Strategic Offender Management System (SOMS) needs process improvements to improve tracking in key areas, such as assigning inmates to available milestone and rehabilitative achievement credit programs (check for inmate scheduling conflicts) and tracking of inmate program waitlists that are currently prepared at the local institutional level.
2. The Board recommends the department, with the assistance of C-ROB members, determine ways to allow for an exchange of information between federal, state, and county programs to ensure released offenders have access to (and may be approved for) available benefits. This exchange may include a pilot or memorandum of understanding involving partnerships between the Social Security Administration (SSA)/Supplemental Security Income (SSI), the US Department of Veterans Affairs (VA), county social services offices, county probation departments, and the Division of Adult Parole Operations. The goal is to identify strategies to better link those formerly incarcerated to the various services available to help them become stable and self-sufficient as they reintegrate into the community.

BACKGROUND

The California Rehabilitation Oversight Board (C-ROB or the Board) was established by Assembly Bill 900, the Public Safety and Offender Rehabilitation Services Act of 2007 (the Act) and held its first meeting on June 19, 2007.¹ The Act was intended to address the serious problem of overcrowding in California's prisons and to improve rehabilitative outcomes among California's offenders and parolees.

C-ROB is a multidisciplinary public board with members from various state and local entities. Pursuant to Penal Code section 6141, C-ROB is mandated to examine and report on rehabilitative programming provided to offenders and parolees by the California Department of Corrections and Rehabilitation (CDCR or the department) and the implementation of an effective treatment model throughout the department, including rehabilitation programming associated with the construction of new inmate beds. According to statute, C-ROB must submit an annual report on September 15 to the Governor and the Legislature. This report must minimally include findings on the following:

- Effectiveness of treatment efforts
- Rehabilitation needs of offenders
- Gaps in rehabilitation services
- Levels of offender participation and success

The Board is also required to make recommendations to the Governor and Legislature with respect to modifications, additions, and eliminations of rehabilitation and treatment programs by the department and, in doing its work, use the findings and recommendations published by the Expert Panel on Adult Offender and Recidivism Reduction Programs.

The Expert Panel identified eight evidence-based principles and practices, collectively called the California Logic Model. This model shows what effective rehabilitation programming would look like if California implemented the Expert Panel's recommendations.

The eight basic components of the California Logic Model are as follows:

- **Assess high risk.** Target offenders who pose the highest risk to reoffend.
- **Assess needs.** Identify offenders' criminogenic needs and dynamic risk factors.
- **Develop behavior management plans.** Utilize assessment results to develop an individualized case plan.
- **Deliver programs.** Deliver cognitive behavioral programs offering varying levels of duration and intensity.

¹ Assembly Bill 900 (Solorio), Chapter 7, Statutes 2007.

- **Measure progress.** Periodically evaluate progress, update treatment plans, measure treatment gains, and determine appropriateness for program completion.
- **Prepare for reentry.** Develop a formal reentry plan prior to program completion to ensure a continuum of care.
- **Reintegrate.** Provide aftercare through collaboration with community providers.
- **Follow up.** Track offenders and collect outcome data.

National research has produced evidence that every \$1 invested in rehabilitative programming for offenders reduces incarceration costs by \$4 to \$5 during the first three years post-release. The Expert Panel produced the evidence that supported the cost-effectiveness of rehabilitative programming, and the C-ROB report details the framework and implementation status of the California Logic Model.

The two overarching recommendations of the Expert Panel Report are to reduce overcrowding in CDCR's institutions and parole offices and to expand CDCR's system of positive reinforcements for offenders who successfully complete their rehabilitation program requirements, comply with institutional rules in prison, and fulfill their parole obligations in the community.

The Future of California Corrections: A *Blueprint*

In July 2012, the oversight role of the OIG was expanded when the Legislature tasked the OIG with monitoring the CDCR's adherence to *The Future of California Corrections: A Blueprint to Save Billions of Dollars, End Federal Court Oversight, and Improve the Prison System* (the *Blueprint*).

To monitor implementation of the *Blueprint*, the Legislature passed and the Governor signed legislation adding language to Penal Code, section 6126, mandating that the OIG periodically review delivery of the reforms identified in the *Blueprint*, including, but not limited to, the following specific goals and reforms described in the *Blueprint*:

- Increasing the percentage of offenders served in rehabilitative programs to 70 percent of the department's target population prior to the offenders' release;
- The establishment of and adherence to the standardized staffing model at each institution;
- The establishment of and adherence to the new inmate classification score system;
- The establishment of and adherence to the new prison gang management system, including changes to the department's current policies for identifying prison-based gang members, and their associates, and the use and conditions associated with the department's security housing units; and
- The implementation of and adherence to the comprehensive housing plan described in the *Blueprint*.

One of the major goals of the *Blueprint* was in the area of rehabilitation. The OIG and the stakeholders realized there was a duplication of efforts and resources in monitoring this goal.

Therefore, to more efficiently use the resources of both the OIG and CDCR, the C-ROB requirement for assessment and reporting was decreased from two reports to one report annually. The C-ROB's September 15 annual report is supplemented with the OIG's *Blueprint* monitoring fieldwork and assessments, and the OIG's *Blueprint* report fulfills the rehabilitation monitoring role each spring.

The department was tasked with providing an updated comprehensive plan for the state prison system since the *Blueprint*, thus the department released a new report as part of the 2016–17 Governor's Budget. In January 2016, the department issued *An Update to the Future of California Corrections*. The department's updated report includes a summary of goals identified and progress made from the initial report along with its future vision in rehabilitative programming and safety and security.

Preparing This Report and Disclaimer

The scope of this report is based on information received at the C-ROB meeting in April 2018 and subsequent information received by the report-writing subcommittee from the department. The department's data reflects information captured on offenders from July 2017 through June 2018.

These data have not been audited by the Board. The Board does not make any representation to the accuracy and materiality of the data received from the department. This report is not an audit, and there is no representation that it was subject to government auditing standards. The OIG contributed data from site visits that took place from December 2017 through February 2018 and from June 2018 through August 2018.

2017–2018 SITE VISITS

From December 2017 through February 2018, and again from June 2018 through August 2018, C-ROB staff, in collaboration with the Office of Inspector General's (OIG's) *Blueprint* monitoring team, conducted site visits at all California Department of Corrections and Rehabilitation (CDCR) adult institutions.

Institution site visits consisted of the C-ROB and *Blueprint* monitoring team meeting with executive staff, academic and vocational instructors, community resource managers, television specialists, correctional counselors, and inmates. The team also observed educational, vocational, and activity group programs, including innovative and inmate-led programs. During the visits, the team employed an assessment questionnaire with 59 items addressing custody, education and classification meetings, caseload, curriculum, procurement, data solutions, information technology (IT) support, space utilization, and any identified issues or barriers to rehabilitative programming or treatment efforts.

Rehabilitative Opportunities/Programming

During the site visits the OIG met with academic staff, including vocational instructors, correctional counselors, community resource managers, television specialists, and inmates enrolled in academic and vocational programs. General questions regarding academic and rehabilitative programming were asked, including what challenges they were facing and what improvements were needed to run more successful rehabilitation programs at that institution.

Academic staff (instructors of adult basic education/voluntary education programs, principals or vice principals)

The majority of academic staff stated that a low percentage (commonly less than 5 percent) of inmates do not want to participate in education and, at times, may create a disruption in the classroom. Instructors stated that warning or counseling students on expectations typically corrects the issue, but if the behavior worsens and negatively affects the class, a rules violation report or removal from the class is possible. Some teachers stated inmate disruptions often stem from students not being placed in the correct program for various reasons. One common reason is inmates are placed into programs based on their test of adult basic education (TABE) score, which comprises an average reading and writing score. Math is not factored into the placement score even though it is part of the TABE. This can cause frustration to an inmate wanting to succeed in education but believing he or she is not placed accordingly. Teachers indicated fewer concerns with un-assigning disruptive inmates in comparison to that reported in the C-ROB report issued last year.

Also, inmates who have graduated from high school need to provide their transcripts as proof, and most are initially placed in an academic class until adequate documentation is received. Obtaining inmates' records from before incarceration presents challenges, as some counties

require a payment before providing it or they may take some time to send the department documentation.

The OIG received mixed responses from academic staff when asked if students have sufficient computer access for the computer-based High School Equivalency (HSE) preparation materials and exam. A key part of this preparation includes the availability of specialized HSE preparation software (Aztec) that helps students identify areas of weakness to customize an academic program targeting specific learning objectives. While many instructors believed the inmates do receive enough computer time, several indicated that inmates do not receive enough practice for a variety of reasons. Most commonly, instructors requested more computers or more access to available computers, while others acknowledged that space for additional computers was limited and posed a challenge. At one institution, an instructor stated they were currently installing computer labs on all yards, and would continue to use traditional instruction until installation was completed. Additionally, several instructors indicated that Aztec software was out of date or not working on many computers. At a few institutions, computers and software were lacking, as one ABE III instructor had 3 computers for 21 students and another ABE III instructor had only 4 of 27 computers with the HSE preparation software.

Vocational staff (includes instructors teaching career technical education programs)

The OIG received several suggestions from Career Technical Education instructors on improvements to run a more successful program. Instructors suggested soliciting input from industry employers in the respective fields to keep the programs current. This would also assist students in becoming proficient in trades to increase employability upon release. Several instructors proposed enforcing minimum education standards for students before beginning a vocational program, operating smaller class sizes, and utilizing a quarter system, rather than an open entry/exit system, to make it possible for students to perform the same level of work and move on to the next level of work together. Also, expediting the procurement process and allowing more local control over supply orders would assist instructors in having the necessary equipment and materials to run an effective program.

Approximately two-thirds of Career Technical Education instructors found the testing process efficient. Instructors who taught programs with online-only certifications praised the ease of scoring the test and printing the certificates, but noted connectivity issues have resulted in delayed testing. Many instructors have been discouraged with the length of time it takes to process National Center for Construction Education and Research (NCCER) certifications, as it can be months or even years between when an inmate takes the test and when he or she receives the certification. Though not currently available at all institutions, a new online submission process appears to reduce this turnaround time significantly, to a matter of weeks. Instructors stated there is still a lot of data entry involved with the testing process, as much of it is duplicative between the Strategic Offender Management System (SOMS) and NCCER, and

suggested additional clerical staff could assist with this task, leaving more time for the instructors to focus on teaching.

Most Career Technical Education instructors stated they had adequate IT support. A few instructors suggested that more training by IT staff on required programs and electronic processes would assist in presenting information to students. Also, a few instructors recommended having a dedicated IT staff member in the education department would allow a faster response time to resolve issues.

Correctional Counselor III (case managers)

Correctional counselors were asked about the process of assigning inmates to the reentry program and class sizes. Once the initial unit (or program review) classification committee places an eligible inmate on a master waiting list, the counselor will review the list for priority placements and send a request to the inmate assignments office for placement into a program. The counselor will screen and prioritize placement based on an inmate's release date, results of the California Static Risk Assessment (CSRA) and Correctional Offender Management Profiling for Alternative Sanctions (COMPAS), and endorsement. Inmates who have less than 5 years before release are considered first, with inmates having 6 months to 2 years remaining on their sentence receiving priority by release date. One recommended improvement to the assignment process is to have the parole date be accessible on the SOMS waiting list search. Currently SOMS includes various dates, but the parole date is necessary to make a decision. One counselor stated he has to print a waitlist for 150 inmates to verify assignment information, as SOMS does not allow inmates to be filtered by each yard. Also, several counselors recommended providing correctional case managers with more control over the assignment process and either remove the inmate assignments office from the process or allow for greater discretion over the process. The belief is the case managers would be better able to efficiently place inmates into programs, especially when waitlists are too long, while a different program is available.

Correctional counselors were also asked to describe how inmate transfers are facilitated and how it impacts their completion of the transitions program. Upon an inmate's arrival, counselors conduct a SOMS review and complete a data visibility tool to prevent the inmate from being assigned to the same program within the same term. Inmates enrolled in a reentry program as of the date of a (non-adverse) transfer can continue with the reentry course if they are enrolled within 60 days of arrival at the new institution. However, some counselors are not aware of new arrivals unless the inmates complete request forms to be enrolled in their current reentry courses. Several counselors noted challenges with trying to manage inmates and class scheduling, especially with transferring inmates, as they do not have the needed clerical support.

Community Resource Managers

Community Resource Managers (CRMs) reported that the Strategic Offender Management System (SOMS) provides several challenges regarding successful implementation of inmate activity groups for rehabilitative achievement credit (RAC) eligible programs. Inmates attend a classification committee and are placed on a waitlist in SOMS by a program category type (for example, Anger Management Program), as there are no waitlists within SOMS for an individual program (Alternatives to Violence, Beyond Violence, Cage Your Rage, Domestic Violence, etc.). The individual program names requested are typically identified within the “comments” section of the assignment referral. Thus, CRMs, especially in high programming institutions, need to maintain their own local (institution) program waitlists outside of SOMS. This makes it a challenge to monitor which inmates are on waitlists for specific programs, as one inmate may have requested several programs within a category type, such as the Anger Management Program. Also, once an inmate is assigned to a program, the inmate is automatically dropped from the respective category type within SOMS, requiring department staff to reenter the inmate into the same program category type.

Assigning inmates who have existing work or education assignments to RAC-eligible programs presents additional challenges within SOMS. When enrolling inmates into the new programs, SOMS will not allow inmates to have an overlap in their schedule. Because inmates often have a job or education classes during the day, CRMs are unable to assign them to a program if any part of that program time overlaps with their class or their job. Performing this check must be done manually by comparing multiple screens of data within SOMS. Thus, many CRMs recommended that SOMS be updated to automatically check for inmate scheduling conflicts with work or medical assignments and academic or vocational education classes.

Another ongoing challenge faced by CRMs involves implementation of new milestone-eligible and RAC-eligible programs without the corresponding amount of staff/self-help sponsors required to complete the associated tasks. Inmate activity groups often want to run their programs during regular business hours. This is a challenge because available space is limited during these times and inmates are generally assigned to other programs. Also, many self-help sponsors are not available to work during regular business hours.

Additionally, many CRMs expressed frustration that their institution did not receive a Management Services Technician position. The department selected 10 to 12 institutions to receive this position. Many of the remaining institutions believed this position or other another support staff position would assist in performing the extensive data entry requirements for tracking inmate program attendance within SOMS. Thus, those institutions utilize an analyst or the CRM to perform this data entry while also performing other priority tasks, such as creating new inmate activity groups, adjusting programming schedules, and amending program bylaws.

Inmates (enrolled in either academic or vocational programming)

The OIG asked inmates if they felt prepared to take the GED exam. Most inmates, including those who had not yet taken the exam, indicated they were sufficiently prepared by their instructors to take the exam. Those inmates who did not feel fully prepared most often commented about the lack of computer skills training.

Inmates in the academic programs suggested several improvements for a more successful education program. The main suggestion was adding more teacher aids and tutors to be available for questions and additional assistance. Inmates stated the teachers are often busy due to large class sizes and students learning at different education levels. Other suggestions included providing additional updated books, supplies, and technology.

Inmates participating in Career Technical Education most frequently said they enjoyed the hands-on training experience in the vocational programs. They appreciated how the environment mirrored a real-life workplace, and they valued learning skills and earning certifications they can apply to job opportunities once they are released from prison. Inmates stated they felt rehabilitative programs promoted confidence and camaraderie and dispelled judgment and racial division. Engaging instructors and milestone incentives encouraged inmates to think about their life beyond prison.

Overall, other changes inmates believed could improve education and rehabilitation programs included better advertisement of available programs, shorter program waitlists, and more program options. Several inmates would like to see improvements to the assignment process so inmates who do not want to participate in a particular program do not occupy the position of other inmates who want to be there. Many inmates also desired support and flexibility when being released to class, and would like to explore options to still attend class when there is a lockdown on the yard that prevents programming to occur.

CALIFORNIA LOGIC MODEL IMPLEMENTATION PROGRESS

This section describes the progress the department made implementing the eight components of the California Logic Model this reporting period.

Assess High Risk

The department uses the results of the California Static Risk Assessment (CSRA) tool to assess an inmate's risk to reoffend. The CSRA uses an offender's past criminal history and characteristics to predict the risk to reoffend. Data provided by the department indicates that as of June 27, 2018, 98 percent of inmates and 97 percent of parolees have CSRA scores.

Table 1: Inmate Risk Assessments (as of June 27, 2018)

Total Institution Population	127,795
Risk to Recidivate (CSRA)	125,756
Parolees with a Moderate/High CSRA Score	62,951

Table 2: Parolee Risk Assessments (as of June 27, 2018)

Total Parole Population	43,688
Risk to Recidivate (CSRA)	42,419
Parolees with a Moderate/High CSRA Score	24,865

Of the 98 percent of the inmate population that has received a risk assessment, 50 percent have a moderate to high risk of reoffending. As of June 27, 2018, 97 percent of the parole population has received a risk assessment, and of these, 59 percent have a moderate to high risk to reoffend.² Similar to the previous fiscal year as displayed in Tables 1A and 2A, the percentage of the inmate and parolee population with risk assessments completed were both 98 percent; 51 percent of inmates and 60 percent of parolees with a California Static Risk Assessment score had a moderate to high risk to reoffend.

Table 1A: Inmate Risk Assessments (July 2017–June 2018 Data)

Offender Population	127,795
Risk to Recidivate (CSRA)	125,756
Parolees with a Moderate/High CSRA Score	62,951

² The parole population was derived from SOMS, which reflects data as of June 27, 2018.

Table 2A: Parolee Risk Assessments (July 2017–June 2018 Data)

Parole Population	42,688
Risk to Recidivate (CSRA)	42,419
Parolees with a Moderate/High CSRA Score	24,865

Assess Needs

The department uses the Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) as the needs assessment tool to determine offender rehabilitation programming needs. CDCR has determined that the Test of Adult Basic Education (TABE) assessment provides the best indicator of an offender’s need for academic programming, with a TABE reading score below 9.0 indicating a criminogenic need.³

Some inmates are excluded from receiving a Core COMPAS assessment, such as those designated enhanced outpatient program (EOP) level of care or higher, life without parole, and condemned.⁴ As of June 27, 2018, the total number of Core COMPAS assessments completed for general population inmates is 85,134. The department is averaging over 967 assessments per month. Of the total inmate population, only 113,654 are eligible to receive a Core COMPAS assessment. Of the eligible inmates, 106,190 have received a Core COMPAS assessment, which is 93.5 percent of the total eligible population, approximately a 2 percent increase in completed Core COMPAS assessments since the last reporting period.

Table 3: Inmate Core COMPAS Assessments

	July 2016–June 2017	July 2017–June 2018
Core COMPAS Assessments Completed for General Population Inmates	82,925	85,134

Once an inmate reaches 210 days to parole, he or she is given a Reentry COMPAS assessment. The resulting scores from this assessment are used to guide programming decisions upon parole. For the period of July 1, 2017, to June 30, 2018, 95 percent of the parolee population received a Reentry COMPAS assessment, which is an increase of 25 percent since the last reporting period.

³ The criminogenic need categories can include any of the following: substance use disorder, anger, employment problems (incorporated academic and career technical needs), criminal personality (formerly “criminal thinking”), and support from family of origin (formerly “family criminality”).

⁴ Inmate designated EOP level of care or higher may receive a COMPAS assessment administered by mental health staff.

Table 4: Parolee Reentry COMPAS Assessments (Fiscal Year 2017–18 Data)

	FY 2017–18 COMPAS Completed	FY 2017–18 Parole Population	Percent of Parolee Population with a reentry COMPAS
Reentry COMPAS Assessments Completed	41,302	43,688	95%

Table 4a: Parolee Reentry COMPAS Assessments (Fiscal Year 2016–17 Data)

	FY 2016–17 COMPAS Completed	FY 2016–17 Parole Population	Percent of Parolee Population with a reentry COMPAS
Reentry COMPAS Assessments Completed	28,776	43,854	70%

Needs Identified

Using June 27, 2018, data from CDCR, COMPAS, and TABE assessments across all institutions, including the out-of-state facilities, reflects two domains with more than half of all offenders with a moderate to high risk to reoffend. The completed Core COMPAS assessments for both the substance use and anger domains were 66.4 percent and 50.6, respectively, during the last two fiscal years.

Table 5: Rehabilitative Needs of Inmates with a Completed Core COMPAS Assessment—Institution Population

Institution Population		FY 2016–17	FY 2017–18
Substance Abuse	Low	33.62%	33.60%
	Mod/High	66.38%	66.40%
Criminal Personality	Low	58.66%	58.83%
	Mod/High	41.34%	41.17%
Anger	Low	49.42%	49.44%
	Mod/High	50.58%	50.56%
Employment Problems	Low	62.11%	62.42%
	Mod/High	37.89%	37.58%
Support from Family of Origin	Low	77.76%	77.54%
	Mod/High	22.24%	22.46%

Table 6: Rehabilitative Needs of Parolees with a Completed Reentry COMPAS Assessment—Parole Population

Parole Population		FY 2016–17	FY 2017–18
Reentry Substance Abuse	Low	52.88%	49.67%
	Mod/High	47.12%	50.33%
Criminal Thinking Observation	Low	84.58%	86.74%
	Mod/High	15.42%	13.26%
Negative Social Cognitions	Low	80.20%	80.64%
	Mod/High	19.80%	19.36%
Reentry Financial	Low	47.99%	49.70%
	Mod/High	52.01%	50.30%
Reentry Employment Expectations	Low	47.39%	49.47%
	Mod/High	52.61%	50.53%
Reentry Residential Instability	Low	63.71%	64.05%
	Mod/High	36.29%	35.95%

Once rehabilitative programming functions at full operational capacity and reaches a maintenance phase with stable service delivery, over a two-year to three-year period, the Board expects to see reductions in the percentage of offenders with moderate to high needs when they are reassessed before parole. The department previously reported that it did not have sufficient resources to provide reentry COMPAS assessments to all offenders prior to release. However,

the Board requested progress in this area because it provides valuable information regarding the effectiveness of rehabilitative programming and helps identify programming needs upon an offender's release.

In the department's review of provided COMPAS information, offenders released are relatively consistent from 2016–17 to 2017–18. However, the department has significantly increased its total number of reentry COMPAS assessments by 25 percent, with 95 percent of the parole population receiving the assessment. The number of offenders released with moderate to high needs in substance use, reentry financial, and reentry employment expectations exceeds 50 percent of the parole population for those receiving a reentry COMPAS. The only moderate to high needs category that increased from the last reporting period was reentry substance use. Reflecting on the department's 2017 Outcomes Evaluation Report, the importance of substance use treatment has a profound effect on reducing recidivism. The department's evaluation report noted that offenders who received in-prison substance use disorder treatment and completed aftercare had a lower three-year conviction rate (29.2 percent) than offenders associated with any other combination of in-prison substance use disorder treatment or aftercare (receiving some or no aftercare).

The Board commends the department for improving its efforts to assess its parole population with a reentry COMPAS. The department should continue in its efforts to provide all offenders a COMPAS reentry needs assessment prior to release. The Board also hopes to see continued reductions in the percentage of offenders with moderate to high needs upon parole, with an emphasis on reducing the moderate to high need for reentry substance use treatment.

In-Prison Minimum Participation and Counting Rule for Program Completion

Reentry services are currently provided to inmates at all 35 adult institutions based on an inmate's assessed need for services and his or her earliest possible release date. The California Static Risk Assessment (CSRA) score coupled with an assessment of the inmate's criminogenic needs (COMPAS assessment) establishes the priority placement in services and level of program intensity. If the CSRA results show a high or moderate risk to reoffend, and the results of the COMPAS identify a high or medium criminogenic need in substance use, academic, or employment domains, the inmate receives priority in program placement.

On July 1, 2017, the department implemented its new counting rule to track program information for all offenders. Instead of focusing on a target population, minimum participation in a program is defined as the number of offenders who have been enrolled in a program for at least 30 calendar days. This information allows the Division of Rehabilitative Programs (DRP) to monitor a threshold for the amount of programming received by offenders. The department counts as a completion a SOMS program assignment with a status of "completed" regardless of the reason for termination, and a SOMS program assignment of "unassigned" or "reassigned"

with a reason for termination of program completion. With newly developed counting rules, DRP anticipates using the cohort of offenders included in “minimum participation” to define who has “participated” in programming. This definition and counting measure was developed to mitigate prior counting rule concerns surrounding participation.

Although there are numerous variables that determine programmatic placement, DRP prioritizes placement by the offenders’ assessed level of need for services (COMPAS), their assessed risk to recidivate (CSRA), and their earliest possible release date (focusing on offenders within five years of their planned release date). Additionally, Title 15 of the California Code of Regulations, Section 3375(b), states that although the classification process shall take into consideration an inmate’s needs, interests, and desires, the behavior and placement score ultimately make the placement based upon the outcome of the individual’s classification committee. Thus, the classification process can supersede any assessment-based prioritization.

Minimum participation is defined as the number of offenders who have been enrolled in a program for a minimum of 30 *calendar* days. This counting rule, as a simple validation, also requires that there be associated “X-time,” which represents an offender’s in-classroom time. As discussed, this counting rule was developed to mitigate prior counting rule issues related to program participation. Because this rule covers 30 *calendar* days, it can translate to various estimated programming days depending upon the program type (number of times/week and overall length of program). For a five-month substance use disorder treatment (SUDT) program, it would relate to enrollment for one month (or approximately 20 percent of total program time an offender should be enrolled) before being considered participating. In comparison, for a cognitive behavioral treatment component such as criminal thinking, which meets twice weekly for three months, an enrollment for 30 calendar days would represent a minimum of eight days of programming (2 days/week for 30 calendar days), or approximately 30 percent of total program time an offender should be enrolled before being considered participating.

The Board acknowledges the department’s effort to quantify a level of participation to count as meeting a need or benefitting from a program. This is a progression from the former “one day” counting rule, where an inmate would be counted as having a need met through program attendance even if the inmate had only attended one day of the class. While the new minimum participation measure is forward progress, the Board encourages the department to develop future meaningful measures pertaining to program participation and completion. As documented in the 2017 Prior Board Recommendations and the Department’s Progress section, the department has identified its progress and plans to explore evaluation opportunities with independent third party entities to evaluate current programming.

To have meaning, there must be something meaningful about the data; for example, it is meaningful to have completed a program, or to have three of four criminogenic needs met, as these have important connotations in the criminal risk literature. Once it is found that a certain

number of hours/days in a program leads to reductions in institutional behaviors, that number would then be meaningful in measuring program effectiveness and optimal outcomes.

Develop Case Management Plan

A case management plan is an integral part of effective rehabilitation programming. Case management plans ensure that offenders are assigned to the appropriate programs based on the relative strengths identified on their criminogenic needs assessments. Case management plans help staff determine the type, frequency, and timing of programming an inmate should receive to most effectively reduce the likelihood of reoffending. This case plan should transfer with the inmate upon release to parole or to county supervision to assist with identifying the most effective follow-up programming based on programming received at the institution, individual goals met, symptoms of behavioral conditions, and other vital information collected during the course of incarceration.

The department implemented the SOMS Rehabilitative Case Plan (RCP) in September 2016. This individualized plan outlines an offender's addressed needs and recommended plans for future programming, providing an incarceration timeline and rehabilitative program recommendations for the offender. The initial goal was to provide a printed case plan that would reflect what an inmate has accomplished, including any certificates received from vocational courses as well as assessed risk and criminogenic needs.

The Rehabilitative Case Plan (RCP) is currently utilized for various purposes. Correctional counselors and other in-prison program staff are using the RCP as a tool to assist with determining assessed needs for possible program placement into various rehabilitative programs prior to an offender's committee actions. Correctional counselors assigned to the Male Community Reentry Programs (MCRP) provide the RCP to the appropriate stakeholders to assist in developing a participant's Individual Reentry Plan while at the MCRP.

For informational purposes on an offender's prior in-prison plan and program accomplishments, the RCP is also included in all Post Release Community Supervision (PRCS) packets. To help ensure that the RCP is included in the packets, it is included on the PRCS checklist as an item to be provided by case records staff. The department is also including the RCP in the Division of Adult Parole Operations (DAPO) parole packets; DAPO agents have access to SOMS and can use the system remotely to review the RCP while an offender is still in prison. In order to ensure the relevant information on the case plan is still available should a hard-copy not be received, SOMS end users can still access a summary of the offender's educational history, course transcripts, test scores, previous programming, job assignments, achievements earned, certificates or diplomas, and institutional work skills. Appendix A provides an example of a rehabilitative case plan.

Capacity for Rehabilitative Programming

The department's *Blueprint* called for an increase in academic and career technical education (CTE) instructors over a two-year period to increase program capacity. Capacity is the maximum number of offenders who can be served in each program area in a year.⁵ While academic education and CTE programs were available at adult institutions statewide, transitions programs were primarily available at the 13 institutions designated as reentry hubs, geared toward medium- and high-risk offenders. The department has expanded reentry hub services to all 35 adult institutions, and in July 2016, the institutions began moving transition services to the education departments as opposed to renewing contracts with outside counselors.

As shown in Table 7 on the next page, the total capacity for all in-prison and post-release programs has increased by 148 percent from June 2016 to June 2018. The largest increases in program capacity during this period occurred in the in-prison employment programs (281 percent) and in-prison substance use disorder treatment (176 percent).

Table 7: Adult Rehabilitative Program Capacity

Rehabilitative Program	June 2016	June 2017	June 2018
Academic Education⁶	41,784	44,365	45,030
Career Technical Education	8,694	9,045	9,052
In-Prison Substance Use Disorder Treatment	7,747	11,645	13,603
In-Prison Employment Programs	7,380	21,409	20,734
In-Prison Cognitive Behavioral Treatment			
Anger Management	4,176	8,208	9,840
Criminal Thinking	4,128	8,160	9,840
Family Relationships	2,272	4,072	4,936
Victim Impact	336	696	1,488
Post-Release Substance Abuse	4,020	8,926	9,975
Post-Release Employment	6,050	5,940	6,162
Post-Release Education	7,134	6,999	7,841
Total Capacity for All Programs	93,721	129,465	138,501

⁵ Appendix C, identifies the current programming matrix for Fiscal Year 2017–18, providing the programming summary for academic education and career technical education at all adult institutions and in-state contract facilities.

⁶ Academic and CTE report as a daily budgeted capacity. All other programs report the average number of times a program can be completed in one fiscal year (annualized).

In-Prison Programs — Miscellaneous Benchmarks

The OIG obtained rehabilitative programming figures for Fiscal Year 2017–18 from the department’s Division of Rehabilitative Programs (DRP) and Office of Correctional Education (OCE) and performed fieldwork to determine the operational status of the various in-prison programs at each institution.⁷ In order to determine the operational status, the OIG acquired the rehabilitation authorized position counts per institution, discussed any discrepancies with education managers at the institutions, reviewed monthly attendance reports, and conducted random spot checks of classrooms. In order to be deemed fully operational, a course needed to have a corresponding instructor, an assigned classroom, and data showing monthly inmate attendance. Solely having an instructor hired did not deem a course fully operational.

The OIG’s fieldwork at all prisons revealed that 91 percent of the academic education programs and 82 percent of the CTE programs were operational. From the C-ROB report issued in September 2017, this represents a 7 percent increase in academic education programs and a 3 percent increase for CTE programs. For the remaining in-prison programs, 83 percent of the substance use disorder treatment slots were filled, 92 percent of the cognitive behavioral therapy slots were filled, and 86 percent of the pre-employment transitions classes were fully operational. From the last C-ROB report issued in September 2017, participation in each area increased—12 percent in substance use disorder treatment, 12 percent in cognitive behavioral therapy, and 2 percent in pre-employment transitions.

Staffing

As of June 30, 2018, the department reported 547 academic teacher positions (general population, alternative programming, and voluntary education program) and 304 CTE teacher positions. There were 49 academic teacher classes and 55 CTE teacher courses that were not fully operational.

Training Opportunities

During past OIG site visits, instructors had expressed a desire for additional training opportunities and an enhanced network between the institutions for information sharing on best practices. The OCE has developed Training for Trainers (T4T) to increase learning opportunities for instructors, as well as Professional Learning Communities (PLCs) that will empower staff to become instructional leaders and increase information sharing within and between the 35 adult institutions.

⁷ Appendices B, C, and D list the in-prison programming matrix, current programming, and proposed programming for Fiscal Year 2017–18.

During Fiscal Year 2017–18, a total of 12 prisons received the PLC training, and OCE plans to expand PLC training to all prisons in the future. The PLC’s typically meet monthly on designated staff development days, and many prisons are able to meet more frequently as time allows when inmates are not in class.

The OCE has trained 87 participants in T4T in Transformative Correctional Communications. Regional trainings blend best and evidence-based correctional rehabilitative practices with adult learning theory. The goal is to improve communication, inmate/student motivation, and positive interactions between OCE staff and justice-involved individuals. Increasing training opportunities is expected to enhance the quality of education and information-sharing, allowing for standardized best practices across all adult institutions.

Academic Education Programs

Academic education programs are offered throughout an inmate’s incarceration and focus on increasing an offender’s reading ability to at least a 9th-grade level. For offenders reading at 9th-grade level or higher, the focus is to help them earn a general education development (GED) certificate or High School Equivalency (HSE). Support for college programs is offered through the voluntary education program (VEP). While education is available for all eligible offenders, priority is given to offenders with a reading level below 9th grade.

The department utilizes three academic structures: 1) general population, consisting of 27-student morning and afternoon classes, with a ratio of 54 offenders per teacher; 2) alternative programming, occurring outside the traditional morning and afternoon schedule, also with a ratio of 54 offenders per teacher; and 3) VEP, with a ratio of 120 offenders per teacher. Modifications to the daily student-inmate capacity for classrooms may also be modified due to restrictions by the fire marshal.

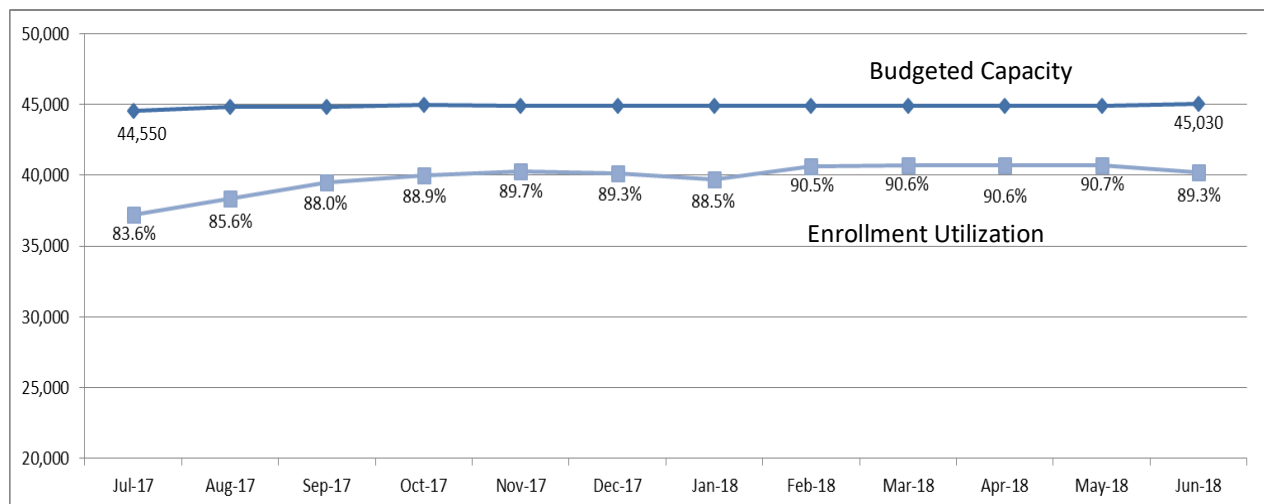

The department identified a total of 547 academic positions (general population, alternative programming, and VEP) to become operational during Fiscal Year 2017–18. OIG staff reviewed the institutions’ documents from June 2018 through August 2018 and performed 35 site visits to determine whether 547 academic positions, as provided by DRP, were fully operational. At the conclusion of the fieldwork, the OIG found 498 of the 547 positions were fully operational, a 91 percent rate of compliance. This represents a 7 percent increase from what was documented in the C-ROB report issued in September 2017.

Academic Education Program Capacity, Enrollment Utilization, and Attendance

As of June 30, 2018, the academic education capacity was 45,030. The following graphs illustrate the academic education enrollment utilization (percent of budgeted capacity by month) and attendance rates for the same period.⁸ Attendance (formerly termed utilization) is the percentage of available program hours an inmate actually spends in the program.

As shown in Table 8, enrollment utilization rates averaged 89 percent during Fiscal Year 2017–18. The department’s budgeted capacity has remained stable since July 2017, but the percentage of enrollments has gradually increased from a low of 83.6 percent in July 2017 to a high of 90.7 percent in May 2018, due to program and departmental changes.

Table 8: Academic Education Program Capacity and Enrollment Utilization, Fiscal Year 2017–18

As shown in Table 9, on the next page, academic education program attendance rates averaged 72 percent during Fiscal Year 2017–18, which is a 3 percent decrease from Fiscal Year 2016–17. Of note, during each of the last 4 months of Fiscal Year 2017–18, the attendance rates were below 70 percent for the first time since May 2015.

⁸ Please refer to Appendix C for academic and CTE teacher distribution and budgeted capacity.

Table 9: Academic Education Program Attendance Rates, Fiscal Year 2017–18 Data

Academic Achievements and Program Completions

The department has continued to increase college course completions and reports that participation has increased because of the additional VEP teachers and increased college course availability. The department expects the number of college course completions to continue to increase because of the partnership with the California Community College Chancellor's Office to expand and increase inmate access to community college courses. In 2014, the department only had one face-to-face college program at one institution. As of June 30, 2018, the department has face-to-face college programs at 34 institutions and 4 inmate fire camp sites. According to the department, there are currently 17 colleges (16 community colleges and one California State University) offering face-to-face instruction. The Board commends the department for its collaborations with community colleges in its efforts to expand access to both correspondence courses and face-to-face instruction at all of the institutions.

Table 10: Achievements and Completions (Fiscal Years 2016–17 and 2017–18)

Academic Achievements and Program Completions	FY 2016–17 Totals	FY 2017–18 Totals
CASAS Benchmarks	19,105	15,591
TABE Achievements	2,501	2,387
GED/HSE Sub-Tests Passed	12,470	8,782
GED/HSE Completions	4,006	3,178
High School Diplomas	96	377
College Course Completions	10,465	14,309
AA Degrees Earned	465	369
BA Degrees Earned	5	7
MA Degrees Earned	1	13

In addition, the department has begun looking into a process to better link inmates in the institutions to colleges in the community so inmates have an opportunity to enroll in college prior to leaving the institution. This process will reduce the amount of time between inmates releasing and beginning college courses in the community. The Board commends the department for its forward-thinking plans for the next calendar year and will report on any updates in a future report.

Computer-Based GED and High School Equivalency Exams

The General Education Development (GED) assessment or the High School Equivalency Test (HiSET) is provided to incarcerated students who possess neither a high school diploma nor a high school equivalency certificate. Students who are enrolled in a GED program are provided subject matter preparation to take the High School Equivalency test. The HiSET is offered as an alternative to the GED to provide a paper version of the test to meet the needs of offenders within secure housing units. The department also offers the HiSET as an alternative test for offenders housed in the fire camps.

Rehabilitative Advancement Project — eReader

The department is working to maximize opportunities for eligible offenders to obtain milestone completion credits and is implementing information technology programs at institutions. eReaders provide students’ semester textbook curricula, reducing textbook costs and enhancing access to technology. eReaders will also be made available to inmates for purchase and are now available to some non-VEP inmates. However, some devices are still not functional, and the demand for accessibility continues to increase. The need for current technology and up-to-date materials will continue to be an important issue, especially with the expansion of college courses.

The department currently issues up to 4,500 eReaders to students enrolled in college courses. Colleges in turn, have agreed to align course offerings paired to free open source materials, which have increased to over 60 percent of total usage. This collaborative effort between the OCE and local colleges has assisted in eliminating barriers to higher education by increasing enrollments and reducing textbook costs that may have hindered enrollment efforts. Since the inception of the eReader project, CDCR has provided 50,000 pieces of educational content via eReaders. This includes CDCR-purchased electronic books and booklets and free open-source materials.

CDCR is continuing to seek opportunities to increase educational engagements. Since 2017, CDCR has monitored and viewed assessments and improvements needed in the current eReader tablets. Based on new technology applications and recommendations, future improvement efforts are being developed for upgrading teacher interface, providing an easier to use eReader application, and increasing flexibility when assigning open-source or free books.

Career Technical Education Programs

The department identified a total of 304 CTE positions to become operational during Fiscal Year 2017–18. From June 2018 through August 2018, OIG staff reviewed the institutions’ documents and performed site visits to determine whether 304 CTE positions were fully operational. At the conclusion of the fieldwork, the OIG found 249 of the 304 were fully operational, an 82 percent rate of compliance. This represents a 3 percent decrease from what was documented in the C-ROB report issued in September 2017. As has been reported in the past, the most common reason CTE courses have not been operational was instructor vacancies.

Career Technical Education Program Capacity, Enrollment Utilization, and Attendance

As of June 30, 2018, there were 9,052 available CTE slots, and of those, approximately 75 percent were operational as of June 2018, according to the department.⁹ The capacity of 9,052 slots for CTE programs represents an increase of 7 slots from the September 2017 C-ROB Report. The following graphs illustrate the CTE enrollment utilization (percent of budgeted capacity by month) and attendance rates for the same period. The department’s CTE capacity and enrollment have remained relatively level during the past fiscal year. However, there has been a steadily low rate of attendance, as shown in Table 12, from December 2017 through the lowest point in June 2018, which was often due to changes in available programs.

⁹ Appendix C details the Academic and CTE Teacher Distribution and Budgeted Capacity.

Table 11: CTE Program Capacity and Enrollment (July 2017–June 2018 Data)

Table 12: CTE Program Attendance Rates (July 2017–June 2018 Data)

Career Technical Education Achievements and Program Completions

The following table displays the CTE component and program completions and industry certifications. The department continues to increase CTE component completions, program completions, and industry certifications from prior fiscal years.

Table 13: CTE Achievements and Program Completions

CTE Completions and Industry Certifications	FY 2016–17 Totals	FY 2017–18 Totals
CTE Component Completions	10,390	19,991
CTE Program Completions	3,261	2,361
CTE Industry Certifications (without component or program completion)¹⁰	21,100	18,086

Cognitive Behavioral Treatment Programs

Cognitive behavioral treatment (CBT) takes a hands-on, practical approach to problem solving by working to change patterns of thinking or behaviors. Offenders have access to CBT programs that include substance use disorder treatment, criminal thinking, anger management, and family relations modality components. The department has moved from the previous Reentry Hub model programming at specific institutions and has successfully implemented CBT programming in all CDCR adult institutions. This continuity-of-care-based model aims to provide access to offenders with an assessed need for services and allows them to receive services within their current yard and institution without interruption to other existing offender activities (employment, family reunification strategies, education, etc.).

OIG staff reviewed the institutions’ documents from June 2018 through August 2018 and performed site visits to determine whether CBT programs were implemented; 4,966 of the planned 5,388 slots were fully operational, a 92 percent rate of compliance. This is an increase of 12 percent from what was documented in the C-ROB report issued in September 2017.

Substance Use Disorder Treatment Programs

The department offers evidence-based substance use disorder treatment (SUDT) programs that prepare offenders for release by developing the knowledge and skills necessary to avoid substance use relapse and successfully integrate back into the community. The substance use disorder treatment program typically lasts between 5 to 6 months and requires a minimum of 325 hours for completion (3.25 hours per day, 5 days per week).

¹⁰ In Fiscal Year 2017–18, this SOMS-reported figure is capturing all CTE certifications, which can include both final industry certifications and certifications achieved in the course of program completion.

In order to ensure appropriate flexibility to best serve the offender population, DRP has allowed enrollment practices to vary for SUDT/cognitive behavioral treatment (CBT) services from institution to institution based on the best fit for that population and the ability of the curricula to fit open-enrollment. Institutions that are able to house or filter eligible offenders in a primary location can have an open enrollment, e.g., A-facility and B-facility populations intermingle because of custody and classification, all programs take place in the A/B complex visiting room, and curricula appropriately allows for it. Open enrolled courses allow slots to be backfilled when vacated with the curriculum provided continuously. Institutions that move the programs from yard to yard based on offenders’ assessed needs and time to serve will generally have closed courses.

Program Capacity, Enrollment Utilization, and Attendance

As of June 30, 2018, the capacity for statewide SUDT programming was 5,476, including 88 enhanced outpatient program slots.¹¹ This is an increase of 816 additional slots since the C-ROB report issued in September 2017, when the SUDT capacity was 4,660. From June 2018 through August 2018, OIG staff reviewed the institutions’ documents and performed site visits to determine whether SUDT programs were implemented, including long-term offender programs (LTOPs) at 30 of the 35 adult institutions. In total, the OIG found that 4,533 offenders occupied the 5,476 operational slots, an 81 percent rate of compliance. This is an increase of 10 percent since the C-ROB report issued in September 2017. The following graphs illustrate the SUDT program enrollment utilization (percent of budgeted capacity by month) and attendance rates for the same period.

Table 14: SUDT Program Capacity and Enrollment (July 2017–June 2018 Data)

¹¹ The OIG’s onsite reviews did not include review of the 192 slots at the in-state contract facilities.

Table 15: SUDT Program Attendance Rates (July 2017–June 2018 Data)

Substance Use Disorder Treatment (SUDT) and Program Completion

The following tables display the SUDT completions and exit rates for Fiscal Year 2017–18 for both in-prison and community aftercare programs. A non-completion exit from SUDT means the inmate or parolee attended but did not complete the program. These exits occur due to transfers, refusal to attend the program once assigned, behavioral issues necessitating removal from treatment, or other issues preventing an inmate from attending and completing the treatment program.

Table 16: In-Prison SUDT Completions and Exit Rates, Fiscal Year 2017–18

Month	Total Exits	Completions	Other Exits	% Completions
July 2017	746	378	368	50.7%
August 2017	903	487	416	53.9%
September 2017	771	396	375	51.4%
October 2017	860	402	458	46.7%
November 2017	764	351	413	45.9%
December 2017	722	335	387	46.4%
January 2018	956	491	465	51.4%
February 2018	900	428	472	47.6%
March 2018	954	531	423	55.7%
April 2018	1,075	500	575	46.5%
May 2018	1,095	537	558	49.0%
June 2018	923	449	474	48.6%
Average Completions Fiscal Year 2017–18				49.5%

Table 17: Community Aftercare SUDT Completions and Exit Rates, Fiscal Year 2017–18

Month	Total Exits	Completions	Other Exits	% Completions
July 2017	897	235	662	26.2%
August 2017	528	127	401	24.1%
September 2017	909	283	626	31.1%

June 2018	1,262	461	801	36.5%
Average Completions Fiscal Year 2017–18				29.4%

The department’s 2017 Outcome Evaluation Report examined 3,271 offenders released who had participated in substance use disorder treatment while in prison. Offenders who received in-prison SUDT and complete aftercare (339 offenders) had the lowest return-to-prison rate (29.2 percent or 99 offenders).¹² The three-year return-to-prison rate increases by 26 percentage points (55.6 percent or 144 offenders) if an offender only received some aftercare. Among offenders who received in-prison SUDT but did not receive aftercare, there was a lower return to prison rate of 44.9 percent or 1,200 offenders. Overall, offenders who received in-prison SUDT and complete aftercare had a lower three-year conviction rate (return-to-prison) than offenders associated with any other combination of in-prison substance use disorder treatment and aftercare.

The average completion rate for inmates who did not complete the substance use disorder treatment remained at less than 50 percent for the past two fiscal years (49.7 percent in Fiscal Year 2016–17) continues to be a concern. The aftercare completion rate for parolees remained constant at only 29 percent for the past two fiscal years and represented a hindrance to effective reentry efforts and recidivism reduction strategies. The Board underscores the importance of an effective substance use disorder treatment program, both in-prison and community aftercare, and is hopeful the department will take measures to increase the number of completions in both areas.

¹² CDCR’s 2017 Outcome Evaluation Report examined offenders released in Fiscal Year 2012–13, this report was last updated in June 2018.

Pre-Employment Transition Programs

The pre-employment transitions (PET) program was designed to provide offenders employment preparation skills to ensure successful reentry into society, primarily during the last six months of incarceration. The PET program teaches job-readiness and job search skills, and provides offenders with community resources that can assist in their transitions back into the community. Through existing data resources, the department is able to identify offenders with assessed needs for reentry-related services in each institution and yard.

“Another Chance, a Better Choice,” was developed by the Sacramento Employment and Training Agency (SETA). The curriculum is designed to teach job readiness, job search skills, and prerequisite skills needed for today’s competitive job market. It includes practical and strategic information, hands-on activities, individual and team oriented exercises, role playing, and motivational information. In addition to employment preparations, another focus is financial literacy and education curricula called “Money Smart.” The division of rehabilitative programs believes financial education fosters financial stability for individuals and for entire communities upon an offender’s release.

OIG staff reviewed the institutions’ documents from June 2018 through August 2018 and performed site visits to determine whether transitions programs were fully implemented; 2,154 of the planned 2,506 slots were fully operational, an 86 percent rate of compliance. This is a 2 percent increase since the C-ROB report issued in September 2017.

Long-Term Offender Model

The Long-Term Offender Program (LTOP) is a voluntary program that provides evidence-based treatment to offenders who are serving long-term sentences. The program was designed based on the reentry program model. The department implemented substance use disorder treatment, criminal thinking, anger management, victim’s impact, and family relations cognitive behavioral modalities.

Expansion contracts for the cognitive behavioral treatment (CBT) LTOP were executed on July 17, 2017, and the expansion is now complete. The CBT-LTOP is occurring at 30 CDCR institutions that have an appropriate offender population with long-term sentences. The programming comprises substance use disorder treatment, anger management, criminal thinking, family relationships, victim impact, and denial management. CBT-LTOP is a voluntary program that provides evidenced-based programming to offenders who are subject to the Board of Parole Hearings (BPH) parole suitability process. The offenders are given the opportunity to program with only their peers, which tends to elicit a more open line of communication in the group environment. Similar to other DRP CBT programming, the goal of the LTOP is to provide CBT programming to address criminogenic needs and risk, thereby reducing the likelihood of reoffending. Specific programs and locations are listed in Appendix B the in-prison programming matrix.

Additionally, the Offender Mentor Certification Program continues to provide an opportunity for long-term offenders to complete a certification program in alcohol and other drug counseling. There are currently 31 mentors statewide who have fully completed the curricula and required certification. Offenders are recruited from various institutions and transferred for training at one of three sites: the Central California Women’s Facility, Valley State Prison, or California State Prison, Solano. Once the candidates pass the written California Association for Alcohol/Drug Educators examination, the inmate-mentors are transferred back to their original institutions and are paid to obtain their 4,000 hours of work experience by co-facilitating SUDT programs. There are 36 candidates per training session, 108 candidates annually, and the program rotates between the three sites during the year.

Additional Program Models and Opportunities

California Prison Industry Authority

Industry Employment Program

The California Prison Industry Authority (CALPIA) offers programming at 35 institutions throughout the state, operating over 100 service, manufacturing, and consumable enterprises and providing over 8,088 offender assignments.

CALPIA offers 127 nationally recognized accredited certifications through its Industry Employment Program. In Fiscal Year 2017–18, over 7,677 offenders successfully completed an accredited certification program, and over 556 received a certificate of proficiency or Standard Occupational Code Proficiency certification.

CALPIA’s Industry Employment Program (IEP) is focused on improving the ability of offenders to effectively transition from prison to the community and successfully obtain jobs when offenders are released.

CALPIA has partnered with the United States Department of Labor and the California Department of Industrial Relations to offer offenders the ability to earn federal and state certified apprenticeship certificates.

Offenders are automatically registered in the certification program through their standard occupational code and earn certificates once they have reached journeyman level for their occupation. CALPIA registered 489 offenders into state apprenticeship programs in Fiscal Year 2017–18. Full implementation of the state program at 34 institutions is scheduled for completion in December 2018 and implementation of the federal program commences January 2019.

Career Technical Education Program Expansion

In Fiscal Year 2013–14, CDCR’s Division of Rehabilitative Programs (DRP) entered into an interagency agreement with CALPIA to implement CTE programs at five institutions. This DRP-funded agreement provides for 14 CTE programs with courses in pre-apprentice construction labor, pre-apprentice carpentry, pre-apprentice iron working, facilities maintenance, commercial driving, computer coding, and computer-aided design. The current interagency agreement between CDCR and CALPIA continues to remain in place through Fiscal Year 2018–19 and reimburses CALPIA \$2.6 million annually. CALPIA will also receive \$2.7 million in ongoing funding to incorporate an additional ten programs at nine locations under the DRP CALPIA agreement in Fiscal Year 2018–19. The program expansion includes computer coding, culinary, computer-aided design, and roofing. In addition, the Prison Industry Board has approved expanding CTE to include a viticulture program.

CALPIA is also partnering with CDCR’s Division of Juvenile Justice (DJJ) to implement new programs for youth correctional facilities. In Fiscal Year 2017–18, CALPIA successfully began providing computer coding at Ventura Youth Correctional Facility and pre-apprentice construction labor at N.A. Chaderjian Youth Correctional Facility. Starting in Fiscal Year 2018–19, CALPIA will implement a new CTE pre-apprentice construction labor program at Ventura Youth Correctional Facility and a CTE computer coding program at N.A. Chaderjian Youth Correctional Facility.

Recidivism Study

CALPIA partnered with the University of California, Irvine (UCI), and the Center for Evidence-Based Corrections to study the rates of recidivism among CALPIA participants. The study began in May 2017 and will examine new arrest and conviction rates within a two-year period among offenders who have participated in a CALPIA program.

Arts in Corrections

Arts in Corrections is a partnership between CDCR and the California Arts Council (CAC) to combat recidivism, enhance rehabilitative goals, and improve the safety and environment of state prisons. Arts programming now reaches all 35 state adult correctional institutions—a significant increase from the 20 institutions served by the program in Fiscal Year 2016–17. Administered by CAC, services provided span the full spectrum of art disciplines, with organizations offering instruction in theater, guitar, dance, creative writing, and Native American beadwork, among many others.

California’s Arts in Corrections program is funded by DRP. Since the program’s re-launch in 2013, CDCR’s investment has increased from \$2.5 million in the first two years to an \$8 million annual commitment. California’s Arts in Corrections program has become internationally renowned for its high-impact, innovative approach to addressing the state’s critical public safety needs and rehabilitative priorities through the arts.

Reentry Through the Arts (RTA) is a two-year pilot grant program rooted in CACs belief that the arts are a powerful vehicle for positive change in people, communities, and society. RTA was initiated in response to the Senate Budget Act of 2016 that states “The Arts Council shall develop a reentry or bridging program to facilitate and expand arts programs designed to help inmates transition from incarceration back into their communities and prevent those on probation, parole, or post-release community supervision from being incarcerated.”

For this pilot program, RTA grants will support high-quality arts programs for people who have been convicted of a criminal offense and have served time in correctional institutions. The proposed grant project must have the arts as a central component of a holistic and integrated approach to reentry that also identifies other community-based support services including, but not limited to, job skills training, job placement, mental health and wellness, drug treatment, or case management.

Fire Camps

The Office of Correctional Education provides education opportunities to inmates housed at 43 conservation camps for adults, three of which house female firefighters, and one Division of Juvenile Justice conservation camp for juvenile offenders in California. There are three designated institutions that act as base facilities: California Correctional Center, California Institution for Women, and Sierra Conservation Center.

Under the Voluntary Education Program, teachers provide literacy, high school equivalency, and college correspondence programs via distance learning. Some of these programs are eligible for milestone credits upon completion, and many provide certificates. Twenty camps offer both Alcoholics Anonymous and Narcotics Anonymous programs. Additionally, face-to-face college courses are provided by college professors from local community colleges and a number of those courses are being conducted at the Baseline, Growlersburg, Mount Bullion, and Vallecito camp sites. Inmates who are interested in participating in education programs may submit a request to the Camp Lieutenant who coordinates with the Education Principal at the respective base institution.

The camps are jointly managed by CDCR and the California Department of Forestry and Fire Protection (Cal Fire). The conservation camps can house up to 4,522 adult inmates and 80 juveniles, which make up approximately 219 firefighting crews. This program provides the state's cooperative agencies with an able-bodied, trained workforce for fire suppression and other emergencies such as floods and earthquakes. Fire crews also work on conservation projects on public lands and provide labor on local community service projects, including the clearing of firebreaks, restoration of historical structures, park maintenance, and removal of fallen trees and debris. According to the department, in an average year, offenders provide approximately three million person hours in firefighting and other emergencies and seven million person hours in community service project work, saving California taxpayers an average of more than \$100 million annually.

The fire camp programs are divided into three statewide areas: Northern programs, Southern programs, and Female programs. Some of the various programs conservation camps offer are Basic Firefighting, Fire Brigade Training, Fire Hose Repair, Basic Helicopter, CPR & First Aid, Hydro Testing, Fork Lift Operations, Radio Operation, Heavy Machine Mechanic, Small Engine Repair, Welding, Water Distribution, and Waste-Water Treatment.

Northern Programs

California Correctional Center (CCC) provides face-to-face instruction to inmates at five Northern California camps. These camps include Ishi, Parlin Fork, Antelope, Sugar Pine, and Trinity River, offering programs in Adult Basic Education (ABE), high school equivalency, and high school diploma programs. Moreover, all Northern California camps utilize the VEP program and provide instruction through correspondence. When students are ready for high school equivalency testing, they are transported to CCC, where they are placed at the camp on grounds.

Southern Programs

At Sierra Conservation Center (SCC), a resident VEP teacher serves four camps closest to SCC with direct instruction and assessment proctoring. A Southern Camp teacher was hired to target six camps closest to Ontario (Southern Camp Office). High school equivalency tests (GED and

Test Assessing Secondary Completion (TASC)) are available at all southern camps upon request. Recreational and law library services are provided to all 20 camps via the weekly bus or mail. Furthermore, Columbia College collaborated with SCC to provide a culinary and small engine repair program at SCC to be taught prior to being sent to camp, preparing inmates for jobs when they arrive.

Female Programs

California Institution for Women (CIW) offers correspondence high school equivalency and ABE instruction to inmates in the female camps. These include Rainbow, Malibu, and Puerta La Cruz. Once an inmate has completed the selected course work, she is transferred back to the institution for any required testing or certification. Along with high school equivalency courses, the camps offer college courses through Pepperdine College, Coastline Community College, University of California, Los Angeles, Cal Poly Pomona, and Loyola Marymount, and a bachelor's degree program with California Coast University. Self-help and religious groups are available to the female offenders as well.

Inmate Activity Groups

Inmate Activity Groups (IAGs), self-help programming groups, and faith-based programming groups are expanding significantly in all adult institutions, as encouraged by CDCR in 2010 as a measure to add innovative low-cost programs. There are approximately 300 individual inmate activity groups currently programming in the adult institutions. These volunteer activity groups are defined in Title 15 of the California Code of Regulations, Section 3233, as groups that “promote educational, social, cultural, and recreational interests of participating inmates.” These activity groups offer additional rehabilitative programming through an array of nonprofit volunteer-led groups providing cognitive-behavioral services, religious services, higher education, and social awareness programs, in addition to cultural and recreational programs. Activity groups offer a variety of services, including behavior management, victims’ impact, mentor programs, community reintegration, transitional housing, employment, and community connections.

Self-Help Sponsor Responsibilities

Self-help sponsors are full-time, permanent department employees who assist IAGs that are either led by volunteers who are not brown card holders (requiring custody escort on prison grounds), or groups that are led by the inmates themselves. The main roles of the sponsors are to provide supervision and to handle several administrative duties, as outlined in the Department Operations Manual (DOM), section 101030.8. Beyond the procedures described in the DOM, however, there is little to no consistency in the sponsor duty statements, which can potentially lead to disengaged sponsors and unclear standards on expectations. Based on interviews with some CRMs, the general expectation is that inmate-led groups should run a maximum of two hours a week and self-help sponsors should be allowed no more than 30 minutes of administrative time to make copies, review bylaws, or other appropriate duties consistent with

the DOM procedures. Some CRMs also suggested that there should be a set minimum number of inmates who must attend the group regularly in order for the group to remain viable. Standardizing the duty statements for self-help sponsors and requiring a minimum number of inmates in each program before sponsors are assigned may lead to more fiscally responsible practices, and allowing the larger programming groups priority in the limited funding for sponsors may result in more inmates having access to this type of rehabilitative programming opportunity.

One of the recommendations from the 2016 C-ROB report was to increase program sponsors consistent with the rapid program expansion and demand. The department replied that collaboration with Arts in Corrections and innovative grants remains a priority. Included in the 2017–18 Budget Act was a provision that allows the department to internally redirect one-time funding to support Innovative Grants for Long-Term Offenders for an additional year. Additionally, the department has continued discussions regarding the potential for other grant-like opportunities to have non-department individuals provide rehabilitative programming with a focus on sustainability following funding. Further, as CDCR moves forward with implementation of Proposition 57, the needs related to self-help sponsors for Rehabilitative Achievement Credits (RACs) will be closely monitored. The Division of Adult Institutions (DAI) has also provided direction to the institutions to maximize the utilization of self-help sponsors by implementing a roving self-help sponsor when feasible.

Innovative Programming Grants

In May 2015, the Legislature provided an innovative programming grant for developing volunteer-based programs at institutions with a low volunteer base. The department provided \$2.5 million in grants to nonprofit organizations and eligible volunteers to encourage innovative programs and volunteerism.¹³ Of the \$2.5 million, \$2 million came directly from the inmate welfare fund, which is a trust containing all of the proceeds from canteen and hobby shop sales. The remaining funds were from the Recidivism Reduction Fund created by Senate Bill 105. In March 2016, the Legislature provided the department an additional \$3 million for a second round of grants (round II).

The Fiscal Year 2016–17 budget included \$3 million in funding for additional innovative programming grants for a third cycle (round III) extending it to a three-year period. This grant period runs for three fiscal years and began on March 1, 2017, and will run through May 31, 2021. Also, in June 2017, the Legislature authorized CDCR to redirect \$5.5 million from existing available funding for one year to continue innovative programming for long term offenders. This amount was utilized to extend the round III long-term inmate programming grants for an

¹³ Appendix D provides a list of round I through IV innovative grant recipients, program name, and corresponding institution.

additional 16-month cycle, which began on July 1, 2018, and ends on October 31, 2019. The Legislature additionally authorized CDCR to utilize \$500,000 to be redirected for the purpose of implementing an innovative grant program within the Division of Juvenile Justice. Grants are to be provided to all three juvenile justice facilities to provide funding to not-for-profit organizations wishing to expand programs currently provided in either California state prisons, county juvenile facilities, or in schools and communities targeting at-risk juveniles. These grants shall go to programs demonstrating they will become self-sufficient or will be funded in the long term by donations or another source of ongoing funding. Grant scoring did not change from the prior submission.

Round IV: Reception Center Programming Grants

Funding for reception center programming grants was redirected from existing rehabilitative funds in the Division of Rehabilitative Programming budget. The funding provides \$1 million per year for three years for a total of \$3 million on a one-time basis and awarded for a three-year period. The grant period began on June 1, 2018, and ends on May 31, 2021. Grant funding was provided to eligible volunteers and not-for-profit organizations to replicate successful programs in one or more California prison reception centers. Programs are to focus on offender responsibility and enhance motivation to achieve a more successful incarceration experience.

Round V: Rehabilitative Programming Grants

The 2018–19 Budget Act includes \$4 million per year in ongoing funding for additional rehabilitative programming grants. The grants will be awarded for three-year periods, for a total of \$12 million per round, with these grants projected to begin on April 1, 2019, and end on March 31, 2022. Eligibility includes non-profit organizations that currently provide programs in an adult correctional setting, and that have demonstrated success and focus on offender responsibility and restorative justice principles.

The division of rehabilitative programs is currently developing the Round V Request for Applications (RFA) and other related documents. The division of rehabilitative programs has established meetings with the division of adult institutions administration to identify target populations and institutional needs, which will be incorporated into the RFA process. The division of rehabilitative programs is also working with the Director of the School of Criminal Justice at the University of Cincinnati to identify appropriate elements of the Correctional Program Checklist for inclusion in the application evaluation criteria in an effort to fund grant recipients that display promising practices. The division of rehabilitative programs anticipates releasing the RFA in late September 2018.

Proposition 57 — Public Safety and Rehabilitation Act of 2016

In November 2016, California passed Proposition 57, the California Parole for Non-Violent Criminals and Juvenile Court Trial Requirements Initiative, requiring the department to adopt

regulations implementing new parole and sentence credit provisions to enhance public safety, and authorizing the department to award sentence credits for rehabilitation achievement, good conduct, or educational merit. A summary for each of these credits is as follows.

Rehabilitative Achievement Credits

Hundreds of self-help and inmate activity group programs offered in California prisons are intended to promote rehabilitation or a positive change in behavior of CDCR inmates. Some examples include alcohol and substance use prevention, anger and stress management, anti-gang life skills, family reunification, faith-based programs, service dog training, arts in corrections, and best parenting practices, among many others. With a few notable exceptions, there was no credit-earning opportunity attached to completion of self-help programs before Proposition 57.

Appendix E lists the names of each rehabilitative achievement credit eligible program approved from July 28, 2017, to August 27, 2018, which includes the corresponding institutions offering each program. A total of 2,507 rehabilitative achievement credit-eligible program opportunities are available statewide, which is an increase of 456 programs from the 2017 C-ROB report.

These credit-earning programs are offered on different yards and at various times at each institution, providing hundreds of program slots per institution. As of July 2018, a total of 27,953 credits have been awarded to inmates successfully participating in rehabilitative achievement credit program in the following increments: Week 1 – 16,095, Week 2 – 7,094, Week 3 – 3,300, and Week 4 – 1,464. With the assistance of over 12,000 community volunteers statewide, the department has been able to offer diverse rehabilitative program opportunities.

The rehabilitative achievement credit approval process will be ongoing and annual reviews for eligibility will be conducted. Inmate activity group programs will be determined at the local level by review and recommendation by the respective warden. A course can only be eligible for milestone completion credits or rehabilitative achievement credits, not both. However, inmates can earn both types of credit.

Good Conduct Credits

Most inmates currently receive some form of Good Conduct Credit (GCC) if they comply with prison rules and perform duties as assigned. Effective May 1, 2017, Good Conduct Credits have been awarded as follows:

Inmates Eligible	Prior GCC Credits	GCC Changes Effective May 1, 2017
Violent offenders serving determinate sentences or indeterminate life sentences	0 to 15%	20%
Nonviolent second- and third-strikers	0 to 33.3%	33.3%
Day-for-day offenders	50%	50%
Offenders with violent offenses serving in fire camps	15%	50%
Day-for-day minimum-custody offenders Nonviolent offenders serving in fire camps	33.3% to 66.6%	66.6%

Educational Merit Credits

Starting on August 1, 2017, Educational Merit Credits will recognize the achievements of inmates who earn a high school diploma or GED, higher education degrees, and the offender mentor certification program available at several adult institutions. This one-time credit may be awarded for each level of educational achievement earned during the inmate's term. At least 50 percent of the credit toward a college-level degree must be earned from a regionally accredited institution while an inmate is in prison on his or her current term. Because it can take years to earn an educational degree, inmates who achieve that goal will be given three to six months of credit, which will be applied retroactively if the degree has been completed during the inmate's current term of incarceration.

Milestone Credits

As an offender progresses through the various rehabilitative programs, the department notes the inmate has completed certain components or "milestones," with varying amount of credit awarded upon final program completion. The milestone credit eligibility process was originally established to incentivize inmates to obtain educational and vocational experience to ultimately promote successful reintegration into communities upon release. These credits can reduce the amount of time the offender spends in prison. Following the passage of Proposition 57, several changes are in process that will enhance and expand these milestone credits.

To improve the benefits of milestone credits, effective August 1, 2017, the milestone credit-earning eligibility categories were expanded and credit-earning capacities were increased. Credit-earning categories were modified to enable credit-earning by violent offenders, indeterminate sentence offenders, and offenders serving life-term sentences. Offenders now can

earn up to 12 weeks of credits in a 12-month consecutive period; prior to August 1, 2017, offenders could earn a maximum of 6 weeks of credits in a 12-month consecutive period. Nonviolent offenders housed at fire camps became eligible for greater credit-earning capacity, up to day-for-day credit. Appendix G provides a complete milestone completion credit schedule.

Internet Protocol Television Integration: DRP TV

In order to enhance and increase access to rehabilitative programming opportunities, the department has initiated the Internet Protocol Television Integration (IPTVI) project, or DRP TV. DRP TV is a streaming network that delivers secure educational and rehabilitative television programming to inmates, with opportunities to stream in classrooms, dayrooms, and within inmates' cells depending on, among other factors, the infrastructure capabilities at each of the 35 adult institutions.

As of August 2017, the Office of Correctional Education offers three eLearning courses for inmates via blended learning at all 35 institutions. The courses include video on the DRP Televisions, DVD, or the Closed Circuit TV Systems and correspondence coursework. The courses included on specific channels include the following:

1. Employment Channel – “Career Resources” is a self-identification course that leads incarcerated students through questionnaires and interest identifiers that will help students define their primary and secondary areas of interest based on their skills and interests. Once identified, students are exposed to the different occupations related to their interests by job zones. This is to help students focus on realistic career opportunities as they are released.
2. Freedom Channel – “Preparing for Success After Prison” was developed in partnership with Michael Santos, a former inmate who found success after prison. He earned several degrees while incarcerated and developed “The Straight-A Guide” to help other inmates find success as well. Mr. Santos has also included recordings of his podcast, where he interviews former inmates who also were able to lead productive lives after incarceration. The Office of Correctional Education hopes that inmates will prefer learning about this topic from former inmates who have shared similar experiences.
3. Wellness Channel – “The Human Condition” responds to the growing public demand for information about health and health care issues. It addresses their pointed questions about health care and insurance costs and practices, and it gives learners practical tools for protecting and maintaining their health, and tips for controlling the cost of care.

As of June 30, 2018, there were nearly 2,200 offenders enrolled in these voluntary eLearning courses delivered via DRP-TV and approximately 600 milestones have been awarded related to DRP-TV content at CDCR institutions. Although DRP-TV continues to expand into different areas, all institutions now have rehabilitative television access in classrooms, dayrooms, and

cells, if available. DRP continues to trouble-shoot CCTV issues and to provide expansion equipment to reach more end-points for offenders. Anywhere DRP-TV exists, offenders are co-enrolled with a VEP instructor, and all DRP-TV classes developed and implemented would be available. DRP will continue to develop and provide DRP-TV and eLearning content throughout Fiscal Year 2018–19. The use of DRP TV should continue to improve dissemination of important information to the inmate population and is expected to enhance access to rehabilitative programming. The Board commends the department for these efforts and will continue to monitor and report on the progress.

Measure Progress: Ensure Program Accountability

The department's goal is to ensure that offenders identified as having moderate to high risk and needs receive evidence-based programming consistent with their criminogenic needs prior to release.

California Identification Card Project

The California Identification Card program (CAL-ID) was implemented to assist eligible offenders in obtaining state-issued identification (ID) cards to satisfy federal requirements for employment documentation. On July 1, 2015, the department entered into an interagency agreement with the Department of Motor Vehicles (DMV) in order to fulfill this task. The agreement expanded the CAL-ID Program to all 35 CDCR institutions. The department is working with the DMV so a DMV-eligible camera can be provided inside institutions to use in obtaining photographs of inmates who have been incarcerated for more than ten years. This would potentially increase the number of eligible participants for the CAL-ID program.

The divisions of rehabilitative programs implemented the Automated Reentry Management System (ARMS) to provide real-time data to inform program quality reviews to department staff and stakeholders. These ARMS reports provide operational information that aims to give correctional counselors the necessary information to provide timely reentry identification services, including CAL-ID. The division of rehabilitative programs tracks the status of California ID card applications and ID cards. If an inmate is transferred to another institution prior to receiving his or her ID card, department staff will update the inmate's CAL ID status in the ARMS and inform staff at the receiving institution of the status. The division of rehabilitative programs staff at the transferring and receiving institutions work in collaboration to ensure the ID card is appropriately handled and given to the inmate upon release.

A memorandum was issued in May 2018 to identify department procedures for forwarding the ID cards by institutional staff to parole units. If an inmate has been released to parole prior to his or her ID card being received by the institution, a division of rehabilitative staff Parole Services Associate (PSA) will forward the ID card to the respective parole unit. Upon receipt of the ID card, the parole office staff confirms with the institution its receipt of the card and issuance to the

inmate. This allows department staff to ensure that the ID cards are being delivered to paroled individuals.

For the period of July 1, 2017, to June 30, 2018, of the total number of offenders released, there were 11,924 applications that were sent to the DMV for processing (indicating that both the offender was interested in and eligible to receive a California ID), and for this group of offenders, the DMV approved and issued 9,525. Of those issued, 8,057 inmates were released with an ID (85 percent of approved applications); this is an increase of 2,290 inmates and a 9 percent increase in approved applications. These figures may fluctuate slightly as the division of rehabilitative programs continues to audit year-end reports related to the issuance of California IDs.

Pre-Parole Process Benefits Program

The Division of Adult Parole Operations Transitional Case Management Program (TCMP) provides pre-release benefit assistance to all eligible inmates releasing to Parole or Post Release Community Supervision (PRCS) within 120 days of release from prison. TCMP benefit workers provide Medi-Cal, Social Security Administration (SSA), and Veterans Administration (VA) benefit application assistance.

Assigned Benefit Workers

Benefit workers are assigned to all CDCR adult institutions, Modified Community Correctional Facilities (MCCF), and CDCR Fire Camps. TCMP benefit workers also provide services for any referral received from Atascadero, Coalinga, and Patton State Hospital. Benefit workers work a full-time schedule at their assigned institutions. Their full-time duties are to provide assistance with the benefit application process. The University of California, San Diego (UCSD), currently has 66 benefit workers and is in the process of hiring four additional benefit workers for California Correctional Center, North Kern State Prison, Sierra Conservation Center, and California Substance Abuse Treatment Facility and State Prison, Corcoran, respectively. The tables on the following page indicate TCMP staffing by facility.

Institution	Benefit Staff	Institution	Benefit Staff	Institution	Benefit Staff
ASP	2	COR	1	PBSP	1
CAC	1	CRC	2	PVSP	2
CAL	1	CTF	2	RJD	2
CCC	1	CVSP	1	SAC	1

CHCF	3	ISP	1	SQ	2
CIM	4	KVSP	1	SVSP	2
CIW	2	LAC	1	VSP	2
CMC	2	MCSP	2	WSP	3
CMF	2	NKSP	1	Southern Fire Camps	1
Community Benefit Worker	1	Northern Fire Camps	1	Strike Team	4

Benefit Outcomes and TCMP Dispositions

The Division of Adult Parole Operations continues to strengthen its relationship with all counties through its continued participation in quarterly meetings with Department of Health Care Services (DHCS) and counties to address any specific issues the counties may be experiencing in facilitating the application review process. CDCR continues to maintain its data sharing agreement with the DHCS. This agreement allows both departments to continue tracking and exchanging the Medi-Cal application status for inmates serviced through the TCMP. This data sharing has assisted CDCR to more accurately report information related to the high number of “pending” benefit application outcomes. As a result, the pending benefit application outcome numbers have been significantly reduced. CDCR is dependent upon the 58 counties to assist in completing the benefit application process timely and returning the approval or denial documentation to each prison prior to the inmate’s release. The Division of Adult Parole Operations is also working with counties to develop processes for sharing benefit application status information for inmates releasing to Post Release Community Supervision.

As shown in Table 18 on the next page, the number of benefit applications, as reported by the Division of Adult Parole Operations Transitional Case Management Program, increased by 19.3 percent for the Social Security Administration/Supplemental Security Income (SSA/SSI), increased by 11.0 percent for Medi-Cal, and decreased by 4.3 percent for the federal Department of Veterans Affairs (VA), in relation to the past fiscal year.

Table 18: Benefit Application Submissions During Fiscal Years 2016–17 and 2017–18

Benefit Type	Total Submissions FY 2016–17	Total Submissions FY 2017–18	Change in Total Submissions	Change as a % of Total Submissions
SSA/SSI	3,611	4,308	+697	+19.3%
Medi-Cal	27,000	29,975	+2,975	+11.0%
VA	399	382	-17	-4.3%

The Board is interested in obtaining and reviewing the benefit applications outcomes – the actual number of benefit approvals for released offenders from the applications submitted for each benefit type listed above in Table 18 – SSA/SSI, Medi-Cal, and the VA. For instance, unaudited figures from Fiscal Year 2016–17, included in the September 2017 C-ROB report, showed an approval rate of only 31 percent for SSA/SSI and 17 percent for VA. The reasons for the significant decreases in approved VA applications and low approval rates for SSA/SSI application benefit outcomes was unknown. To obtain this data moving forward, there must be an exchange of information and partnerships established between the department, the Social Security Administration, and Department of Veteran Affairs. The goal in obtaining this data is to assist in identifying strategies to better link released offenders to the various services available.

CDCR is currently screening nearly 100 percent of inmates for benefit eligibility and is providing benefit assistance services to 79.0 percent of the inmate population prior to release, as shown on the next page in Table 19. Additionally, as Table 19 shows, the Transitional Case Management Program identified 4.6 percent of the inmate population as having access to other insurance, 4.8 percent as ineligible, and 2.9 percent refused transitional services, for a total of 91.3 percent.

Reintegrate

Community Programs for Parolees

The *Blueprint* identified capacity benchmarks by type that the department intended to meet in order to accommodate parolees' needs. The following table shows the increase in capacity for each community program type shown in the *Blueprint* as reported by the department.

Table 23: Community Programs for Parolees Available During June 2017 and June 2018

Post-Release: Adult Rehabilitative Programs	June 2017 Annual Capacity	June 2018 Annual Capacity
Education Programs	6,999	7,841
Employment Programs	5,940	6,162
Substance Abuse Treatment	8,926	9,975
Total Annual Capacity	21,865	23,978

Community and reentry programs expanded education to parolees by increasing the number of day reporting centers (DRCs) across the state, thereby increasing job readiness and employment skills services. There are 24 computer literacy learning centers (CLLCs) statewide, which operate within 15 parole offices statewide, 8 day reporting centers, and a residential multi-service center. These centers provide education services to improve literacy and life skills. There are a combined total of 25 day reporting centers (DRCs) and community-based coalitions (CBCs) operating statewide. Parolees enrolled in the DRCs and the CBCs receive programming in both education and employment. In addition to the DRCs and CBCs, there are eight parolee service centers (PSCs) providing employment programming. The number of employment slots decreased slightly due to a loss in the number of PSC facilities. Substance use programs include both treatment and education; specifically, there are 5,206 substance use treatment slots and 3,720 substance use education slots available statewide. The increase in substance use treatment programming is due to the six Male Community Reentry Programs (MCRPs) statewide.

Additionally, the department is in the process of developing a tracking mechanism to identify the percentages of first-year parolees who have participated in community-based programming based on their assessed needs. In the interim, the department has provided data identifying the number of parolees released who were in the target population and participated in a rehabilitative program consistent with their employment, education, or substance use needs within their first year of release. In order to meet the parolees’ expanding population, the substance use disorder treatment program must equally expand with additional new contracts.

Table 24: Total Number of Offenders Who Completed at Least One Year of Parole Supervision, with a High/Moderate CSRA Score, as of June 30, 2018

Parolees-Type of Criminogenic Risk and Need	Total Number of Offenders Released
Parolees released with a moderate-to-high CSRA score	10,131
Parolees released with a moderate-to-high CSRA score and a reentry COMPAS	9,772
Parolees released with a moderate-to-high CSRA score and at least one medium-to-high COMPAS reentry need	8,865

In Fiscal Year 2017–18, the department identified 10,131 offenders released with a moderate-to-high risk according to the California Static Risk Assessment (CSRA), and at least one medium-to-high need, as identified by the Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) Reentry assessment tool.

The following table provided by CDCR identifies data from July 1, 2017 to June 30, 2018, for parolees who participated in a rehabilitative program consistent with their employment, education, or substance use needs.

Table 25: Total Number of Offenders Who Completed at Least One Year of Parole Supervision, with a High/Moderate CSRA Score, as of June 30, 2018

Individual Need (Offenders may be in multiple categories)	Total Number of Offenders By Need	Parolees with a Risk and Need Who Participated in Programming Consistent with Their Needs	Parolees with a Need Who Did <u>Not</u> Participate in Programming Consistent with Their Needs
Employment Need	5,824	3,324	2,500
Education Need	5,075	2,802	2,273
Substance Abuse Need	5,215	3,091	2,124
All Other Programs	8,865	770	8,095
Total percentage of offenders with at least one need who participated in at least one program consistent with their risk and need.			59.6%
Total percentage of offenders with a risk and need who participated in a program			70.0%

As mentioned previously, the department is in the process of completing the SOMS case plan module, which is an individual customized service plan for each offender that CDCR staff can access. The printouts from the system will allow MCRPs, probation, and parole offices to have better access to information regarding inmates while they are within any of the adult institutions, allowing staff to better cater to specific inmate risks and needs. This new development is expected to be a large step toward better reintegrating offenders into alternative custody and eventually the community. In order to better enhance the benefits of this program, consideration should be given to sharing the individualized case plans with an entity such as the Board of State and Community Corrections (BSCC) for dissemination to county public safety entities, which play a key role in the successful reintegration of offenders into their communities.

Follow-Up

Program outcomes are closely monitored to determine the effectiveness of the department’s rehabilitation programs. Key performance indicators include program enrollment, attendance, and completion rates, as well as regression, which the department currently has available only for substance use disorder programs but anticipates eventually having available for education and other programs in future reporting periods. Key performance indicators are reviewed monthly by executive staff, and results are shared with wardens and institutional program staff. Quarterly meetings are conducted with institution staff to discuss performance in all of these areas. Significant improvements have been made as a result of the focus on performance measures, especially in college course availability and degree completions.

The Board would like to see information gathered before an inmate enters a program, and, at minimum, each correctional program should collect individual data on each correctional client referred to a program. The data collected should include:

- Pre- and post-program risk assessment scores that include dynamic risk;
- demographic information including age, ethnicity, and gender;
- educational level;
- prior criminal history;
- prior substance use history;
- prior treatment programs;
- times/hours attended program;
- absences (excused or not);
- start date/ date of graduation from the program; and
- program completion or reason for dropout.

The Board would like to reiterate the importance of measuring program outcomes. These outcomes should include institutional behavior, recidivism, and other measurable goals such as current housing situation, employment, income, transportation, prosocial support, substance use, and educational attainment.

CONCLUSION

The California Rehabilitation Oversight Board's (C-ROB) 19th report includes its rehabilitation monitoring efforts with the ongoing fieldwork performed by the Office of the Inspector General's (OIG's) *Blueprint* monitoring team. C-ROB staff and the *Blueprint* monitoring team visited all 35 adult institutions from December 2017 through February 2018, and again from June 2018 through August 2018.

Institution site visits this reporting period revealed increases in volunteer programs, credit-earning opportunities, and the expansion of face-to-face college programs in all 35 institutions. The Board commends the department for increasing its rehabilitative program capacity. Innovative grant funding for three-year support has expanded volunteer-led rehabilitative programming, and the department has provided additional support staff to assist with programming coordination.

The number and percentage of parolees completing reentry COMPAS assessments increased by 25 percent, with 95 percent of the parole population (41,302 of 43,688) completing it during Fiscal Year 2017–18, which is another positive step by the department.

However, the number of inmates initially enrolled in substance use disorder treatment and actually completing the program has remained just below 50 percent for the past two fiscal years (49.5 percent in Fiscal Year 2017–18). Also, the aftercare substance use disorder treatment completion rate for parolees remained constant at only 29 percent for the past two fiscal years. Both of these figures indicate barriers to effective reentry efforts and recidivism reduction strategies.

Program exits occur due to transfers, refusal to attend the program once assigned, behavioral issues necessitating removal from treatment, or other issues preventing an inmate from attending and completing the treatment program. The Board underscores the importance of an effective substance use disorder treatment program both in-prison and community aftercare, and is hopeful the department will take measures to increase the number of completions in both areas.

Finally, as a result of program review, data analysis, and completed site visits, the Board presents the department with two formal recommendations to foster process improvements in prioritizing its rehabilitative programming and tracking of its credit earning programs and establishing an exchange of information between state, federal, and county programs in preparing offenders for reentry, ensuring they have access to available benefit assistance.

BOARD RECOMMENDATIONS

The following two recommendations are presented to the department for this reporting period:

1. The Board recommends the department's Division of Rehabilitative Programs continue to work with the Division of Adult Institutions to strengthen and maximize inmate rehabilitative programming and credit earning potential. This would involve prioritizing enrollment of its highest-risk and highest-need inmates in evidence-based rehabilitation programs. Secondly, it would ensure that an inmate is able to take full advantage of available credits for rehabilitative and educational achievements to advance his or her release date or initial parole hearing date. The department should determine if its Strategic Offender Management System (SOMS) needs process improvements to improve tracking in key areas, such as assigning inmates to available milestone and rehabilitative achievement credit programs (check for inmate scheduling conflicts) and tracking of inmate program waitlists that are currently prepared at the local institutional level.
2. The Board recommends the department, with the assistance of C-ROB members, determine ways to allow for an exchange of information between federal, state, and county programs to ensure released offenders have access to (and may be approved for) available benefits. This exchange may include a pilot or memorandum of understanding involving partnerships between the Social Security Administration (SSA)/Supplemental Security Income (SSI), the US Department of Veterans Affairs (VA), county social services offices, county probation departments, and the Division of Adult Parole Operations. The goal is to identify strategies to better link those formerly incarcerated to the various services available to help them become stable and self-sufficient as they reintegrate into the community.

PRIOR BOARD RECOMMENDATIONS AND THE DEPARTMENT'S PROGRESS

Recommendations from 2017

1. The Board recommends the department issue a training or memorandum clarifying the use of split-shift programming for milestone, educational merit, or rehabilitative achievement credit-eligible programs, allowing eligible inmates to attend all credit-earning rehabilitative programs with a flexible work schedule.

Department Response

The Office of Correctional Education has confirmed that institutions are authorized to assign inmates to part-time work and part-time education assignments in many work areas and in accordance with department policy, institutional need, and safety and security concerns. The Division of Rehabilitative Programs has contacted the Division of Adult Institutions to inquire about the feasibility of this alternative statewide, the limitations and the requirements, and has a meeting scheduled to discuss this option. Although the Division of Rehabilitative Programs and the Division of Adult Institutions have had a number of discussions with institutions, informally, to create flexibility in the half-time assignment process, the Division of Rehabilitative Programs will continue to formalize discussions on the necessity of a formal memorandum.

2. The Board recommends the department take the next steps to implement a data collection plan to document the effectiveness of current and future programming. At this time, the Strategic Offender Management System (SOMS) has data that includes the following for each correctional client referred to at least one program:
 - Pre- and post-program risk assessment scores
 - Demographic information (age, ethnicity, and gender)
 - Education level
 - Criminal history
 - Substance use history
 - Prior treatment programs
 - Times/hours attended program
 - Absences (excused or not)
 - Program start and graduation date, and
 - Program completion or reason for dropout

The Board would like to reiterate the importance of measuring program implementation and outcomes, and to the extent possible, longer-term outcomes after offenders have been released to the community. We would like to see the department work toward cleaning the SOMS data for program measures, such as institutional behavior, educational

attainment, and individual offender progress in rehabilitation programming. Outcome measures, such as recidivism and other measurable goals, such as housing after release, employment, income, transportation, pro-social support, substance use, and educational attainment, should be collected for parolees after they parole to their community.

Department Response

Over the course of Fiscal Year 2017–18, the department’s Division of Rehabilitative Programs, has worked collaboratively with other divisions to establish universal business and counting rules for the division’s programmatic data. These rules include the key data points identified in this C-ROB recommendation, along with all other relevant data points needed to effectively measure offender and program-based rehabilitative efforts. In addition, the Division of Rehabilitative Programs has worked with the University of California, Irvine, to develop new in-prison and community-based Program Accountability and Fidelity based reports that will aid in fulfilling this C-ROB recommendation of developing measurable program implementation and outcomes.

As of August 1, 2018, the in-prison Program Accountability and Fidelity report has been completed and in use, and the in-prison Fidelity Tool checklist and subsequent report templates have been established and are being finalized for final reliability and validity. Community Program Accountability and Fidelity reports are on target for completion in early 2019. Upon completion of these efforts, the department plan to explore evaluation opportunities with independent third-party entities to evaluate its current programming. Additional information will be forthcoming as new developments in this area occur.

In the interim, the Division of Rehabilitative Programs continues to work collaboratively with internal and external stakeholders to strengthen outcomes, specifically with employment and ultimately with income/wage-based data. Over the last year, the department has integrated into the California Workforce Development Board’s existing strategic plan the development of linkages and increased employment opportunities for partnering departments included in the plan. The department’s “Prison to Employment” efforts are being driven through inclusion into the strategic plan and data sharing linkages are in process. The department expects, through this collaborative effort, increases in offender employment opportunities and ongoing, gainful employment by offenders.

Other outcomes, such as substance use disorder treatment activity and educational attainment data, are recorded in the Automated Reentry Management System and measurable in future-outcome-based evaluations. Finally, the Division of Rehabilitative Programs is continuing its collaborative work with the Enterprise Information Services (EIS)/Computerized Statistics (COMPSTAT) in cleaning key Strategic Offender Management System (SOMS) based data to ensure data captured is valid, detailed, and appropriately entered. SOMS cleaning efforts continue and are part of an ongoing process improvement of the department’s official system of record for institutional programs and services. Once counting rules have been finalized (anticipated for the 2018 calendar year), the Division of Rehabilitative Programs will continue its

collaboration with EIS/COMPSTAT on modifications necessary to have system validations and staff training on inputs and data extracts throughout Fiscal Year 2018–19.

Recommendations from 2016

1. The Board recommends the department consider strategies to increase the number of program sponsors and the feasibility of contracting with non-department individuals to maximize the rehabilitative programming access and maximize budget allotments.

Department Response

The Division of Rehabilitative Programs continues to ensure that collaboration with Arts-in-Corrections and Innovative Grants remain a priority. Included in the Fiscal Year 2017–18 Budget Act was legislative language that allows the Division of Rehabilitative Programs to internally redirect one-time funding to support Innovative Grants for Long-Term Offenders for an additional year. Additionally, the Division of Rehabilitative Programs has continued discussions regarding the potential for other grant-like opportunities to have non-department individuals provide rehabilitative programming with a focus on sustainability following funding. Further, as the department moves forward with implementation of Proposition 57, needs related to self-help sponsors for Rehabilitative Achievement Credits will be closely monitored. The Division of Adult Institutions has also provided direction to the institutions to maximize the utilization of self-help sponsors by implementing a roving self-help sponsor when feasible.

2. The Board recommends the department review the milestone criteria for both TABE testing and CASAS testing to remove the negative incentive for inmates to test low and receive placement in classes inconsistent with their actual academic need.

Department Response

In response to this recommendation, the Office of Correctional Education removed the first six CASAS milestone completion credits from CASAS literacy and math testing for the department's adult institutions. The intent, as recommended by C-ROB, was to mitigate incentive for offenders to purposefully test low and earn milestone completion credits. Inmates are placed in classes based on the most recent TABE Reading Test score. Upon being assigned to education, additional assessments are completed and inmates are reassigned, based on written teacher request and upon administrator approval, to ensure that placement into programs is consistent with actual academic needs and based on standardized testing results.

3. The Board recommends the department reconsider its current close-custody policies limiting access to rehabilitative programming.

Department Response:

The department concurs with this recommendation. On February 20, 2017, the department implemented new classification regulations, which revised existing close-custody policies. The separate Close A and Close B Custody designations have been replaced with a single level of Close Custody. Close-custody inmates may be assigned to rehabilitative programs and jobs beyond the work change area within the facility security perimeter, providing them access to additional programming opportunities. All close-custody inmates shall be counted at noon each day. Additionally, some of the minimum time requirements for close custody have been reduced.

APPENDIX G—MILESTONE COMPLETION CREDIT SCHEDULE (MCCS)

MCCS: Academic Milestones

MILESTONE COMPLETION CREDIT SCHEDULE – Schedule 1 Division of Rehabilitative Programs (DRP)

Incorporated by reference into CCR Title 15 section 3043.3

Academic Milestone Descriptions and Codes			
Adult Basic Education (ABE) I			
Reading	Educational Function Level (Test Range 150-160)	EFL0R01	2 weeks
Reading	Educational Function Level (Test Range 161-170)	EFL0R02	2 weeks
Reading	Educational Function Level (Test Range 171-180)	EFL0R03	2 weeks
Reading	Educational Function Level (Test Range 181-190)	EFL0R04	2 weeks
Reading	Educational Function Level (Test Range 191-200)	EFL0R05	2 weeks
Math	Educational Function Level (Test Range 150-160)	EFL0M01	2 weeks
Math	Educational Function Level (Test Range 161-170)	EFL0M02	2 weeks
Math	Educational Function Level (Test Range 171-180)	EFL0M03	2 weeks
Math	Educational Function Level (Test Range 181-190)	EFL0M04	2 weeks
Math	Educational Function Level (Test Range 191-200)	EFL0M05	2 weeks
ABE II			
Reading	Educational Function Level (Test Range 201-210)	EFL0R06	2 weeks
Reading	Educational Function Level (Test Range 211-220)	EFL0R07	2 weeks
Math	Educational Function Level (Test Range 201-210)	EFL0M06	2 weeks
Math	Educational Function Level (Test Range 211-220)	EFL0M07	2 weeks
Adult Secondary Education (ASE)			
Reading	Educational Function Level (Test Range 221-235)	EFL0R08	2 weeks
Reading	Educational Function Level (Test Range 236-240)	EFL0R09	2 weeks
Reading	Educational Function Level (Test Range 241-245)	EFL0R10	2 weeks
Reading	Educational Function Level (Test Range 246 and above)	EFL0R11	2 weeks
Math	Educational Function Level (Test Range 221-235)	EFL0M08	2 weeks
Math	Educational Function Level (Test Range 236-240)	EFL0M09	2 weeks
Math	Educational Function Level (Test Range 241-245)	EFL0M10	2 weeks
Math	Educational Function Level (Test Range 246 and above)	EFL0M11	2 weeks
High School Equivalency (HSE)*			
HSE	Language Arts, Reading and Writing Subtest (Electronic GED only)	HSE0001	2 week
HSE	Language Arts Reading Subtest (Paper based only – HiSET or TASC) Cannot be issued in conjunction with HSE0001	HSE0005	1 week
HSE	Writing Subtest (Paper based only – HiSET or TASC) Cannot be issued in conjunction with HSE0001	HSE0006	1 week
HSE	Social Studies subtest	HSE0002	1 week
HSE	Mathematics subtest	HSE0003	1 week
HSE	Science subtest	HSE0004	1 week
High School Diploma (HSD)			
HS	English 1 st course	HS10101	3 weeks
HS	English 2 nd course	HS10111	3 weeks
HS	English 3 rd course	HS10121	3 weeks
HS	Mathematics	HS10301	3 weeks
HS	Algebra I	HS10211	3 weeks
HS	General/ Life Science	HS10403	3 weeks
HS	Earth / Physical Science	HS10404	3 weeks
HS	U.S. History or Geography	HS10503	3 weeks
HS	World History or Geography/Culture	HS10504	3 weeks
HS	American Government and Economics	HS10601	3 weeks
HS	Visual and Performing Arts /Fine Arts	HS10801	3 weeks
HS	Elective completed	HS11220	3 weeks *R1
College			
College	Each 3 semester unit course or 4-5 quarter unit course completed	COL0110	3 weeks *R1

*R1 = Repeatable during same or new term for different classes/degrees

TPC Training System	Blueprint Reading for Welders	TPC4160	3 weeks
TPC Training System	Welding Principles	TPC4170	3 weeks
TPC Training System	Oxyfuel Operations	TPC4180	3 weeks
TPC Training System	Arc Welding Operations	TPC4190	3 weeks
TPC Training System	Cleaning Chemicals	TPC4510	3 weeks
TPC Training System	Floors and Floor Care Equipment	TPC4520	3 weeks
TPC Training System	Maintaining Floors and Other Surfaces	TPC4530	3 weeks
TPC Training System	Rest Room Care	TPC4540	3 weeks
TPC Training System	Carpet and Upholstery Care	TPC4550	3 weeks
Welding			
Am. Welding Society	MIG – GMAW-1	PWEL005	3 weeks
Am. Welding Society	TIG – GTAW-1	PWEL006	3 weeks
Am. Welding Society	TIG – GTAW-2	PWEL007	3 weeks
Am. Welding Society	TIG – GTAW-3	PWEL008	3 weeks

CBU: Contract Beds Unit Milestones

Milestone Completion Credit Schedule			
Career Technical Education			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Career Technical Education Milestone Descriptions and Codes.			
Computer Repair			
COMPTIA	Core	V3003C0	3 weeks
COMPTIA	Level I	V3003L3	3 weeks
Graphic Arts			
Graphic Design	Graphic Design Core	V07C000	5 weeks
Graphic Design	Graphic Design Level I	V07L000	5 weeks
Horticulture/Landscaping			
Horticulture/Landscaping	Core	V3004C0	5 weeks

Academic Milestone Descriptions and Codes			
Academic Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Academic Milestone Descriptions and Codes.			

General Milestone Descriptions and Codes			
General Programs			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			
Rehabilitative Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) General Milestone Descriptions and Codes.			
Substance Abuse Transitions Pre-Release Program			
CSAP (CCF)	Course Completion	S020101	8 weeks
The Urban Ministry Institute (TUMI)			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			

CBU: Contract Beds Unit Milestones (Continued)

Academic Milestones Credit Earning Schedule			
Academic Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Academic Milestone Descriptions and Codes.			
English as a Second Language (ESL) Programs			
ESL	Beginning ESL I	COCESL5	3 weeks
ESL	Beginning ESL II	COCESL6	3 weeks
ESL	Intermediate ESL	COCESL7	3 weeks
ESL	Advanced ESL	COCESL8	3 weeks
Adult Education in Spanish Programs			
INEA	Primaria	COCINE4	3 weeks
INEA	Secundaria	COCINE2	3 weeks
COBACH	Colegio de Bachilleres	COCINE3	3 weeks

Cognitive Behavior Milestones Credit Earning Schedule			
General Programs			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			
Rehabilitative Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) General Milestone Descriptions and Codes.			
Criminal Thinking	Thinking For A Change (T4C)	COCT4C2	3 weeks
Anger Management	Understand and Reducing Anger Feelings (TCU)	COCTCU2	3 weeks
Criminal Thinking	Unlock Your Thinking, Open Your Mind	COCUYT2	3 weeks
COCF Substance Abuse Program			
RDAP	Level I Course Completion	COCRD01	3 weeks *R6
RDAP	Level II Course Completion	COCRD02	3 weeks *R6
RDAP	Level III Course Completion	COCRD03	3 weeks *R6
RDAP	Level IV Course Completion	COCRD04	3 weeks *R6
RDAP	Level V Course Completion	COCRD05	3 weeks *R6
RDAP	Level VI Course Completion	COCRD06	3 weeks *R6

*R6 = Repeatable during new term Substance Abuse Programs

CBU: Contract Beds Unit Milestones (Continued)

Career Technical Education Milestones Credit Earning Schedule			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Career Technical Education Milestone Descriptions and Codes			
Gardening			
Master Gardener	Level I	COCGAR4	5 weeks
Horticulture/Landscaping			
Horticulture/Landscaping	Core	V3004C0	5 weeks
KY Workplace Essentials			
KY Workpl. Essentials	Business Reading	COCWPE5	1 week
KY Workpl. Essentials	Business Math	COCWPE6	1 week
KY Workpl. Essentials	Business Communication and Writing	COCWPE7	1 week
KY Workpl. Essentials	Employment Readiness	COCWPE8	1 week
General Milestones Credit Earning Schedule			
The Urban Ministry Institute (TUMI)			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) Milestone Completion Credit Schedule.
