C-ROB REPORT

CALIFORNIA REHABILITATION OVERSIGHT BOARD

Chairperson Roy W. Wesley, Inspector General

Ralph Diaz, Secretary, California Department of Corrections and Rehabilitation

Carolyn Zachry, Administrator, Adult Education Office, Career and College Transition Division
(Designee for Tony Thurmond, State Superintendent of Public Instruction, California Department of Education)

Raul Arambula, MA, Intersegmental Support (Designee for Eloy Ortiz Oakley, Chancellor, California Community Colleges)

Wendy Still, Chief Probation Officer, Alameda County

Brenda Grealish, Assistant Deputy Director, Mental Health and Substance Use Disorder Services
(Designee for Jennifer Kent, Director, California Department of Health Care Services)

Stephanie Clendenin, Director, California Department of State Hospitals

Susan Turner, Professor, Department of Criminology, Law and Society, University of California, Irvine
(Appointee of the President of the University of California)

Alexa Sardina, Assistant Professor, California State University, Division of Criminal Justice

Darren Thompson, Sheriff, County of San Benito
(Appointee of the Governor)

William Arroyo, M.D., Mental Health Representative
(Appointee of the Speaker of the Assembly)

Contributors: Ashley Barton-Schiele, SSA; Kristen Duarte, AGPA; Nico Gilbert-Igelsrud, AGPA; and Brady Livingston, AGPA, Office of the Inspector General

(This page left blank for reproduction purposes.)

INTRODUCTION

Approximately 100,000 people are incarcerated in prisons within the California Department of Corrections and Rehabilitation (the department) as of the publishing of this report in September 2020. Of these individuals, at least 90,000 will likely eventually be released back into the communities of this State.¹ Just in the few months recent to this report's publication, in response to the novel coronavirus disease known as COVID-19, the department planned to release a record 8,000 people from prison up to a year before their regular parole dates.² This dramatic action served to provoke public interest in the fundamental purposes of the department itself: to *correct*, and to *rehabilitate*. It is vital for the long-term success of the State's criminal justice system that Californians are secure in the belief that an individual leaving prison is in a position to be a productive, law-abiding member of society. The California Rehabilitation Oversight Board (C-ROB, or the Board) was created to provide guidance and recommendations to the department in this critical area. The Inspector General sits as chairperson to the Board and provides staff to conduct reviews of all 35 departmental adult institutions.

This is the Board's 21st report. For the past several years, the C-ROB report addressed data gleaned from the combined fieldwork performed by the OIG in assessing rehabilitative efforts in the *Blueprint*³ with the similar task performed by C-ROB staff during annual site visits to the institutions. In contrast, this report does not include *Blueprint* data. The *Blueprint* addresses staffing and enrollment of rehabilitation programming, but does not evaluate the content or the completion rate of those programs. The Board addresses these issues in this report.

BACKGROUND

The California Rehabilitation Oversight Board was established by Assembly Bill 900, the Public Safety and Offender Rehabilitation Services Act of 2007 (the Act) and held its first meeting on June 19, 2007. The Act was intended to address the serious problem of overcrowding in California's prisons and to improve rehabilitative outcomes among California's incarcerated people and parolees.

³ California Department of Corrections and Rehabilitation, *The Future of California Corrections: A Blueprint to Save Billions of Dollars, End Federal Court Oversight, and Improve the Prison System*, 2012.

C-ROB is a multidisciplinary public board with members from various State and local entities. California Penal Code section 6141 mandates C-ROB to examine and report on rehabilitative programming provided to incarcerated people and parolees by the the department. The Board examines and reports on the implementation of an effective treatment model throughout the department, including evidence-based rehabilitative programming. According to statute, C-ROB must submit an annual report on September 15 to the Governor and the Legislature. This report must minimally include findings on the following:

- Effectiveness of treatment efforts;
- Rehabilitation needs of incarcerated individuals;
- Gaps in rehabilitation services; and
- Levels of incarcerated individuals' participation and success.

The Board is also required to make recommendations to the Governor and the Legislature with respect to modifications, additions, and eliminations of rehabilitation and treatment programs by the department and, in doing its work, use the findings and recommendations published by the Expert Panel on Adult Offender and Recidivism Reduction Programs. The Expert Panel identified eight evidence-based principles and practices, collectively called the California Logic Model. This model shows what effective rehabilitation programming would look like if California implemented the Expert Panel's recommendations. The eight basic components of the California Logic Model are as follows:

- **Assess high risk:** Target incarcerated individuals who pose the highest risk to reoffend.
- **Assess needs:** Identify incarcerated individuals' criminogenic needs and dynamic risk factors.
- **Develop behavior management plans:** Utilize assessment results to develop an individualized case plan.
- **Deliver programs:** Deliver cognitive behavioral programs offering varying levels of duration and intensity.⁴
- **Measure progress:** Periodically evaluate progress, update treatment plans, measure treatment gains, and determine appropriateness for program completion.

⁴ Assembly Bill 900 (Solorio), Chapter 7, Statutes 2007. California Rehabilitation Oversight Board, page 6, September 13, 2019, State of California.

- **Prepare for reentry:** Develop a formal reentry plan prior to program completion to ensure a continuum of care.
- **Reintegrate:** Provide aftercare through collaboration with community providers.
- **Follow up:** Track incarcerated individuals and collect outcome data.

National research has produced evidence that every \$1 invested in rehabilitative programming for incarcerated individuals reduces incarceration costs by \$4 to \$5 during the first three years of postrelease. The Expert Panel produced the evidence that supported the cost-effectiveness of rehabilitative programming, and the C-ROB report details the framework and implementation status of the California Logic Model. The two overarching recommendations of the Expert Panel Report are to reduce overcrowding in the department's institutions and parole offices and to expand the department's system of positive reinforcements for incarcerated individuals who successfully complete their rehabilitation program requirements, comply with institutional rules in prison, and fulfill their parole obligations in the community.

Preparing This Report and Disclaimer

The scope of this report is based entirely on information gleaned during C-ROB visits to the institutions in February, March, July, and August 2020, and requested in writing from the department. The department's data reflect information concerning incarcerated individuals from July 2019 through June 2020, and we collected these data in July 2020.

This information has not been audited by the Board. The Board does not make any representation to the accuracy and materiality of the data received from the department. This report is not an audit, and there is no representation that it was subject to government-auditing standards.

C-ROB MEETINGS

During this reporting period, C-ROB did not hold any Board meetings due to COVID-19.

CALIFORNIA LOGIC MODEL IMPLEMENTATION PROGRESS

The department’s goal, as addressed by the California Logic Model, is to ensure that incarcerated people identified as having moderate to high risk and needs receive evidence-based programming consistent with their criminogenic needs prior to release. This section describes the progress the department made implementing the eight components of the California Logic Model during this reporting period.

Assess High Risk

The department uses the results of the California Static Risk Assessment (CSRA) tool to assess an incarcerated person’s risk to reoffend. The CSRA uses an incarcerated person’s past criminal history and characteristics to predict the risk to reoffend. Data provided by the department indicate that as of July 1, 2020, 99 percent of both incarcerated people and parolees have been tested and have CSRA scores.

Table 1. Risk Assessments (Fiscal Year 2019–20)

Total Institutional Population	112,249
Risk to Recidivate (CSRA)	111,468
Parolees with a Moderate/High CSRA Score	50,835

Table 2. Parolee Risk Assessments (Fiscal Year 2019–20)

Total Parole Population	52,131
Risk to Recidivate (CSRA)	51,410
Parolees with a Moderate/High CSRA Score	29,039

As shown in Table 1, of the 99 percent of the incarcerated population who have received a risk assessment, 45 percent have a moderate to high risk of reoffending. As shown in Table 2, of the 99 percent of the parole population who have received a risk assessment, 56 percent have a moderate to high risk to reoffend.

Assess Needs

The department uses the Core Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) as the needs assessment tool to determine the rehabilitation programming needs of incarcerated people. The department has determined that the Test of Adult Basic

Education (TABE®) assessment provides the best indicator of an individual’s need for academic programming, with a TABE® reading score below 9.0 indicating a criminogenic need.⁵

Some incarcerated people are excluded from receiving a Core COMPAS assessment, such as those designated at an EOP level of care or higher, incarcerated people at a reception center who are unclassified (pending COMPAS), and condemned individuals. Table 3 shows that, as of August 13, 2020, the total number of Core COMPAS assessments completed for general population individuals was 89,029. Of the total inmate population of 112,249, 90,209 were eligible to receive a Core COMPAS assessment. Of the eligible inmates, 85,590 received a Core COMPAS assessment, which was 95 percent of the total eligible population, a two percentage point increase from last year’s 93 percent of inmates who completed a Core COMPAS assessment.

Table 3. Core COMPAS Assessments (Fiscal Years 2018–19 and 2019–20)

	July 2018–June 2019	July 2019–June 2020
Core COMPAS Eligible Individuals	110,954	90,209
Core COMPAS Assessments Completed for General Population Individuals	87,764	89,029
Percentage	93%	95%

Once an individual reaches 210 days to parole, he or she is given a reentry COMPAS assessment. The resulting scores from this assessment are used to guide programming decisions upon parole. As shown in Table 4, for the period of July 1, 2019, to June 30, 2020, 96 percent of the parolee population received a reentry COMPAS assessment, which did not change from the last reporting period.

Table 4. Parolee Reentry COMPAS Assessments (Fiscal Year 2019–20)

	July 2018–June 2019	July 2019–June 2020
Parole Population	47,649	52,131
Core COMPAS Assessments Completed for Parolees	45,682	51,111
Percentage	96%	96%

⁵ The criminogenic need categories can include any of the following: substance use disorder, anger, employment problems (incorporated academic and career technical needs), criminal personality (formerly “criminal thinking”), and support from family of origin (formerly “family criminality”).

Needs Identified

Using July 1, 2020, statistical data from the department regarding Core COMPAS and TABE® assessments across all institutions, including the out-of-state facilities, Tables 5 and 6 reflect the rehabilitative needs for individuals with completed Core COMPAS assessments.

Table 5. Rehabilitative Needs of Individuals With a Completed Core COMPAS Assessment—Institutional Population (Fiscal Years 2018–19 and 2019–20)

Institutional Population		FY 2018–19	FY 2019–20
Substance Abuse	Low	38.75%	33.19%
	Mod/High	61.25%	66.81%
Criminal Personality	Low	57.92%	57.77%
	Mod/High	42.08%	42.23%
Anger	Low	51.27%	48.28%
	Mod/High	48.73%	51.72%
Employment Problems	Low	57.70%	62.02%
	Mod/High	42.30%	37.98%
Support From Family of Origin	Low	80.33%	76.50%
	Mod/High	19.67%	23.50%

Table 6. Rehabilitative Needs of Parolees With a Completed Reentry COMPAS Assessment—Parole Population (Fiscal Years 2018–19 and 2019–20)

Parole Population		FY 2018–19	FY 2019–20
Reentry Substance Abuse	Low	44.52%	44.43%
	Mod/High	55.48%	55.57%
Criminal Thinking Observation	Low	83.22%	85.90%
	Mod/High	16.78%	14.10%
Negative Social Cognitions	Low	77.82%	81.70%
	Mod/High	22.18%	18.30%
Reentry Financial	Low	47.65%	51.19%
	Mod/High	52.35%	48.81%
Reentry Employment Expectations	Low	48.08%	52.41%
	Mod/High	51.92%	47.59%
Reentry Residential Instability	Low	59.10%	60.83%
	Mod/High	40.90%	39.17%

In the department's review of provided COMPAS information, released incarcerated persons' needs are generally consistent from fiscal year 2018–19 to 2019–20. Reflecting on the department's 2017 Outcomes Evaluation Report, the importance of substance use disorder treatment has had a profound effect on reducing recidivism. The department's evaluation report noted that individuals who received in-prison substance use disorder treatment and completed aftercare had a lower three-year conviction rate than those who received in-prison substance use disorder treatment, but little or no aftercare.

The department should continue in its efforts to provide all incarcerated individuals a reentry COMPAS needs assessment prior to release. As in prior reports, the Board hopes to see reductions in the percentage of incarcerated persons with moderate to high needs upon parole, with an emphasis on reducing the moderate to high need for reentry substance use disorder treatment.

AVAILABLE REHABILITATIVE PROGRAMS

Academic Education Programs

Academic education programs are offered throughout an incarcerated person's incarceration and focus on increasing a student's reading ability to at least a 9th-grade level. For students reading at 9th-grade level or higher, the focus is to help them earn a high school diploma or high school equivalency. In early January 2020, the department discontinued the following educational delivery models: general population, voluntary education program, and alternative programming. On January 9, 2020, the department implemented the following new delivery models: traditional education (similar to general population), postsecondary and continuing education (similar to voluntary education program), and alternative education (similar to alternative programming). The delivery model for the enhanced outpatient program had no change.

With COVID-19 restrictions beginning in March 2020, all programming, including academic and vocational education, changed dramatically. Testing ceased entirely, rendering credit-earning opportunities unavailable.

Academic Achievements and Program Completions

Due to COVID-19, the department reported a reduction of completion rates for most programs. However, as shown in Table 7, the department continued to increase college course completions, from 22,786 during fiscal year 2018–19, to 27,455 for fiscal year 2019–20.

The department has face-to-face college programs at 34 institutions and four inmate fire camp sites. According to the department, there are currently 24 colleges (23 community colleges and one California State University) offering face-to-face instruction. The Board commends the department for its collaborations with community colleges in its efforts to expand access to both correspondence courses and face-to-face instruction at all of the institutions. In addition to its

collaboration with the California Community College Chancellor’s Office to deliver face-to-face college courses leading to an associate’s degree for transfer, the California State University, Los Angeles, provides the only face-to-face pathway to a bachelor’s degree.

In addition, the department has begun looking into a process to better link incarcerated individuals in the institutions to colleges in the community, so they have an opportunity to enroll in college prior to leaving the institution. This process will reduce the amount of time between an incarcerated person’s release and the beginning of college courses in the community. The Board commends the department for its forward-thinking plans for the next calendar year and will report on any updates in a future report.

Computer-Based GED and High School Equivalency Exams

The general education development (GED) assessment or the high school equivalency test (HiSET) is provided to incarcerated students who possess neither a high school diploma nor a high school equivalency certificate. Students who are enrolled in a GED program are provided subject matter preparation to take the HiSET. The HiSET is offered as an alternative to the GED to provide a paper version of the test to meet the needs of students within secure housing units. The department also offers the HiSET as an alternative test for students housed in the fire camps.

Table 7. Achievements and Completions (Fiscal Years 2018–19 and 2019–20)

Academic Achievements and Program Completions	FY 2018–19 Totals	FY 2019–20 Totals
CASAS Benchmarks	14,836	9,285
HSE Subtests Passed	3,007	1,832
HSE Completions	2,952	1,716
High School Diplomas	271	262
College Course Completions	22,786	27,455
AA Degrees Earned	215	349
BA Degrees Earned	5	8
MA Degrees Earned	2	3
Academic Milestone Credits Earned	38,007	23,999

Rehabilitative Advancement Project—e-Readers

The department is working to maximize opportunities for eligible students to obtain milestone completion credits and is implementing information technology programs at institutions. E-readers provide students’ semester textbook curricula, reducing textbook costs and enhancing

access to technology. E-readers will also be made available to incarcerated persons for purchase and are now available to some non-PSCE students. However, some devices are still not functional, and the demand for accessibility continues to increase. The need for current technology and up-to-date materials will continue to be an important issue, especially with the expansion of college courses.

The department is continuing to seek opportunities to increase educational engagements. Since 2017, the department has monitored and viewed assessments and improvements needed in the current e-reader tablets. Based on new technology applications and recommendations, future improvement efforts are being developed for upgrading the teacher interface, providing an easier-to-use e-reader application, and increasing flexibility when assigning open-source or free textbooks.

Career Technical Education Programs

In June 2020, Career Technical Education was operational in 34 institutions. The following table displays the CTE component and program completions and industry certifications. The department showed a sharp decrease in the number of CTE component completions (17 percent decrease) and CTE industry certifications (47 percent decrease) from the prior fiscal year. In addition, the overall CTE program completions decreased, after showing a slight increase in the previous fiscal year.

**Table 8. CTE Achievements and Program Completions
(Fiscal Years 2017–18 Through 2019–20)**

CTE Completions and Industry Certifications	FY 2017–18 Totals	FY 2018–19 Totals	FY 2019–20 Totals
CTE Component Completions	19,991	13,859	11,564
CTE Program Completions	2,361	2,377	2,432
CTE Industry Certifications (without component or program completion)*	18,086	12,555	6,622

* In fiscal year 2018–19, the SOMS-reported figure is capturing all CTE certifications, which can include both final industry certifications and certifications achieved in the course of program completion.

The department reported that the decrease in completions was partially due to COVID-19 as physical access to CTE courses decreased since March 2020, although this does not explain the dramatic decrease since 2018. In order for a teacher to award program completion certificates, most trades require that students physically demonstrate skill mastery in addition to a final exam. CTE coursework can be completed via independent study, which accounts for the significant

increase in attendance between March and April 2020 as teachers began providing independent study assignments to a largely confined population.

Transition Reentry Program

The transitions reentry program was designed to provide students employment preparation skills required for successful reentry into society, primarily during the last 24 months of incarceration. The transitions reentry program teaches job readiness, job search skills, financial literacy, and provides students with community resources which may assist in their transitions back into the community. Through existing data resources, the department is able to identify individuals with assessed needs for reentry-related services in each institution and yard.

“Another Chance, a Better Choice” was developed by the Sacramento Employment and Training Agency. The curriculum teaches job readiness, job search skills, and prerequisite skills needed for today’s competitive job market. It includes practical and strategic information, hands-on activities, individual and team-oriented exercises, role playing, and motivational information. In addition to employment preparations, another focus is financial literacy and educational curricula called “Money Smart.” The Division of Rehabilitative Programs believes financial education fosters financial stability for individuals and for entire communities upon a student’s release.

Table 9. Adult Rehabilitative Annual Program Capacity (2018–2020)

Rehabilitative Program	June 2018	June 2019	June 2020
Academic Education*	45,030	45,432	44,901
Career Technical Education	9,052	9,423	10,719
In-Prison Employment Program	20,734	20,734	23,392
Total Education Program Capacity	74,816	75,589	79,012
In-Prison Substance Abuse	13,603	13,574	5,592
In-Prison Cognitive Behavioral Treatment			
Anger Management	9,840	9,792	3,792
Criminal Thinking	9,840	9,888	3,840
Family Relationships	4,936	4,936	1,916
Victim Impact	1,488	1,488	744
Denial Management	1,488	1,488	744
Total In-Prison CBT Program Capacity	27,592	27,592	11,036
In-Prison Cognitive Behavioral Interventions (CBI):			
CBI – Intensive Outpatient	-	-	6,240
CBI – Outpatient	-	-	2,316
CBI – Life Skills	-	-	2,460
Total CBI Program Capacity	-	-	11,016
Total Annual Capacity for All Programs	116,011	116,755	106,656

* Academic and CTE report as a daily budgeted capacity. All other programs report the average number of times a program can be completed in one fiscal year (annualized).

Table 10. Postrelease Annual Program Capacity (2018–2020)

Rehabilitative Program	June 2018	June 2019	June 2020
Postrelease Substance Abuse	9,975	9,573	8,036
Postrelease Employment	6,162	5,727	8,400
Postrelease Education	7,841	6,146	8,036
Total Capacity for All Programs	23,9778	21,446	24,472

Cognitive Behavioral Interventions and Substance Use Disorder Treatment Programs

The department moved away from the cognitive behavioral treatment (CBT) model at the end of 2019 and replaced it with the cognitive behavioral interventions (CBI) model as part of the integrated substance use disorder treatment (ISUDT) program.

In January 2020, the department began implementation of the ISUDT program, replacing its previous SUDT and CBT programs. This comprehensive and evidence-based cross-divisional ISUDT program was developed to address the needs of incarcerated individuals suffering from a substance use disorder (SUD) in addition to their identified criminogenic needs with the ultimate goal of providing the incarcerated individual with the knowledge, skills, and tools to successfully reintegrate back into their community.

The ISUDT program identifies incarcerated individuals at risk for harm related to SUD and provides treatment that reduces the risk of overdose or other complications related to SUD. Treatment integrates the newly designed cognitive behavioral interventions (CBI) model, in all the department’s adult institutions. Treatment may include medication assisted treatment (MAT), as clinically indicated.

The department reports that in fiscal year 2019–20, there were 1,195 overdoses resulting in emergency department encounters or hospitalizations. Forty-four deaths occurred, of which 42 had evidence of opioids, either alone or in combination with other drugs.⁶

The department places incarcerated individuals in one of three evidence-based program models: CBI-Intensive Outpatient (ISI), CBI-Outpatient (ISO), or CBI-Life Skills (CBI 2). Incarcerated individuals assigned to an ISI or ISO group will also receive substance use disorder programming. CBI aims to eliminate patterns of criminal behavior, reduce substance use, abuse, and dependency, and create an opportunity for success upon release.

⁶ California Correctional Health Care Services, Risk Management Branch.

The lengths of these programs are as follows:

- CBI – Intensive Outpatient (ISI): Five days per week, two hours per day, for approximately 12 months
- CBI – Outpatient (ISO): Three days per week, two hours per day, for approximately 12 months
- CBI – Life Skills (CBI 2): Three days per week, two hours per day, for approximately seven months

Substance Use Disorder Treatment and Program Completion

The following tables display the substance use disorder treatment (SUDT) completions and exit rates for fiscal year 2019–20 for both in-prison and community aftercare programs. A noncompletion exit from SUDT means the incarcerated person or parolee attended, but did not complete the program. These exits occur due to transfers, refusal to attend the program once assigned, behavioral issues necessitating removal from treatment, or other issues preventing an incarcerated person from attending and completing the treatment program. When the program ended in December 2019, the average in-prison monthly completion rate was 64.3 percent. In March 2020, the completion rate fell to zero as programming ceased due to COVID-19.

Table 11. In-Prison SUDT Completions and Exit Rates (Fiscal Year 2019–20)

Month	Total Exits	Completions	Other Exits	% Completions
July 2019	1,066	600	466	56.3%
August 2019	1,109	638	471	57.5%

Long-Term Offender Program

The long-term offender program (LTOP) was phased out in December 2019 with the implementation of the ISUDT program. The victim impact and denial management programming components within LTOP were specifically incorporated into the ISUDT program.

Offender Mentor Certification Program

The offender mentor certification program (OMCP) provides long-term offenders and individuals serving life sentences without the possibility of parole with education, training, and the opportunity to earn a certification in alcohol and other drug (AOD) counseling from a certifying organization recognized and approved by the California Department of Health Care Services.

As of July 2020, the number of OMCP training locations increased from three to seven. Incarcerated individuals are recruited from institutions statewide and are transferred to one of the seven training sites for AOD training: Central California Women’s Facility; Valley State Prison; California State Prison, Solano; California State Prison, Los Angeles County; California State Prison, Corcoran; California Correctional Institution; and California Men’s Colony.

During the approximately year-long OMCP training, participants complete an ISI program, receive 350 hours of formal classroom AOD education, complete 255 hours of practicum training, and take an AOD certification exam. Upon being AOD-certified, the individual is

transferred back to his or her original institution and has the opportunity to cofacilitate CBI groups as a mentor.

Each OMCP training location is designed to provide two training sessions per fiscal year, and each training session may include up to 36 participants per session. As of August 2020, there were approximately 140 OMCP mentors statewide, a significant increase from the 89 mentors identified in the 2019 C-ROB report.

ADDITIONAL PROGRAM MODELS AND OPPORTUNITIES

California Prison Industry Authority

Industry Employment Program

The California Prison Industry Authority (CALPIA) offers programming at 35 institutions throughout the State, operating more than 100 service, manufacturing, and consumable enterprises and providing approximately 7,800 assignments for incarcerated individuals for fiscal year 2019–20. In addition, CALPIA offers 144 nationally recognized accredited certifications through its industry employment program (IEP). CALPIA’s IEP is focused on improving the ability of incarcerated people to effectively transition from prison to the community and successfully obtain jobs when they are released.

In fiscal year 2019–20, more than 12,009 participants successfully completed an accredited certification program.

The IEP completed the implementation of State apprenticeship programs statewide at all 35 adult institutions. Completion of an apprenticeship program includes required on-the-job training hours for the enrolled apprenticeship occupation. In addition, each registered participant must complete 144 annual hours of course-related curriculum. Upon completion of a program, CALPIA participants earn State apprenticeship certificates. During fiscal year 2019–20, there were 2,510 participants registered in the State apprenticeship program, and 916 individuals completed the apprentice program.

Career Technical Education Program Expansion

CALPIA established its Career Technical Education (CTE) program in 2006. The program began as a preapprenticeship program with instruction administered by journey-level instructors under contract from local trade-labor unions. CALPIA’s CTE programs include preapprentice carpentry, preapprentice construction labor, preapprentice iron working, commercial diving, facilities maintenance, AutoCAD (Computer-Aided Design), Code.7370 (computer coding), and culinary skills. CALPIA offers 23 CTE programs at nine locations.

Recidivism Study

CALPIA has formed an advisory committee in collaboration with the University of California, Irvine, to refine the scope of the recidivism study. The study will provide the necessary data elements and detailed analysis to help guide CALPIA's ongoing focus for improved outcomes for the individuals in its programs. Due to COVID-19, the anticipated completion date for the recidivism study is fiscal year 2021–22.

Conservation Camps

The Office of Correctional Education provides educational opportunities to students housed at 43 conservation camps for adults, three of which house female firefighters. There are three designated institutions that act as base facilities: California Correctional Center, California Institution for Women, and Sierra Conservation Center.

Under the Alternative Education format, teachers provide Adult Basic Education and Adult Secondary Educational distance learning. Through the Postsecondary and Continuing Education format, incarcerated individuals housed at conservation camps may enroll in college correspondence and eLearning courses. Face-to-face college courses are provided by college professors from local community colleges at the Baseline, Growlersburg, Mount Bullion, and Vallecito camp sites. Twenty camps offer both Alcoholics Anonymous and Narcotics Anonymous programs. Some of these programs are eligible for milestone credits upon completion, and many provide certificates.

The camps are jointly managed by the department and the California Department of Forestry and Fire Protection (CAL FIRE). The conservation camps can house up to 4,522 adult incarcerated persons who constitute 219 firefighting crews. This program provides the State's cooperative agencies with an able-bodied, trained workforce for fire suppression and other emergencies, such as floods and earthquakes. Fire crews also work on conservation projects on public lands and provide labor for local community service projects, including the clearing of firebreaks, restoration of historical structures, park maintenance, and removal of fallen trees and debris. According to the department, in an average year, incarcerated people provide approximately three million person hours in firefighting and other emergencies, and seven million person hours in community service project work, saving California taxpayers an average of more than \$100 million annually.

Proposition 57—Public Safety and Rehabilitation Act of 2016

In November 2016, California passed Proposition 57, the California Parole for Non-Violent Criminals and Juvenile Court Trial Requirements Initiative, requiring the department to adopt regulations implementing new parole and sentence credit provisions to enhance public safety, and authorizing the department to award sentence credits for rehabilitation achievement, good conduct, or educational merit. The department continues to offer rehabilitative achievement credits, good conduct credits, educational merit credits, and milestone credits to incarcerated individuals. Due to COVID-19, however, access to these credits may not be available at every institution.

Inmate Activity Groups

Inmate activity groups (IAGs) have expanded significantly in all adult institutions, as encouraged by the department in 2010 as a measure to add innovative, low-cost programs. There were approximately 1,300 individual inmate activity groups available in the adult institutions with more than 3,800 program sessions running before COVID-19. The department plans to safely and responsibly phase in these group sessions. These volunteer activity groups are defined in Title 15 of the *California Code of Regulations*, Section 3233, as groups that “promote educational, social, cultural, and recreational interests of participating inmates.” These activity groups offer additional rehabilitative programming through an array of nonprofit volunteer-led groups providing cognitive behavioral services, religious services, higher education, and social awareness programs, in addition to cultural and recreational programs. Activity groups offer a variety of services, including behavior management, victim impact, mentor programs, community reintegration, and transitional housing, employment, and community connections.

Internet Protocol Television Integration: DRP TV

In order to enhance and increase access to rehabilitative programming opportunities, the department has initiated the Internet Protocol Television Integration (IPTVI) project, or DRP TV. DRP TV is a streaming network that delivers secure educational and rehabilitative television programming to incarcerated persons with opportunities to stream in classrooms, dayrooms, and cells. This network was built through the IPTVI project, which was completed in fiscal year 2017–18. All 35 adult institutions are fully operational with four exclusive DRP-TV channels focused on education, wellness, employment, and reentry. A typical month of scheduling airs approximately 25 unique shows, including three eLearning video series used in conjunction with classroom education. In fiscal year 2019–20, 7,723 unique students participated in the eLearning courses via DRP TV, resulting in 2,023 class completions.

During COVID-19, DRP worked with multiple divisions and units to secure critically needed rehabilitative-based content, which was added to DRP-TV for viewing. The content was centered

on rehabilitative treatment and education, health and wellness, specifically COVID-19 health updates, religious, self-help, incarcerated person-activity centered content and meditation/therapeutic content.

DRP TV continues to expand video-on-demand (VOD) capabilities at all departmental institutions. VOD gives teachers access to a large repository of educational videos and allows them to play, pause, and rewind videos in a classroom setting. To date, there are more than 2,000 videos in the VOD library for instructional use. The use of DRP TV should continue to improve dissemination of important information to the incarcerated person population and is expected to enhance access to rehabilitative programming.

Innovative Programming Grants

The State of California Budget Act of 2019 included \$4 million in annual funding for additional rehabilitative programming grants. The grants will be awarded for three-year periods, for a total of \$12 million per round. These grants were awarded and began on May 1, 2019, and will end on April 30, 2022. Eligibility includes nonprofit organizations that currently provide programs in an adult correctional setting and that have demonstrated success and focus on individual responsibility and restorative justice principles.

The department requested input from the Division of Adult Institutions and California Correctional Health Care Services to identify the target populations or underserved institutions for innovative programming grants. The request for applications lists five targets: programmatically underserved institutions, level IV 180-design facilities, nondesignated facilities, enhanced outpatient program, and youth program.

Applicants were allowed to submit a single grant application to provide a program at one or more prison locations by completing one application and noting at which institutions/yards the program would be located. Applications were accepted for 39 locations (35 adult institutions and four in-state contract bed locations). Twenty-seven locations were identified as target locations and 12 were nontarget locations. Applications for target locations received additional points in the evaluation process.

In total, 33 applicant awards were provided, totaling more than \$11.8 million over the three-year period.

Round VI/VII: Victim Impact and California Reentry and Enrichment Grants

In the Budget Act of 2019, an additional \$6 million was awarded to further innovative grants. These will be delivered through (1) a \$1 million request for applications that will award grants to victim-focused programming and (2) \$5 million for California Reentry and Enrichment (CARE) Grants subject to Penal Code section 5007.3.

According to the department, due to challenges encountered as a result of COVID-19, the 2019–20 fiscal-year funding will revert to the General Fund monies as the grants cannot be awarded by the end of the year.

Victim Impact Grants

In the Budget Act of 2019, an additional \$2 million was awarded to deliver victim-focused services. The Division of Rehabilitative Programs released a request for application (RFA) in July 2019 for grant funds focused on Victim Impact Programs for a two-term grant cycle. The Office of Victim and Survivor Rights and Services (OVSRS) released an RFA July 2019 to solicit grants focused on Victim Offender Dialogue (VOD) Programs for a two-term grant cycle. Eligibility for both RFAs included nonprofit organizations that currently provide victim impact programs in an adult correctional setting and that have demonstrated success and focus on individual responsibility and restorative justice principles. DRP made awards in November 2019 to 12 applicants to provide programming at 14 institutions, totaling 23 program awards. OVSRS made awards in September 2019 to four applicants providing services throughout the State of California.

California Reentry and Enrichment Grants

In the Budget Act of 2019, an additional \$5 million was awarded for California Reentry and Enrichment (CARE) Grants subject. Senate Bill 94 added Section 5007.3 to the California Penal Code that required the department to develop a 10-member CARE grant steering committee in consultation with the Legislature. The steering committee was established in February 2020.

Utilizing a steering committee to award grant funds for rehabilitative programs was a new process for DRP. The steering committee established grant criteria and released an RFA to solicit grants in April 2020, and completed award selections in July 2020 totaling approximately \$9.7 million over the two-term grant cycle. Eligibility included nonprofit organizations that currently provide programs in an adult correctional setting and that have demonstrated success and focus on insight-oriented restorative justice, transformative, and healing programs. In total, 25 applicants were selected to provide programming at 25 institutions totaling 77 program awards.

California Identification Card Project

The California Identification Card program (CAL-ID) was implemented to assist eligible individuals in obtaining State-issued identification cards to satisfy federal requirements for employment documentation. The department is working with the California Department of Motor Vehicles (DMV), so a DMV-eligible camera can be provided inside institutions to use in obtaining photographs of individuals who have been incarcerated for more than 10 years. This would potentially increase the number of eligible participants for the CAL-ID program. In addition, in July 2019, CAL-ID program eligibility was expanded by increasing the screening

period of incarcerated individuals from four to seven months prior to release to a screening period of zero to 13 months prior to release. This change proved to be effective and allowed the program to increase eligibility, application screenings, and ultimately submit more applications to DMV for processing.

For the period of July 1, 2019, to June 30, 2020, among all incarcerated persons released, there were 16,654 applications sent to the DMV for processing (indicating that the individual was both interested in and eligible to receive an identification card), and the DMV approved and issued 13,005. Of those issued, 10,460 persons were released with an identification card (80 percent of approved applications) and 596 identification cards were held at the institution to be released (5 percent of the approved applications).

Preparole Process Benefits Program

The Division of Adult Parole Operations Transitional Case Management Program (TCMP) provides prerelease benefit assistance to all eligible individuals releasing to parole or postrelease community supervision (PRCS) within 120 days of release from prison. TCMP benefit workers provide Medi-Cal, Social Security Administration (SSA), and Department of Veterans Affairs (VA) benefit application assistance.

Benefit Outcomes and TCMP Dispositions

The Division of Adult Parole Operations (DAPO) continues to strengthen its relationship with all counties through its continued participation in monthly meetings with the Department of Health Care Services (DHCS) and counties to address any specific issues the counties may be experiencing in facilitating the application review process. The department recently renewed its data-sharing agreement with DHCS for an additional five years. This agreement allows both departments to track and exchange the Medi-Cal application status for individuals serviced through the TCMP. This data-sharing agreement has assisted the department in more accurately reporting information related to benefit application outcomes. As a result, pending benefit application outcome numbers have been significantly reduced. The department is dependent upon the 58 counties to complete the benefit application process timely and return the approval or denial documentation to each prison prior to the incarcerated person's release.

As shown in Table 13, the number of benefit applications, as reported by the DAPO TCMP, decreased by 14 percent for SSA/SSI, 4 percent for Medi-Cal, and decreased by 7 percent for the VA in relation to the prior fiscal year. The department reported the reduction in total number of individuals released from departmental custody affected the overall application submissions.

Table 13. Benefit Applications Submissions (Fiscal Years 2018–19 and 2019–20)

Benefit Type	Total Submissions FY 2018–19	Total Submissions FY 2019–20	Change in Total Submissions	Change as a % in Total Submissions
SSA/SSI	4,112	3,544	-568	-13.8%
Medi-Cal	31,127	29,859	-1,268	-4.1%
VA	416	386	-30	-7.2%

As shown in Table 14, according to the department, it was screening nearly 100 percent of incarcerated persons for benefit eligibility. Compared with the prior fiscal year, the TCMP increased by 1.2 percentage points in providing benefit assistance services (“Submitted Applications”) to 82.5 percent of the incarcerated person population prior to release. In addition, during fiscal year 2019–20, the TCMP identified that 5.0 percent of the incarcerated person population had access to other insurance, 4.5 percent was unavailable due to participation in a reentry program, and 3.1 percent refused transitional services.

The Board is interested in obtaining and reviewing the benefit applications’ outcomes—the actual number of benefit approvals for released individuals from the applications submitted for each benefit type listed in Table 15—SSA/SSI, Medi-Cal, and the VA. The reasons for the decreases in approval rates for Medi-Cal and VA applications are unknown; however, each of the categories in Table 16 had a high number of pending submissions. To obtain these data moving forward, there must be an exchange of information and partnerships established between the department, the Social Security Administration, and the VA. The goal in obtaining these data is to assist in identifying strategies to better link released individuals to the various services available. The TCMP has renewed its data-sharing agreement with DHCS to exchange information pertaining to Medi-Cal benefit application statuses monthly, rather than quarterly, starting with fiscal year 2020–21.

Reintegration

Community Programs for Parolees

In fiscal year 2019–20, the Division of Rehabilitative Programs administered community and reentry programs through the following contracts:

- Specialized Treatment for Optimized Programming to serve high/medium-risk individuals;
- Day Reporting Centers (DRC) and Community-Based Coalitions (CBC) to serve low-risk individuals; and
- Transitional Housing and parolee service centers to serve long-term offenders.

In addition, the Life Skills Training program and the CAL FIRE Ventura Training Center program were developed in collaboration with CAL FIRE and DAPO, and implemented in fiscal year 2018–19. These parolees have been through the fire camp programs while incarcerated, and this program extends that training. The program runs for 18 months and includes six months of education, plus 12 months of on-the-job training at CAL FIRE base camps. As of July 1, 2020, 41 individuals have completed this program, 34 of whom have been offered careers with CAL FIRE or federal agencies.

During fiscal year 2019–20, DRP developed the Long-Term Offender Reentry Recovery program for the long-term offender/lifer population. DRP continues offering similar services through nine Transitional Housing Programs. To ensure the placement of individuals in these programs, DRP works directly with DAPO to coordinate the placements and ensure they meet the conditions of parole, mandated by the Board of Parole Hearings.

Due to COVID-19, the department responded with the early discharge of incarcerated individuals who were already within 365 days of their scheduled release for the health and safety of staff and incarcerated individuals.⁷ In addition, the department deployed the Emergency Housing Placement Strike Team comprising staff from DRP and DAPO, DRP community contract providers, county probation offices throughout the State, and Project Hope. This strike team worked collaboratively to secure additional housing for those being released early, both to parole and county probation supervision. This included housing through DRP's Specialized Treatment for Optimized Programming Reentry Recovery Housing provider network, and a Day Reporting Center provider in San Bernardino.

⁷ For more information, see <https://www.cdcr.ca.gov/news/2020/07/10/cdcr-announces-additional-actions-to-reduce-population-and-maximize-space-systemwide-to-address-covid-19/>.

The department completed development on a process of producing a tracking mechanism to identify the percentages of first-year parolees who have participated in community-based programming based on their assessed needs. The information is provided in Table 18.

Table 18. Total Number of Individuals Who Completed at Least One Year of Parole Supervision, With a High/Moderate CSRA Score (Fiscal Year 2019–20)

Individual Need (Offenders may be in multiple categories)	Total Number of Offenders by Need	Parolees With a Risk and Need Who Participated in Programming Consistent With Their Needs	Parolees With a Need Who Did Not Participate in Programming Consistent With Their Needs
Employment Need	6,053	2,769	3,284
Education Need	5,089	2,635	2,454
Substance Abuse Need	6,132	3,332	2,800
Total percentage of individuals with at least one need who participated in at least one program consistent with their risk and need			52.2%
Total percentage of individuals with a risk and need who participated in a program			57.2%

Table 19. Total Number of Individuals Released With a High/Moderate CSRA Score

Parolees: Type of Criminogenic Risk and Need	Total Number of Offenders Released
Parolees released with a moderate-to-high CSRA score	10,590
Parolees released with a moderate-to-high CSRA score and a Reentry COMPAS	10,437
Parolees released with a moderate-to-high CSRA score and at least one medium-to-high COMPAS reentry need	9,380

In fiscal year 2019–20, as shown in Table 19, the department identified 9,380 individuals released with a moderate-to-high risk according to the California Static Risk Assessment (CSRA) and at least one medium-to-high need, as identified by the Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) Reentry assessment tool.

In fiscal year 2018–19, the department identified that 52.2 percent of individuals with at least one need participated in at least one program consistent with their risk and need. The percentage did not change from the 2019 C-ROB report. The total percentage of individuals with a risk and need participating in a program was 57.2. The percentage did not change from the 2019 C-ROB report.

2020 FINDINGS

From February to March 2019, and again from July through August 2020, OIG staff, on behalf of C-ROB, conducted site visits at all 35 California adult institutions or sent surveys to various employees. Institutional site visits consisted of interviews of individuals throughout the institutions regarding rehabilitation programs. The team also observed educational, vocational, and activity group programs, including innovative and inmate-led endeavors. During the visits, the team employed an assessment questionnaire addressing custody, education and classification meetings, caseload, curriculum, procurement, data solutions, information technology (IT) support, space utilization, and any identified issues or barriers to rehabilitative programming or treatment efforts.

“Many men will end up homeless when released from here. They don’t have anywhere to go in many of the counties. I’d say 65 percent are older with medical and mental health conditions with no family. We need a statewide, county by county, list of transitional housing.”

—Inmate advisory council member

The following are summaries of the most common issues related to rehabilitation as reported by the individuals interviewed during the visits. We have taken care to highlight specifically the concerns discussed by many different employees with varying perspectives to address issues with broad impact within the institutions, and our recommendations reflect this approach.

Inmate Advisory Councils

The majority of Inmate Advisory Council (IAC) members stated all self-help and rehabilitative programs had ceased and in-cell programs, which offered the ability to earn credits, were almost nonexistent. The IAC members also stated many rehabilitative programs took a significant amount of time to complete, and waitlists to get into classes took six months to a year.

Reentry resources normally included parole planning, résumé-writing classes, job placement classes, and information about how to file for a Social Security card or obtain a California identification card; however, inmate advisory council members reported all these reentry resources have been unavailable since COVID-19. Many IAC members stated they would like to see more information on transitional housing. They also reported wanting more job training involving technology and other trades, and expanded mentorship programs as well as education about what life is likely to look like outside the prison walls.

Students learned about new programs through educational staff and teachers. Institutions also typically posted flyers and sign-up sheets at each building. Some information was distributed through council meeting minutes or on institutional television. About half of the prisons had an

inmate-run newspaper or newsletter with information about goings-on within their prison. Often, the inmate advisory council members wrote the newsletter.

Students

Many students reported having less motivation to do the homework and missed interaction with other students. Students stated the only good thing was they had more time to do their work, but the advantages of in-person education, direct assistance, and fewer distractions were unavailable. Multiple students discussed a critical need for students to receive in-person education.

“Why do the homework packets and work if you can’t get a GED?”

—Student

Multiple students said many of the instructors did not have time for cell-front instruction or to assist and answer questions; rather, the teachers dropped off educational packets each week.

“[I miss] the environment, and the teacher actually cares. She makes sure that they understand. When you have someone who cares about their job like the teacher does, it makes a world of a difference.”

—Student

Some students expressed a need for cell-front visits with instructors to ask questions and receive answers. Students also noted there was no access to any computers to prepare for the GED because in-class education was not available.

Many students missed the assistance offered in the classroom by their teachers and its associated

increased motivation. Multiple students reported the need for structure that having a teacher in the classroom offered. There were many distractions in cells. Multiple students expressed they missed having to physically come to the classroom as it required dedication, which increased their personal accountability and positive identity.

The majority of students reported no reentry resources were available during the ordered in-cell quarantine, and a few students reported scarce reentry resources available to them at their institution. Multiple students desired additional trade and parenting classes, and stated they were not mentally prepared for release.

“It’s ineffective, it’s important we have the book work, but if we can’t do the hands-on we can’t learn.”

—Student

Academic Instructors

When asked about the new educational model, which added additional classes, but reduced class time and the number of students per class, many instructors were positive about the change. They reported that classes were more focused and that they were better able to help the students in class. While the questions on the new model yielded mostly positive answers, the one negative trend for almost all instructors was that the time spent between classes was inadequate for them

to complete their administrative duties. Many instructors reported coming early and staying late to complete these required tasks.

The majority of instructors reported using the in-cell education format during COVID-19, which consisted of disseminating educational materials and correspondence homework packets weekly to students in their housing units. More than half of instructors believed the in-cell education was worse than interactive or in-class education. Many instructors noted that students were unable to receive one-on-one instruction and were not able to receive feedback in real time. Many instructors indicated students' need to be in a classroom setting to maximize learning opportunities as there were often too many distractions in the housing units and dorms for students to learn effectively. Further, multiple instructors felt that direct instruction and consistent communication with students was vital to educational success.

When discussing educational materials, most instructors indicated that their students had access to sufficient educational materials; however, their students required additional access to digital materials. Multiple instructors noted a need for the students to have calculators and computer programs in order to become comfortable with online testing. Multiple instructors reported that student testing had ceased since the transition to in-cell education and that they had heard many unfavorable comments from students who were ready or close to testing. We also asked instructors if their students were able to access computers to prepare for the GED test during the in-cell educational format, to which the majority answered no.

Regarding materials the instructors utilized during instruction, the majority reported that they had adequate resources, but several would like access to more electronic learning systems. When asked the same question regarding materials specific to English-as-a-second-language students, multiple instructors reported a need for Spanish-to-English dictionaries. In addition, instructors indicated a need for more teaching resources and materials in Spanish and more materials specific to teaching adults rather than children.

Career Technical Education Instructors

Career Technical Education transitioned to an in-cell format along with Adult Basic Education. Again, instructors reported creating packets of materials and delivering them to students. Echoing their academic counterparts, CTE instructors reported that this format was inferior for students. A clear majority of instructors indicated that hands-on training was not possible, which prevented their students from fully grasping the trade for which they were being trained. Some instructors also expressed concerns that books were not available for their students. At some institutions, students were not allowed to have textbooks in their cells. At others, there were not enough textbooks for each student. Instructors reinforced what the students reported regarding the lack of access for students to ask questions of their instructors regarding the trade.

On a positive note, some instructors indicated that students had more time to study the materials since they were able to keep study materials in their cell. Some instructors also indicated that cheating diminished with in-cell assignments.

Because hands-on education was not available at many institutions, students were unable to test for and earn certifications or milestone credits. Most instructors who were unable to test students indicated this was detrimental to student education and postrelease employment outcomes. Many instructors requested that the department find a way to provide hands-on training and testing.

When we asked about resources and materials, CTE instructors echoed the academic teachers and requested access to digital media, video or audio, to supplement their instruction. Some instructors indicated the class sizes were too large to effectively teach the students at disparate levels, and that digital media would help address this challenge. Roughly one-third of instructors indicated they did not have enough books or that their books were out of date. Many instructors expressed frustration with budget decisions for their programs; they were unable to make decisions regarding materials required for their program. They were dissatisfied with material choices that did not match the needs of their workshops. A clear majority asked the department to return the decision-making process to the instructors, a sentiment the Board has heard for several reporting periods.

Most computer and related technology instructors reported that the computers in their labs did not have the appropriate software to use for training their students. Specifically, many instructors indicated the software was outdated and did not match the version referenced in their textbooks. Instructors also noted their computers did not have programs that students could use specifically to improve their computer literacy, such as typing training.

When asked about employment training and resources available to their students, most instructors indicated that students had access to résumé-building and interview guides. Less than half the respondents indicated that their students had access to career search information or connections to employers in the field.

Transitions Reentry Program Instructors

Similar to academic and CTE instructors, many transitions instructors reported they were using worksheets and hand-outs, distributed and collected weekly, in lieu of in-person instruction. The majority felt it was an inadequate method of education: students were not able to have class discussions, clarify materials, view videos associated with the lessons, or receive added value provided by the instructors.

Overall, transitions instructors felt they had adequate supplies, materials, and coursework. While most said they had access to county-specific postrelease resources, about one-third reported otherwise. Of those who did have county-specific resources, some lacked resources for some counties. While instructors were able to obtain some information from the internet, it was not

consistent among all counties. Instructors reported that mental health and disability resources were particularly deficient for the counties.

Postsecondary and Continuing Education Instructors

The instructors indicated that college programs had moved to a correspondence format. For some colleges this was not new, but for many this required a modification to assignments and testing. Many instructors received support from the external colleges to move testing to an in-cell format; however, for some institutions and courses this was not possible, forcing students to withdraw.

The instructors generally found this format to be worse for their students. This was especially true for students who were required to watch videos for their classes. Many instructors expressed concerns that students no longer had access to videos for their classes, or the institution did not have enough portable video players for all their students. To address this challenge, some institutions placed the videos on the prison's television network, but not all students had access to a television in their cell. Many students no longer had access to computers to type their papers. Communication with students was much more complicated. Instructors requested access to clerks and tutors, but some noted that fellow students were assisting their classmates in the housing units.

Some PSCE instructors reported challenges with providing assignment packets to their students. Instructors received many documents from the colleges that required printing or copying before delivery to the students. With education across the institution providing homework packets, some instructors found there were not enough copiers or scanners to prepare assignments packets in a timely manner. Some institutions used the internal mail system or housing unit staff for the deliveries, which caused delays. At other institutions, PSCE instructors delivered the packets individually to the students. Many of these instructors requested a cart or trolley to assist in the delivery process.

For college education overall, many instructors reported having enough supplies for their students. Roughly one-third of instructors requested additional textbooks for their students. They also reported that many students could not afford to purchase textbooks on their own and the department was unable to purchase these books for the students, which caused frequent dropping out of classes. Some colleges provided books, avoiding this problem altogether. Some instructors indicated that e-readers alleviated some textbook-access issues, but most instructors reported the e-readers did not function properly, and the institution was unable to repair the devices. While some institutions attempted to acquire books through nonprofit support, several instructors requested additional funding and support to provide books for their students.

Beyond textbooks, instructors also requested computer lab access for students to type essays and conduct research. In addition, instructors stated they were receiving many requests for paper and writing utensils from their students.

Librarian

Librarians provide many essential services to incarcerated persons, including information about legal services, housing, transportation, and more. When asked what kind of rehabilitation information was available to the incarcerated population, many librarians indicated that the information was only available on the internet, which was inaccessible to incarcerated people, who must then request such information from the librarians. The difficulty of fulfilling these requests due to understaffing was an overwhelming sentiment among the respondents to our survey.

Librarians reported that the minimum qualifications required for library positions, combined with the low salary relative to outside librarian positions, accounted for the understaffing. Essentially, librarians' pay did not reflect their professional credentials. Many also felt that they were held to a higher standard than that of other educators through the hiring process, but then not treated as educators after starting in their positions. Librarians also reported that the department should increase library funding to update books and other resources.

Television Specialist

Most television specialists believed that rehabilitative programming met the needs of the students at their institutions. However, when asked if the available DRP television programs matched the needs of instructors, more than half stated no. They reported that the content did not correlate to educational instruction. Television specialists requested more programming aimed at teaching mathematics, English, job interview techniques, computer skills, vocational trades, and additional skills needed for reentry.

Many specialists stated they received DVDs from colleges, but they were unable to stream these classes on the television system for participating students. Some television specialists indicated that their prisons created their own channels for e-learning. This assisted in controlling the pace and content of the programs. The programming shown on these channels was related to mathematics, English, vocational skills, college courses, fitness, local inmate programs, parenting, TED talks, physical education, movies, and inspirational material. However, a common obstacle stated was the length of time needed to edit and add closed-captioning.

Further, some television specialists specified that the cable infrastructure at most prisons limited access to television services for their population. Cable complications contributed to a large percentage of the incarcerated population who did not receive a clear enough signal to watch the content. More than half the television specialists stated they did not have adequate resources and equipment to provide educational and rehabilitative programming to the entire incarcerated population. Many television specialists requested that a budget be established to procure equipment that would improve the television signal, and they requested teleprompter equipment.

Supervisor of Correctional Education Programs

Most respondents indicated that Adult Basic Education and Career Technical Education took place through weekly packets for students during COVID-19. The principals reported different delivery methods at different institutions. At some institutions, the instructors delivered the packets to the student in person, which allowed for one-on-one time to answer questions or provide feedback. Some instructors were also conducting one-on-one tutoring in the dayroom. Other principals indicated the instructors routed the packets through the institutional mail system or custody staff, not allowing for cell-front instruction or direct communication. One institution reported video-recording instruction from their teachers and providing the videos to their population through the television system. Most institutions continued to provide academic testing in a limited group setting, but CTE testing was not readily available. For college education, the principals reported that instruction was continuing through correspondence methods or small, socially distanced groups.

Most principals indicated that they received enough leadership and direction to transition into a distance-learning format. For those who indicated otherwise, they generally expressed two concerns. First, they did not receive enough communication from their institution or from the Office of Correctional Education. Second, they lacked sufficient resources to transition effectively, which most often meant having the equipment for their instructors to effectively telework. The department was not prepared to transition to a telework format for its instructors.

More than half the responding principals indicated that, when hiring new employees, insufficient salaries and a lack of applicants were the biggest challenges they faced. Although not as common, the location of their institutions also contributed significantly to hiring challenges. Many principals also noted delays at various stages throughout the hiring process, which sometimes led to qualified candidates accepting positions elsewhere. When the delays caused the hiring process to not match the academic calendar, principals reported a reduction in quality applicants. A limited but not insignificant number of principals reported that the job requirements did not align with the position in which the applicant had shown interest. This was most often the case with CTE and library positions, as principals reported the requirements were too strict or applicants could not use self-employment experience. Since the start of COVID-19, a small number of principals reported that hiring had become even more difficult.

The department tracks education time as X-time (actual classroom time), S-time (time missed due to institutional requirements), and E/A (individual excused or unexcused absence) time. The department reports three categories of S-time: education, custody, and medical. Principals report that the most frequent reasons for S-time are instructor absences and custody issues. Some principals requested the ability to hire substitute teachers to help address challenges associated with instructor absences. Principals reported different challenges that caused S-time from custody. They most often reported lockdowns and modified programs as the cause for custody S-time. Principals also reported multiple issues with housing unit officers. Some reported

scheduling conflicts with various custody operations such as meal times or counts. Others reported a lack of commitment to education from custody staff. These challenges often led to a late release for students either to or from their education programs. During COVID-19, some principals reported challenges with delays in assignment packet delivery from housing unit staff. Outside of education and custody causes for S-time, medical appointments are a leading cause for S-time. Departmental policy requires individuals to attend these appointments, which are often scheduled during students' educational class time. Principals expressed frustration that medical staff did not consider an individual's educational schedule when creating appointments.

For Adult Basic Education, principals noted an average of around 100 students on the waitlist for ABE I classes and an average of around 130 students on the waitlist for ABE II, ABE III, and GED classes. This may indicate an insufficient number of classes offered at many institutions. Most institutions reported that it took less than one month for an individual to start the next level of education after completing a course.

Community Resource Managers

Although in-person programming had ceased due to COVID-19, 12 out of 33 community resource managers (CRMs) stated they still held distanced inmate activity groups (IAGs) via mail correspondence. Due to the programs being correspondence only, individuals who continued their participation were not earning any credits to aid in their release. Most reported that religious services were done cell-front or on a one-on-one basis in the chapel if confidentiality was needed. Although the community resource managers were inundated with work on their current programs, their passion for rehabilitation was evident in their consistent desire to expand inmate activity groups. When asked which programs they would like to see started at their institutions, the three main responses were dog programs, release and reentry programs, and art programs.

As in previous years, CRMs requested additional staff. A trend among their responses referenced the 10 to 12 institutions that had received a management services technician (MST) position in 2018. Many staff members at institutions without an MST stated there was still a need for more staff and that an MST position would be highly beneficial. Another continued struggle reported by CRMs was space for inmate activity groups. During COVID-19 there were additional concerns with space because of social distancing. To comply with proper social distancing without added space, CRMs would need to reduce the number of individuals able to attend programs, which in turn would render them unable to attend to a large number of individuals' rehabilitation needs before release. While staffing and space were the major reported concerns, most CRMs expressed high praise for departmental headquarters. Many felt supported by headquarters with mentions made that the new chief of the office of community partnerships was a supportive and understanding leader.

Correctional Counselor III (Case Managers)

In the beginning of 2020, the Substance Abuse Disorder Treatment program was undergoing a transition to the new Integrated Substance Abuse Disorder Treatment (ISUDT) program. During our visit in February, the majority of counselors stated their new program was not up and running yet. Consequently, there were not many suggestions offered concerning the new program.

“We are unable to provide the skills which enhance and inmate’s opportunity to be successful upon release.”

—Correctional Counselor III

COVID-19 put a halt to programming within corrections. When the counselors were asked what voluntary credit-earning opportunities were available to individuals currently, all respondents said none. Nonexistent programming would affect the incarcerated population negatively, according to many of the counselors. A few expressed concerns with incarcerated persons not receiving rehabilitation before the mass releases happened as a result of COVID-19.

Wardens

Many wardens indicated that they had modified how programs ran to continue programming at their institutions. These changes included shifting to an in-cell programming format for education and some voluntary self-help groups, or reducing class sizes to allow small groups to meet under social distance guidelines. At many institutions, wardens reported a severe reduction in available programming or no programming at all. Several wardens believed this reduction in programming had decreased morale for the incarcerated individuals at their institution; however, some wardens reported it had also led to a decrease in disciplinary actions.

Outside of addressing COVID-19, wardens reported several general challenges which impede the ability to provide programming to their population. The most common challenge is a lack of space. Wardens are working to utilize nonstandard programming space, but suggested more modular building space and repairs to current space are needed to increase program availability. This is especially important to provide programming with social distance precautions. The second most common challenge is a lack of staff. As institutions expand programming into new space and into third watch, the wardens request additional custody staff to monitor programs and protect volunteers. Wardens also requested additional technology to help provide programs via video formats. Wardens requested technological solutions to bring voluntary program providers back in a remote capacity.

Division of Rehabilitative Programs

Division of Rehabilitative Programs representatives told us that educational success is based on State and national standards for adult education teaching, leadership, and curricula. They further reported that the methodologies to measure this success had not changed during COVID-19, but

the method in which education and programs were provided had changed. Program fidelity was tracked and monitored by a standardized course curriculum and materials. The department reported plans to expand program tracking and monitoring in the upcoming year.

When asked about in-cell programming, the representatives stated they were addressing changes weekly in conference calls with correctional educational administrators and the superintendent of correctional education. They further stated they had developed a phased plan to open classrooms again responsibly in the future. There were also plans to begin an in-cell format for ISUDT and CBI, which had been closed since COVID-19, in the upcoming month.

BOARD RECOMMENDATIONS

1. The Board recommends the Office of Correctional Education and all institutions find a method to deploy interactive learning for times when in-class education is unavailable. An interactive learning method would greatly expand the learning opportunities during lockdowns, S-time, and other times when programming is unavailable. Interactive distance learning has now become a standard throughout the educational system in California. The Board recognizes that excessive S-time significantly reduces the effectiveness of educational programming. The amount of time spent learning during the academic year would greatly improve if interactive distance learning were available.
2. The Board recommends that the Office of Community Partnerships pursue expanding credit-earning opportunities for correspondence-based rehabilitative programs. A number of institutions indicated some rehabilitative programming continued only through correspondence. Incarcerated persons who are voluntarily continuing their rehabilitative efforts through correspondence are currently earning no credit. Incarcerated persons should have the opportunity to receive credit correspondence-based programming. As with interactive learning, this would expand the availability of programming when in-person programs are unavailable. Incarcerated persons would have the opportunity to continue their rehabilitative progress and get their credit for it.
3. The Board recommends that the Office of Correctional Education make available county resources in libraries and the Transitions program, specifically in areas of mental health and disabilities. Many librarians and Transitions instructors indicated their only access to county information was via the internet. They also indicated that each county website was different, and information was scarce on certain county sites. Mental health and disability resources were among the most cumbersome to obtain. According to the department, in December 2018, there were more than 35,000 incarcerated persons with mental health problems. This information would greatly help this population upon release.

CVSP	Chuckawalla Valley State Prison
DVI	Deuel Vocational Institution
FSP	Folsom State Prison
FWF	Folsom Women’s Facility
HDSP	High Desert State Prison
ISP	Ironwood State Prison
KVSP	Kern Valley State Prison
LAC	California State Prison, Los Angeles County
MCSP	Mule Creek State Prison
NKSP	North Kern State Prison
PBSP	Pelican Bay State Prison
PVSP	Pleasant Valley State Prison
RJD	R.J. Donovan Correctional Facility
SAC	California State Prison, Sacramento
SATF	California Substance Abuse Treatment Facility and State Prison, Corcoran
SCC	Sierra Conservation Center
SOL	California State Prison, Solano
SQ	San Quentin State Prison
SVSP	Salinas Valley State Prison
VSP	Valley State Prison
WSP	Wasco State Prison

Appendix F. Milestone Completion Credit Schedule (MCCS)

MILESTONE COMPLETION CREDIT SCHEDULE – Schedule 1 Division of Rehabilitative Programs (DRP)

Incorporated by reference into CCR Title 15 section 3043.3

Academic Milestone Descriptions and Codes			
Adult Basic Education (ABE) I			
Reading	Educational Function Level (Test Range 150-160)	EFL0R01	2 weeks
Reading	Educational Function Level (Test Range 161-170)	EFL0R02	2 weeks
Reading	Educational Function Level (Test Range 171-180)	EFL0R03	2 weeks
Reading	Educational Function Level (Test Range 181-190)	EFL0R04	2 weeks
Reading	Educational Function Level (Test Range 191-200)	EFL0R05	2 weeks
Math	Educational Function Level (Test Range 150-160)	EFL0M01	2 weeks
Math	Educational Function Level (Test Range 161-170)	EFL0M02	2 weeks
Math	Educational Function Level (Test Range 171-180)	EFL0M03	2 weeks
Math	Educational Function Level (Test Range 181-190)	EFL0M04	2 weeks
Math	Educational Function Level (Test Range 191-200)	EFL0M05	2 weeks
ABE II			
Reading	Educational Function Level (Test Range 201-210)	EFL0R06	2 weeks
Reading	Educational Function Level (Test Range 211-220)	EFL0R07	2 weeks
Math	Educational Function Level (Test Range 201-210)	EFL0M06	2 weeks
Math	Educational Function Level (Test Range 211-220)	EFL0M07	2 weeks
Adult Secondary Education (ASE)			
Reading	Educational Function Level (Test Range 221-235)	EFL0R08	2 weeks
Reading	Educational Function Level (Test Range 236-240)	EFL0R09	2 weeks
Reading	Educational Function Level (Test Range 241-245)	EFL0R10	2 weeks
Reading	Educational Function Level (Test Range 246 and above)	EFL0R11	2 weeks
Math	Educational Function Level (Test Range 221-235)	EFL0M08	2 weeks
Math	Educational Function Level (Test Range 236-240)	EFL0M09	2 weeks
Math	Educational Function Level (Test Range 241-245)	EFL0M10	2 weeks
Math	Educational Function Level (Test Range 246 and above)	EFL0M11	2 weeks
High School Equivalency (HSE)*			
HSE	Language Arts, Reading and Writing Subtest (Electronic GED only)	HSE0001	2 week
HSE	Language Arts Reading Subtest (Paper based only – HiSET or TASC) Cannot be issued in conjunction with HSE0001	HSE0005	1 week
HSE	Writing Subtest (Paper based only – HiSET or TASC) Cannot be issued in conjunction with HSE0001	HSE0006	1 week
HSE	Social Studies subtest	HSE0002	1 week
HSE	Mathematics subtest	HSE0003	1 week
HSE	Science subtest	HSE0004	1 week
High School Diploma (HSD)			
HS	English 1 st course	HS10101	3 weeks
HS	English 2 nd course	HS10111	3 weeks
HS	English 3 rd course	HS10121	3 weeks
HS	Mathematics	HS10301	3 weeks
HS	Algebra I	HS10211	3 weeks
HS	General/ Life Science	HS10403	3 weeks
HS	Earth / Physical Science	HS10404	3 weeks
HS	U.S. History or Geography	HS10503	3 weeks
HS	World History or Geography/Culture	HS10504	3 weeks
HS	American Government and Economics	HS10601	3 weeks
HS	Visual and Performing Arts /Fine Arts	HS10801	3 weeks
HS	Elective completed	HS11220	3 weeks *R1
College			
College	Each 3 semester unit course or 4-5 quarter unit course completed	COL0110	3 weeks *R1

*R1 = Repeatable during same or new term for different classes/degrees

Appendix F. MCCA (continued)

General Milestone Descriptions and Codes			
Core Programs			
Criminal Thinking	Thinking for Change (T4C) Course Completion	T4C0100	1 week
Anger Management	Controlling Anger – Learning to Live with It (CALM) or Aggression Replacement Training (ART) Course Completion	CLM0100	1 week
eReader			
Education	Step Down Literature	IP10115	3 weeks
Male Community Reentry Program (MCRP)/Custody to Community Transitional Reentry Program (CCTRP) Community Prisoner Mother Program (CPMP)			
MCRP/CCTRP/CPMP	Each 3 months of program plan activities completed	ITRP100	3 weeks *R8
Rehabilitative Programs			
Rehabilitative Programs	Cognitive Behavioral Treatment – Anger Management	RP10200	2 weeks
Rehabilitative Programs	Cognitive Behavioral Treatment – Criminal Thinking	RP10300	2 weeks
Rehabilitative Programs	Cognitive Behavioral Treatment – Family Relationships	RP10400	2 weeks
SUDT	Cognitive Behavioral Treatment Substance Use Disorder – 3 Months	S030300	3 weeks *R3
SUDT	Cognitive Behavioral Treatment Substance Use Disorder – 5 Months	S040500	4 weeks *R3
SUDT	Cognitive Behavioral Treatment Substance Use Disorder – 6 Months	S050600	5 weeks *R3
Long Term Offender Program			
LTOP	Cognitive Behavioral Treatment – Substance Use Disorder	LT10100	4 weeks
LTOP	Cognitive Behavioral Treatment – Anger Management	LT10200	2 weeks
LTOP	Cognitive Behavioral Treatment – Criminal Thinking	LT10300	2 weeks
LTOP	Cognitive Behavioral Treatment – Family Relationships	LT10400	2 weeks
LTOP	Cognitive Behavioral Treatment – Victim Impact	LT10500	2 weeks
LTOP	Cognitive Behavioral Treatment – Denial Management	LT10600	2 weeks
Offender Mentor Certification Program / Recruit			
Offender Mentor Recruit	Cognitive Behavioral Treatment Substance Use Disorder – 5 Months	OM10100	4 weeks *R3
Offender Mentor Recruit	OMCP – Program Completion	OM10200	6 weeks *R3

*Effective 05/01/18

*R3 = Repeatable during new term

*R8 = Repeatable during same or new term for MCRP/CCTRP

Appendix F. MCCS (continued)

General Milestone Descriptions and Codes			
Alternatives to Violence Program (AVP)			
AVP	Basic and Advanced Completion	AV10500	1 week
AVP	Facilitator Training and Certification	AV10600	1 week
AVP	Lead Team Coordinator	AV10700	2 weeks
Certifications			
ARC	Addiction Recovery Counseling (ARC) Certification	RC10101	7 weeks
Culinary Arts	Culinary Arts Certification	FC10110	4 weeks
Waste-Water	Waste-Water Certificate-Grade 1	FC10301	8 weeks
Waste-Water	Waste-Water Certificate-Grade 2	FC10401	8 weeks
Water Treatment	Water Treatment Certificate – Grade 1	FC10501	8 weeks
Water Treatment	Water Treatment Certificate – Grade 2	FC10601	8 weeks
Distribution	Distribution Certificate – Grade 1	FC10700	1 week
Distribution	Distribution Certificate – Grade 2	FC10800	1 week
DSP	Each 3 months of program plan activities completed	DS10100	3 weeks *R7
Canine Programs			
NLK9	Course Completion	NL10100	8 weeks
Marley's Mutts	Course Completion	MM10100	6 weeks
POOCH	Course Completion	ILTG002	5 weeks
Firefighting (Camp)	Physical Fitness Training and Fire Training Program	FC10101	3 weeks
Firefighting (Camp)	Fire Brigade Training	FC10202	1 week
Firefighting (Camp)	Basic Helicopter S-271	FC10902	3 weeks
Firefighting (Camp)	Wildland Chain Saw Sawyer Level A	FC10901	3 weeks
Firefighting (Inst)	Basic Firefighter Block Training	FH10101	1 week
Firefighting (Inst)	State Fire Marshal-approved Firefighter 1 Training	FH10201	7 weeks
Firefighting (Inst)	First Responder Medical Training	FH10301	2 weeks

TPC Training System	Landscaping Maintenance	TPC3750	3 weeks
TPC Training System	Blueprint Reading for Welders	TPC4160	3 weeks
TPC Training System	Welding Principles	TPC4170	3 weeks
TPC Training System	Oxyfuel Operations	TPC4180	3 weeks
TPC Training System	Arc Welding Operations	TPC4190	3 weeks
TPC Training System	Cleaning Chemicals	TPC4510	3 weeks
TPC Training System	Floors and Floor Care Equipment	TPC4520	3 weeks
TPC Training System	Maintaining Floors and Other Surfaces	TPC4530	3 weeks
TPC Training System	Rest Room Care	TPC4540	3 weeks
TPC Training System	Carpet and Upholstery Care	TPC4550	3 weeks
Welding			
Am. Welding Society	MIG – GMAW-1	PWEL005	3 weeks
Am. Welding Society	TIG – GTAW-1	PWEL006	3 weeks
Am. Welding Society	TIG – GTAW-2	PWEL007	3 weeks
Am. Welding Society	TIG – GTAW-3	PWEL008	3 weeks

Appendix F. MCCS (continued)

Milestone Completion Credit Schedule			
Career Technical Education			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Career Technical Education Milestone Descriptions and Codes.			
Computer Repair			
COMPTIA	Core	V3003C0	3 weeks
COMPTIA	Level I	V3003L3	3 weeks
Graphic Arts			
Graphic Design	Graphic Design Core	V07C000	5 weeks
Graphic Design	Graphic Design Level I	V07L000	5 weeks
Horticulture/Landscaping			
Horticulture/Landscaping	Core	V3004C0	5 weeks
Academic Milestone Descriptions and Codes			
Academic Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Academic Milestone Descriptions and Codes.			
General Milestone Descriptions and Codes			
General Programs			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			
Rehabilitative Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) General Milestone Descriptions and Codes.			
Substance Abuse Transitions Pre-Release Program			
CSAP (CCF)	Course Completion	S020101	8 weeks
The Urban Ministry Institute (TUMI)			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			

Appendix F. MCCA (continued)

Academic Milestones Credit Earning Schedule			
Academic Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Academic Milestone Descriptions and Codes.			
English as a Second Language (ESL) Programs			
ESL	Beginning ESL I	COCESL5	3 weeks
ESL	Beginning ESL II	COCESL6	3 weeks
ESL	Intermediate ESL	COCESL7	3 weeks
ESL	Advanced ESL	COCESL8	3 weeks
Adult Education in Spanish Programs			
INEA	Primaria	COCINE4	3 weeks
INEA	Secundaria	COCINE2	3 weeks
COBACH	Colegio de Bachilleres	COCINE3	3 weeks

Cognitive Behavior Milestones Credit Earning Schedule			
General Programs			
Refer to Schedule 2 of the Milestone Completion Credit Schedule, titled Division of Adult Institutions (DAI) General Milestone Descriptions and Codes.			
Rehabilitative Programs			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) General Milestone Descriptions and Codes.			
Criminal Thinking	Thinking For A Change (T4C)	COCT4C2	3 weeks
Anger Management	Understand and Reducing Anger Feelings (TCU)	COCTCU2	3 weeks
Criminal Thinking	Unlock Your Thinking, Open Your Mind	COCUYT2	3 weeks
COCF Substance Abuse Program			
RDAP	Level I Course Completion	COCRD01	3 weeks *R6
RDAP	Level II Course Completion	COCRD02	3 weeks *R6
RDAP	Level III Course Completion	COCRD03	3 weeks *R6
RDAP	Level IV Course Completion	COCRD04	3 weeks *R6
RDAP	Level V Course Completion	COCRD05	3 weeks *R6
RDAP	Level VI Course Completion	COCRD06	3 weeks *R6

*R6 = Repeatable during new term Substance Abuse Programs

Appendix F. MCCA (continued)

Career Technical Education Milestones Credit Earning Schedule			
Refer to Schedule 1 of the Milestone Completion Credit Schedule, titled Division of Rehabilitative Programs (DRP) Career Technical Education Milestone Descriptions and Codes			
Gardening			
Master Gardener	Level I	COCGAR4	5 weeks
Horticulture/Landscaping			
Horticulture/Landscaping	Core	V3004C0	5 weeks
KY Workplace Essentials			
KY Workpl. Essentials	Business Reading	COCWPE5	1 week
KY Workpl. Essentials	Business Math	COCWPE6	1 week
KY Workpl. Essentials	Business Communication and Writing	COCWPE7	1 week
KY Workpl. Essentials	Employment Readiness	COCWPE8	1 week
