SEPTEMBER 15, 2022  
C-ROB REPORT

# CALIFORNIA REHABILITATION OVERSIGHT BOARD

Chairperson Amarik K. Singh, Inspector General

Kathleen Allison, Secretary, California Department of Corrections and Rehabilitation

Carolyn Zachry, Administrator, Adult Education Office, Career and College Transition Division  
(Designee for Tony Thurmond, State Superintendent of Public Instruction, California Department of Education)

Lebaron Woodyard, Ph.D., Dean of Academic Affairs, Educational Services and Support Division  
(Designee for Eloy Ortiz Oakley, Chancellor, California Community Colleges)

Jacey Cooper, Chief Deputy Director, California Department of Health Care Services  
(Designee for Michelle Baass, Director, California Department of Health Care Services)

Stephanie Clendenin, Director, California Department of State Hospitals

Alexa Sardina, Assistant Professor, California State University, Sacramento, Division of Criminal Justice

William F. Honsal, Sheriff, County of Humboldt  
(Appointee of the Governor)

William Arroyo, M.D., Mental Health Representative  
(Appointee of the Speaker of the Assembly)

Tamika Nelson, Chief Probation Officer, San Diego County  
(Appointee of the Senate Rule Committee)

## INTRODUCTION

---

The California Rehabilitation Oversight Board (C-ROB, or the board) was created to provide guidance and recommendations to the California Department of Corrections and Rehabilitation (the department) concerning its rehabilitation of incarcerated persons within the State's prison system and those who are released as parolees. The board's goal is to reduce recidivism when incarcerated persons are released into communities. This is the board's 23rd report, and as of September XX, 2022, approximately 97,000\* people are incarcerated in prisons within the department. Most of these individuals will eventually be released back into the communities of this State.<sup>1</sup> The Inspector General of the Office of the Inspector General (the OIG) sits as chairperson of the board and provides OIG staff to conduct reviews regarding the department's rehabilitation efforts and to aid in preparing this report.

[\*NOTE: This number is as of July 6. This will get updated to be the number from the most recent population report as of the publication date.]

## **C-ROB MEETINGS**

---

C-ROB held board meetings on September 10, 2021, March 10, 2022, and June 30, 2022. Additionally, the Board had one report-writing subcommittee meeting on August 25, 2022. During the board meetings, presentations were given by staff from the Division of Rehabilitative Programs (DRP), the Division of Adult Parole Operations (DAPO), the OIG, and the Department of Health Care Services (DHCS). DRP presented information concerning the rehabilitative budget for fiscal year 2021–22. DAPO gave a general update that included information on multiple new programs and initiatives. The OIG presented the road map for the 2022 C-ROB report as well as changes in the California State Penal Code related to both the board and the department. DHCS presented information regarding the California Advancing and Innovating Medi-Cal (CalAIM) and Justice Involved Initiative.

## BACKGROUND

---

C-ROB was established by California Assembly Bill 900, the Public Safety and Offender Rehabilitation Services Act of 2007 (the Act), and the board held its first meeting on June 19, 2007.<sup>2</sup> The Act was intended to address the serious problem of overcrowding in California's prisons and to improve rehabilitative outcomes among California's incarcerated people and parolees.

C-ROB is a multidisciplinary public board with members from various State and local entities. California Penal Code section 6141 mandates that C-ROB examine and report on rehabilitative programming provided to incarcerated people and parolees by the department. The board examines and reports on the implementation of an effective treatment model throughout the department, including evidence-based rehabilitative programming. According to statute, C-ROB must submit an annual report on September 15 to the Governor and the Legislature. This report must minimally include findings on the following:

- Effectiveness of treatment efforts,
- Rehabilitation needs of incarcerated individuals,
- Gaps in rehabilitation services, and
- Levels of incarcerated individuals' participation and success.

The board must also offer recommendations to the Governor and the Legislature with respect to the department modifying, adding, or eliminating rehabilitation and treatment programs and, in doing its work, use the findings and recommendations published by the Expert Panel on Adult Offender and Recidivism Reduction Programs.<sup>3</sup> The panel identified eight evidence-based principles and practices, collectively called the California Logic Model. This model shows what effective rehabilitation programming could look like if California implemented the panel's recommendations.

The panel produced evidence that supported the cost-effectiveness of rehabilitative programming. The California Logic Model's framework and implementation status is discussed in this report. The two overarching recommendations of the report by the panel were to reduce overcrowding in the department's institutions and parole offices, and to expand the department's system of positive reinforcements for incarcerated individuals who successfully complete their rehabilitation program requirements, comply with institutional rules in prison, and fulfill their parole obligations in the community.

## **Preparing This Report and Disclaimer**

The scope of this report is based on information and data requested from the department as well as research conducted on various rehabilitative practices and programs. The department's data reflect information concerning incarcerated individuals for the period of July 2021 through June 2022.

This information has not been audited by the board. The board does not make any representation as to the accuracy or materiality of the data received from the department. This report is not an audit, and there is no representation it was subject to government-auditing standards.

## CORRECTIONAL REHABILITATION

---

On July 1, 2005, the department changed its name from the California Department of Corrections to the California Department of Corrections and Rehabilitation pursuant to Senate Bill 737. Correctional rehabilitation in California has expanded exponentially since that time. Essentially, the “focus [of correctional rehabilitation] is not simply on lawbreakers but also on protecting society: by making offenders less criminal, fewer people will be victimized and society will, as a result, be safer.”<sup>4</sup>

The department’s vision reflects this objective of protecting society. The department states that its vision is to “enhance public safety and promote successful community reintegration through education, treatment, and active participation in rehabilitative and restorative justice programs.”<sup>5</sup>

Correctional rehabilitation practices have evolved, yet one tool that has continued to be used is the Risk–Need–Responsivity model.<sup>6</sup> The model discusses three core principles: *risk*, which is to match the level of care to the incarcerated person’s risk to reoffend; *need*, which is to assess criminogenic needs and target them in treatment; and *responsivity*, which is to maximize an incarcerated person’s ability to learn through the tailoring of intervention and learning style.

Eight basic criminogenic needs that can affect the rehabilitation of incarcerated individuals are:

- Antisocial personality pattern
- Criminal history
- Education/employment
- Family/marital
- Leisure/recreation
- Procriminal associates

- Procriminal attitudes
- Substance abuse<sup>7</sup>

Many entities, including the National Institutes of Health and the National Council on Crime and Delinquency, have recognized these eight criminogenic needs. All the needs listed, with the exception of criminal history, are dynamic and can have a negative impact on a person's likelihood to reoffend.

The department uses a variety of tools and programs to assess and respond to risks and needs. The fiscal year 2021–22 budget allotted DRP with approximately \$607.2 million in general funds. DRP broke down the use of this budget into four general areas: correctional education, in-prison programs, community reentry services, and administration. DRP is a major source of correctional rehabilitation programs; however, it is not the only source. Rehabilitation starts when a person arrives in prison and continues through their transition and reintegration into the community after release.

Along with DRP, the Office of Community Partnerships, DAPO, California Correctional Health Care Services (CCHCS), and the California Prison Industry Authority (CALPIA) all contribute to correctional rehabilitation. Rehabilitation programs provided by these entities help incarcerated persons gain knowledge, expertise, certifications, education, health care, and more.

A common industry practice used to measure correctional rehabilitation's performance is through studying recidivism rates. Although recidivism has not changed significantly in the last few years, as shown in the section of this report titled **Follow Up**, the department continues to make significant steps forward in correctional rehabilitation. The board hopes to see the effects of these changes in future recidivism reports.

## CALIFORNIA LOGIC MODEL

---

The department's goal, as addressed by the California Logic Model, is to ensure that incarcerated people identified as having moderate to high risk and needs receive evidence-based programming consistent with their criminogenic needs prior to release. This section describes the progress the department made in implementing the eight components of the California Logic Model during this reporting period. The following are the model's eight basic components:

- Assess high risk: Target incarcerated individuals who pose the highest risk to reoffend.
- Assess needs: Identify incarcerated individuals' criminogenic needs and dynamic risk factors.
- Develop behavior management plans: Utilize assessment results to develop an individualized case plan.
- Deliver programs: Deliver cognitive behavioral programs offering varying levels of duration and intensity.
- Measure progress: Periodically evaluate progress, update treatment plans, measure treatment gains, and determine appropriateness for program completion.
- Prepare for reentry: Develop a formal reentry plan prior to program completion to ensure a continuum of care.
- Reintegrate: Provide aftercare through collaboration with community providers.
- Follow up: Track incarcerated individuals and collect outcome data.

This report outlines each component and the rehabilitative efforts demonstrated in each area. Information about the department's efforts and performance in rehabilitation is organized in subsequent sections of this report corresponding to each component of the California Logic Model.

## ASSESS HIGH RISK

The department uses the results of the California Static Risk Assessment (CSRA) tool to assess an incarcerated person's risk to reoffend. The CSRA is completed during the start of an individual's incarceration. The CSRA uses an incarcerated person's past criminal history and characteristics to predict the static risk to reoffend; hence, the results do not change based on a person's rehabilitative programming. The only factors that may alter the results are age and changes in the person's criminal history.

Table 1 shows the number of incarcerated and paroled persons who received the CSRA, and of those, who received a moderate-to-high CSRA score in the past three fiscal years. New to this year's report, the data on the subset of persons in the Mental Health Services Delivery System (MHSDS) is included below. Consistent with previous years, as of June 30, 2022, 99 percent of incarcerated persons had received a CSRA. Similarly, the percentage of the incarcerated population with a moderate to high risk to reoffend has remained fairly consistent. Of the total incarcerated population receiving a moderate to high CSRA score, 14 percent of this group was also in the MHSDS. All paroled persons had received a CSRA, and 57 percent had a moderate to high risk to reoffend at the time of assessment.

**Table 1. Risk Assessments for Incarcerated and Parole Populations (2020–2022)**

	June 2020		June 2021		June 2022	
	Amount	Percentage	Amount	Percentage	Amount	Percentage
<b>Incarcerated population</b>	<b>112,249</b>	100%	<b>98,173</b>	100%	<b>97,391</b>	100%
Received CSRA	111,468	99%	95,943	98%	95,964	99%
Received moderate/high CSRA score	50,835	45%	39,353	40%	39,409	40%
Received CSRA and in MHSDS	—	—	—	—	32,485	33%
Received Moderate/high CSRA and in MHSDS	—	—	—	—	13,527	14%
<b>Paroled population</b>	<b>52,131</b>	100%	<b>49,927</b>	100%	<b>42,725</b>	100%
Received CSRA	51,410	99%	49,358	99%	42,725	100%
Received moderate/high CSRA score	29,039	56%	28,127	56%	24,431	57%

Source: All data were provided by the Division of Rehabilitative Programs. Data for the incarcerated population were provided as of June 30, 2020; June 30, 2021; and June 30, 2022. Paroled population data were provided as of June 30, 2020; July 1, 2021; and June 30, 2022.

## ASSESS NEEDS

---

The department uses two main assessments to determine in-prison needs. The Core Correctional Offender Management Profiling for Alternative Sanctions (Core COMPAS) is a needs-based assessment tool that determines the rehabilitative programming needs of incarcerated persons. The Comprehensive Adult Student Assessments System (CASAS), which is expected to replace the Test of Adult Basic Education (TABE®) by the end of the calendar year, assesses whether incarcerated persons have a need for education and determines their appropriate program placement. The department uses the Reentry COMPAS assessment during the reentry phase of the California Logical Model to assess postrelease needs.

Previously, the department assessed substance abuse using the Core COMPAS, but CCHCS has begun using tools developed by the National Institute on Drug Abuse (NIDA) and the American Society of Addiction Medicine (ASAM) to assess the rehabilitative need for substance use disorder treatment (SUDT) and the level of care required. Substance use dependency assessments and programs are discussed in the **Integrated Substance Use Disorder Treatment Program** section of this report.

### Core Correctional Offender Management Profiling for Alternative Sanctions

The Core Correctional Offender Management Profiling for Alternative Sanctions (COMPAS) assessment is given at the beginning of a person's incarceration during the reception process. The department uses the Core COMPAS to determine whether an incarcerated person has a need for rehabilitation in four areas: criminal personality, anger, employment, or support from family of origin. The scores indicate whether the incarcerated person has a low, moderate, or high need of rehabilitation in that area.

Incarcerated people are ineligible for the Core COMPAS assessment if they are designated at a mental health level of Enhanced Outpatient Program (EOP) or higher, are at a reception center and unclassified, are condemned, or are transgender or nonbinary. Ineligibility criteria are set by the department. The department is currently working on updating the Core COMPAS tool to remove bias, which will allow for transgender or nonbinary incarcerated persons to be assessed. Eligibility for the Core COMPAS assessment is determined at the time the assessment is given. A person's eligibility status can change at any time during the incarceration period.

As of June 30, 2022, 71,027 persons were eligible to receive a Core COMPAS assessment and of those eligible, 66,454 have completed the assessment. Of the completed assessments, 18,219 were persons in the MHSDS. An additional 22,321 incarcerated persons have completed the Core COMPAS assessment, but

their numbers are not reflected in the table below due to changes in eligibility status after completion of the assessment.

**Table 2. Administration of COMPAS Assessment for the Eligible and Classified Incarcerated Population (2020–2022), Including MHSDS Data for 2022**

	June 2020	June 2021	June 2022
<b>Eligible for Core COMPAS</b>	<b>90,209</b>	<b>84,856</b>	<b>71,027</b>
Completed Core COMPAS*	89,029	82,248	66,454
<b>In MHSDS and eligible for Core COMPAS</b>	<b>—</b>	<b>—</b>	<b>19,576</b>
In MHSDS and completed Core COMPAS*	—	—	18,219

\*The number of completed Core COMPAS assessments is of those who were eligible,

Source: Data as of June 30, 2020, 2021, and 2022, were provided by the Division of Rehabilitative Programs.

The rehabilitative needs of the incarcerated population with completed Core COMPAS assessments are shown for the past three years (see Table 3). The data were collected as of June 30 each year and show the distribution of low versus moderate and high needs in this population. This year's data include a subset of patients in the MHSDS, and the numbers indicate that moderate to high needs tend to be slightly higher among those who are in the mental health system.

**Table 3. Rehabilitative Needs of Incarcerated Persons Determined by COMPAS Assessment (2020–22), Including MHSDS Data for 2022**

Rehabilitative Need	Need Level	June 2020	June 2021	June 2022	
				All	MHSDS
Criminal personality	Low	57.7%	57.5%	57.1%	49.5%
	Mod/High	42.2%	42.5%	42.9%	50.5%
Anger	Low	48.3%	47.7%	47.4%	41.1%
	Mod/High	51.7%	52.3%	52.6%	58.9%
Employment problems	Low	62.0%	61.7%	61.4%	55.4%
	Mod/High	38.0%	38.3%	38.6%	44.6%
Support from family of origin	Low	76.5%	76.4%	75.5%	69.1%
	Mod/High	23.5%	23.6%	24.5%	30.9%

Source: Data as of June 30, 2020, 2021, and 2022, provided by the Division of Rehabilitative Programs.

## **Comprehensive Adult Student Assessment Systems**

The department has used the TABE® at the beginning of a person's incarceration to test reading levels and to determine an incarcerated person's educational needs. The department is switching the initial assessment to be the Comprehensive Adult Student Assessment Systems (CASAS) test, which has been given upon assignment to education. The CASAS requires less time to administer, resulting in less test fatigue and more accurate scores. Since the CASAS and TABE® both test for the same types of academic standards, performance expectations, and grade-level equivalents, the department is switching solely to the CASAS to reduce duplicative testing, and the amount of time and work spent administering the test. The complete transition to administering CASAS during reception is expected to occur by the end of 2022.

The CASAS test categorizes students with a need for education into one of four levels according to their reading ability. Adult Basic Education I (ABE I) is for students who score from 0.0 to 3.9, Adult Basic Education II (ABE II) is for students who score from 4.0 to 6.9, and Adult Basic Education III (ABE III) is for students who score from 7.0 to 8.9. General Education Development (GED) is for students who score 9.0 and above.

## **Reentry Correctional Offender Management Profiling for Alternative Sanctions**

Incarcerated individuals who are within seven months of release are eligible for a Reentry Correctional Offender Management Profiling for Alternative Sanctions (COMPAS). The Reentry COMPAS is managed by the Community Transition Program whose mission is to pair those incarcerated persons who demonstrate the highest risk levels with a community program that addresses their assessed needs. The resulting scores from this assessment are used to guide programming decisions upon parole.

In fiscal year 2021–22, the parolee population continued to decrease. As of June 30, 2022, 94.6 percent of parolees received a Reentry COMPAS assessment (see Table 4, next page). The distribution of rehabilitative need among the parolee population as identified by the COMPAS has remained steady over the past few years (see Table 5, next page). Moderate to high levels of need were highest for Reentry Substance Abuse at 58.5 percent, followed by Reentry Financial need at 46.1 percent, and Reentry Employment Expectations at 45.4 percent.

**Table 4. Parole Reentry COMPAS Assessments (2020–2022)**

	June 2020	June 2021	June 2022
Parolee population	52,131	49,927	42,725
Received COMPAS	50,111	47,588	40,403
Percent received	96.1%	95.3%	94.6%

Source: Data as of June 30, 2020, 2021, and 2022 provided by the Division of Rehabilitative Programs.

**Table 5. Rehabilitative Needs of Parolees Based on Reentry COMPAS (2020–2022)**

Rehabilitative Need	Need Level	June 2020	June 2021	June 2022
Reentry Substance Abuse	Low	44.4%	42.6%	41.5%
	Mod/High	55.6%	57.4%	58.5%
Criminal Thinking Observation	Low	85.9%	85.8%	86.8%
	Mod/High	14.1%	14.2%	13.2%
Negative Social Cognitions	Low	81.7%	81.5%	81.3%
	Mod/High	18.3%	18.5%	18.7%
Reentry Financial	Low	51.2%	52.7%	53.9%
	Mod/High	48.8%	47.3%	46.1%
Reentry Employment Expectations	Low	52.4%	53.5%	54.6%
	Mod/High	47.6%	46.5%	45.4%
Reentry Residential Instability	Low	60.8%	60.0%	58.9%
	Mod/High	39.2%	40.0%	41.1%

Source: Data as of June 30, 2020, 2021, and 2022 provided by the Division of Rehabilitative Programs.

## **DEVELOP BEHAVIOR MANAGEMENT PLANS**

---

In March 2020, the department began utilizing the Rehabilitative Case Plan Study (RCPS) and recording the plan in the Strategic Offender Management System (SOMS) database to manage rehabilitative case planning. If members of the incarcerated population completed the risk and needs assessment, they met with institutional staff to create a rehabilitative case plan (Appendix A). The RCPS is a tool that correctional counselors and institutional classification committees used to view and document information such as self-assessment guides and summaries of courses and programs available. After staff reviewed the RCPS, the incarcerated person was put on waitlists for programs that were relevant to that individual's needs, and once enrolled, the RCPS also tracked the person's progress. The department has continued its development of additional case management tools and trainings for staff.

## DELIVER PROGRAMS

---

Rehabilitative programs are an integral part of the correctional rehabilitative process. Many entities provide programs to the incarcerated population. The programs range from activity groups to evidence-based therapy and treatments to employment and education. The department has expanded rehabilitative programs exponentially in the last decade.

In March 2020, due to the high rates of infection of the novel coronavirus pandemic (COVID-19), the department switched to in-cell programming. Completion and participation rates subsequently dropped significantly for most programs. In September 2020, a phased reopening for rehabilitation was implemented and since then, most institutions have reinstated in-person programs. The department continues to monitor COVID-19 cases and will reinstate precautionary measures as needed.

The education and ISUDT program capacities shown in Table 6 reflect the number of incarcerated persons that evidence-based programs can accommodate in a year. The total capacity of all programs has increased to 87,268 persons, academic education capacity has increased slightly, and career technical education capacity has remained mostly unchanged. The data also reflect the transition from the in-prison substance abuse and cognitive behavioral treatment programs to the ISUDT program and its three levels of care.

Enrollment capacity for Cognitive Behavioral Intervention (CBI)-Intensive Outpatient level of care was at its highest level as of June 30, 2021. In May 2021, CBI-Intensive Outpatient participants were transferred to the CBI-Outpatient program; as a result, annual program capacities are provided only for CBI-Outpatient and CBI-Life Skills. As of June 30, 2022, the capacity for CBI-Outpatient was 14,407 patients and the capacity for CBI-Life Skills was 16,329 patients, each showing a significant increase in capacity compared with figures from the previous fiscal year.

**Table 6. Adult Rehabilitative Annual Program Capacity (2020–2022)**

Rehabilitative Program	June 2020	June 2021	June 2022
Academic Education	44,901	44,268	45,852
Career Technical Education	10,719	10,665	10,680
In-Prison Substance Abuse	5,592	—	—
In-Prison Cognitive Behavioral Treatment:			
<i>Anger Management</i>	3,792	—	—
<i>Criminal Thinking</i>	3,840	—	—

## Proposition 57 – Public Safety and Rehabilitation Act of 2016

In November 2016, California passed Proposition 57, the California Parole for Non-Violent Criminals and Juvenile Court Trial Requirements Initiative, requiring the department to adopt regulations implementing new parole and sentence credit provisions to enhance public safety, and authorizing the department to award sentence credits for rehabilitative achievement, good conduct, or educational merit. The department continues to offer rehabilitative achievement credits, good conduct credits, educational merit credits, and milestone credits to incarcerated individuals.

Three types of credits are designed for rehabilitative programming which award incarcerated persons with days off their sentence. Educational Merit Credits (EMC) can award 180 calendar days for the completion of high school diploma or equivalency programs, higher education degrees, or the Offender Mentor Certification Program. Milestone Completion Credits (MCC) are awarded for successful completion of rehabilitative or educational programs designed to prepare individuals for employment upon release. MCC may be awarded in no less than one-week, but no more than 12-week increments in a 12-month period. The full Milestone Completion Credit Schedule can be found on the department's

website.<sup>8</sup> Rehabilitative Achievement Credits (RAC) may award 10 days to individuals who complete 52 hours of approved self-help and volunteer public service programs.

Effective May 2021, the department enacted many credit-earning rate changes as an emergency regulation change. Notably, persons categorized as violent offenders pursuant to Penal Code section 667.5(c), began earning 33.3 percent (one day of credit for every two days served). Additionally, offenders serving time for nonviolent second strikes were to earn a rate of 66.6 percent (two days of credit for every one day served) compared with 50 percent (one day of credit for every one day served), but the 66.6 percent increase was not adopted.

As of the publication of this report, three lawsuits have been filed in response to the emergency regulations. The first, filed in May 2021 shortly after the changes took effect, was by a group of California district attorneys who filed a lawsuit in Sacramento County Superior Court. They requested, among other things, a judicial declaration invalidating the regulations for being improperly adopted. The district attorneys have been dismissed as plaintiffs and two victims' advocacy groups have been added as plaintiffs. The lawsuit remains open. The second lawsuit filed in December 2021 also by district attorneys, was dismissed by the district attorneys in court. The third was filed in early 2022 by a victims' advocacy group and two victims. They are seeking a judicial declaration, among other things, invalidating the regulation as well as the two readoptions of the regulations. This case is still open. The board will provide an update for the open cases in the next report.

Between July 2021 and June 2022, the department released 18,581 incarcerated persons due to earned credits authorized by Proposition 57 that advanced their release dates. According to the department, these individuals, excluding those released from fire camps, earned an estimated average of 215.3 days of additional credit.

As shown in Table 7, the department awarded a total of 354,510 days in EMC, 1,251,376 days in MCC, and 142,330 days in RAC.

## Program Grants

The State Budget Act of 2019 included funding for three types of prison programming grants. The purpose of these grants was to assist programs that provide or focus on individual responsibility, restorative justice, victim impact, reentry, or enrichment. Grants were awarded at the start of the cycle, and grantees received funding each year to provide their program(s) over a two- or three-year cycle, depending on the type of grant.

The grant funding for the Innovative Programming, Victim Impact, and California Reentry Enrichment grants was set to end in April 2022. Subsequently, the department elected to continue these grants through the Inmate Welfare Fund or through general funds and the Budget Act of 2022 provided funding for a new grant, the Rehabilitative Investment Grants for Healing and Transformation.

### Innovative Programming Grants

Innovative programming grant (IPG) eligibility includes nonprofit organizations that currently provide programs in an adult correctional setting, that have demonstrated success, and that focus on individual responsibility and the principles of restorative justice.

The department requested input from DAI and CCHCS to identify the target populations or underserved institutions for innovative programming grants. The request for applications listed five targets:

- Programmatically underserved institutions
- Level IV 180-design facilities
- Nondesignated programming facilities
- Enhanced outpatient (EOP) programs
- Youth programs

Applicants were permitted to submit a single grant application for a program that would be offered at one or more prison locations. Applicants specified at which institutions or yards the program would be located.

For fiscal year 2022–23, 44 grants were awarded, totaling approximately \$12 million in grant funding over a three-year period.

### *Victim Impact Grants*

Victim Impact Grants fund programs that deliver victim-focused services. DRP released an initial request for application (RFA) in July 2019 for programs that focused on victim impact. In addition, the Office of Victim and Survivor Rights and Services (OVSRS) released an RFA in July 2019 for programs that focused on Victim Offender Dialogue. Eligibility for both RFAs was open to nonprofit organizations that have demonstrated success and provide victim impact programs in an adult correctional setting. Applicant organization programs should also focus on individual responsibility and restorative justice principles. In November 2019, DRP awarded a total of 23 program awards to 12 applicants to provide programming at 14 institutions. In September 2019, OVSRS awarded funds to four applicants providing services throughout the State of California.

For fiscal year 2022–23, 12 programs have been awarded funding, totaling approximately \$2 million over a two-year period.

### **California Reentry and Enrichment Grants**

The Budget Act of 2019 awarded an additional \$5 million to California Reentry and Enrichment (CARE) grants. Senate Bill 94 added section 5007.3 to the California Penal Code that required the department to develop a 10-member CARE grant steering committee in consultation with the Legislature.

The steering committee was established in February 2020. Utilizing a steering committee to award grant funds for rehabilitative programs was a new process for DRP. Eligibility is available to nonprofit organizations that currently provide programs in adult correctional facilities, that have demonstrated success, and that focus on healing programs, insight-oriented restorative justice, and transformative justice.

In total for fiscal year 2022–23, 79 programs have been awarded CARE grants, totaling approximately \$15 million over a three-year period.

### **Rehabilitative Investment Grants for Healing and Transformation**

The Budget Act of 2022 included \$20 million allocated for the Rehabilitative Investment Grants for Healing and Transformation (RIGHT). Eligibility is open to nonprofit organizations that have provided in-prison rehabilitative programming within three to five years prior to submission of their application. The purpose of the funding is to support the development and delivery of in-

prison programming, which can include research and program development, efficacy and delivery, training, and technology. DRP intends to release a request for applications by October 2022.

## Academic Education Programs

Academic education programs are run by OCE, a subdivision of DRP. The educational program offers students at every learning level an opportunity to gain a high school diploma or equivalency, as well as associate's and bachelor's degrees. In addition, these programs provide career and technical education (CTE), which offers students certificates and knowledge in career trades. The department is continuously making efforts to better its offerings in correctional education.

In early January 2020, the department changed the existing general population, voluntary, and alternative education programming to a new delivery model that

Past and Current Education Models	
<i>Before January 2020</i>	<i>January 2020 to Present</i>
General Population	Traditional Education
Voluntary Education	Postsecondary/Continuing Education
Alternative Education	Alternative Education
27 Students per Class	18 Students per Class

consisted of traditional education, postsecondary and continuing education, and an updated format of alternative education. In addition to the change in delivery models, class times and class student capacity levels were reduced. These changes allowed for more one-on-one time and focused teaching compared with the previous education model (see text box below).

The department received funding in the 2021 Budget Act to establish a cloud network for up to 5,000 concurrent users, as well as funding to purchase 37,000 laptops for students to use in accessing rehabilitative programming. Students will have the ability to check out the laptops from their instructors and will have access to content available on the DRP Learning Network. The department has distributed approximately 2,200 laptops, and over 65 courses were administered via the Canvas Learning Management System for the spring 2022 semester. An additional 6,600 laptops for college students are scheduled to be delivered and available in time for use during the fall 2022 semester with over 200 courses in

the Canvas Learning Management System. In the future, the department expects to roll out additional laptops for all academic education programs.

The network redesign to increase bandwidth at each institution was ongoing during fiscal year 2021–22. The network redesign will expand the number of concurrent devices, provide dedicated circuits for incarcerated-person network traffic, and expand access to the department’s virtual cloud environment. The department has planned to continue this project into fiscal year 2022–23 and will support the use of laptops and rehabilitative content in classrooms or common Wi-Fi areas.

## **Traditional Education**

The Traditional Education program consists of Adult Basic Education (ABE) and Adult Secondary Education (ASE). As discussed in the Assess Needs section of this report, students are assigned to participate in education if a need is determined through the TABE® assessment.

In February 2022, OCE implemented the Student Support Services Program. The department states this program reflects current practices in education standards. This program replaced the previous Disability Placement Program (DPP), Developmental Disability Program (DDP), and the Enhanced Outpatient Program (EOP). Previously, OCE had special education teachers who assisted students designated as DPP and DDP. The EOP program was separate from that program and was a program for students designated as EOP. The new Student Support Services model assists DDP and DPP students as well as EOP students who are now in regular ABE classes. The instructor is now a Resource Specialist Program teacher.

Students who are assessed at a reading level at or below the seventh-grade level are enrolled into Adult Basic Education (ABE) I or II. The goal is for them to increase their literacy and math levels, so they can prepare for a high school diploma or enroll in equivalency classes. For students reading at or above the eighth-grade level, the focus is to help them earn a high school diploma or equivalency through the ABE III, General Education Development (GED), or High School Diploma (HSD) education models.

The department provides the GED assessment to incarcerated persons who possess neither a high school diploma nor a high school equivalency certificate. Students enrolled in a GED program are provided with subject matter lessons in preparation for the GED assessment.

While academic achievements in all areas of traditional education have increased compared with the previous fiscal year (see Table 8), COVID-19 continues to have an impact on operations and staffing levels. The department continues to adjust its approaches to traditional education; however, more time is needed for achievements to approach prepandemic levels observed in fiscal year 2018–19.

**Table 8. Achievements in Traditional Education (Fiscal Years 2019–20, 2020–21, 2021–22)**

Academic Achievements	FY 2018–19	FY 2019–20	FY 2020–21	FY 2021–22
CASAS Benchmarks	14,836	9,285	6,346	8,091
High School Equivalency Subtests Passed	3,007	1,832	445	1,406
High School Equivalency Completions	2,952	1,716	567	1,111
High School Diplomas	271	262	198	204

Academic Achievements	FY 2019–20	FY 2020–21	FY 2021–22
CASAS Benchmarks	9,285	6,346	8,091
High School Equivalency Subtests Passed	1,832	445	1,406
High School Equivalency Completions	1,716	567	1,111
High School Diplomas	262	198	204

Source: Data provided by the Division of Rehabilitative Programs.

### Postsecondary and Continuing Education

The department offers correspondence college programs as well as face-to-face college programs. College programs offer degrees up to the bachelor level. The department is in the process of bringing back face-to-face college programs that were switched to correspondence during the pandemic. During the reporting period, face-to-face college programs were available at 21 institutions and four fire-camp sites.

Six institutions have a bachelor's degree program available to eligible students; students must obtain an associate degree for transfer and apply to the university (shown below). There are currently no master's degree programs provided by institutions, but master's degrees can be pursued by incarcerated individuals on their own.

CDCR Institution	College/University
Folsom State Prison Mule Creek State Prison	California State University, Sacramento
Valley State Prison Central California Women's Facility	California State University, Fresno
California State Prison, Los Angeles (Lancaster)	California State University, Los Angeles
California Rehabilitation Center	Pitzer College

All three of the state college systems—the California Community Colleges, the California State University System, and the University of California system—offer a program that provides support for college students as they transition from incarceration. This process reduces the amount of time it takes for a student to resume taking college courses in the community. These programs also provide a variety of assistance to transitioning students, including support with registration, housing, and employment.

As shown in Table 9, there were 24 percent more college course completions compared with the previous fiscal year, but completions were roughly half of those completed two fiscal years prior. Nonetheless, the number of college degrees earned in fiscal year 2021–22 has mostly surpassed numbers seen in the year or two leading up to the pandemic. It is encouraging that 647 associate in arts (AA) degrees, 21 bachelor of arts (BA) degrees, and nine master of arts (MA) degrees were awarded. The number of AA degrees increased by 66 percent over the previous fiscal year, and BA degrees increased by 133 percent. It will be interesting to see how the provision of laptop computers and improved access to higher education will impact these numbers in the future.

**Table 9. Achievements in Postsecondary and Continuing Education (Fiscal Year 2021–22)**

Academic Achievements	FY 2019–20	FY 2020–21	FY 2021–22
College Course Completions	27,455	12,072	14,957
AA Degrees Earned	349	391	647
BA Degrees Earned	8	9	21
MA Degrees Earned	3	1	9

### Career Technical Education Programs

CTE programs provide training and certifications in various trades that include cosmetology, computer and related technology, HVAC, masonry, plumbing, and welding. The programs are designed to provide entry-level skills in these trades. The programs vary in length, but all have the ultimate goal of students obtaining industry-recognized certifications.

In 2006, CTE expanded its offerings with the help of CALPIA, which provided additional trade certification programs. The CALPIA CTE program began as a pre-apprenticeship program with instruction given by journeymen instructors under contract from local trade labor unions. Participants who perform well in the program have a better chance of enrolling in a union apprenticeship program once they are released from prison. CALPIA offers 21 CTE programs among seven locations, including preapprentice carpentry, preapprentice construction labor, pre-apprentice iron working, commercial diving, facilities maintenance, AutoCAD (Computer-Aided Design), Code.7370 (computer coding), and culinary skills.

The department has also begun implementing new CTE programs such as Micro Homes Advanced Construction to adapt to rapidly growing trades. This program is not an entry-level program, unlike other CTE programs. Micro Homes Advanced Construction is an advanced training program for those who have graduated from any of the four building and construction programs. Upon graduating with a certification for electrician, HVAC technician, plumber, or carpenter, the instructor can submit a recommendation for the graduate to be eligible for this advanced training. Under the leadership and supervision of the CTE instructor, students in this program work collaboratively in teams of four to train in their specialties while working on six homes simultaneously. Training and

materials are provided by nonprofit partners who will use the completed micro homes to help address housing problems in California.

In June 2022, CTE was operational in 34 institutions. The department states although there are no eligibility requirements for the majority of CTE programs, those who are within five years of release are prioritized. A variety of factors such as risks, needs, and interest are also considered when assigning a student to the program.

Each CTE course has components that must be completed before finishing the course and obtaining a certification. For a teacher to award program completion certificates, most trades require students to physically demonstrate skill mastery. Students were also able to complete CTE coursework via independent study but were largely unable to participate in hands-on skill development during the pandemic.

In fiscal year 2021–22, CTE completions were increasing compared with the previous fiscal year yet were still falling short of regular levels due to COVID-19 measures. As shown in Table 10, 5,933 CTE components were completed, 1,496 CTE programs were completed, and 1,702 CTE industry certifications were awarded this past fiscal year.

**Table 10. CTE Achievements (Fiscal Years 2019–20, 2020–21, 2021–22)**

CTE Achievements	FY 2019–20	FY 2020–21	FY 2021–22
CTE Component Completions	11,564	2,315	5,933
CTE Program Completions	2,432	1,369	1,496
CTE Industry Certifications*	6,622	938	1,702

\*CTE industry certifications without component or program completion.

## Integrated Substance Use Disorder Treatment Program

At the end of 2019, the department moved away from the cognitive behavioral treatment model and replaced it with a cognitive behavioral interventions (CBI) model that was to be an integral part of substance use disorder treatment (SUDT). The department also replaced previous curricula with comprehensive and evidence-based curricula that addresses the needs of incarcerated individuals with a substance use disorder (SUD). The revamped program was then renamed the Integrated Substance Use Disorder Treatment (ISUDT) program.

In January 2020, the department began implementing the ISUDT program in all 34 prisons; however, by early spring, major adjustments were required due to the COVID-19 pandemic. CBI programming was performed through packets rather than in person, and aspects of the new program such as supportive housing were

put on hold as space availability faced challenges due to the need for quarantine and isolation areas. Maintaining staffing levels was also problematic due to infection rates and demands related to the COVID-19 pandemic. As modified programming was implemented, in-person CBI resumed, and as of July 2022, institutions are in the process of designating units for supportive housing to accommodate past and present ISUDT participants. As space allows, the department intends to accommodate anyone interested in education and other rehabilitation and recovery programs.

The ISUDT program employs a collaborative approach between medical and nonmedical staff to reduce drug-related illness and death during incarceration and the transition to reentry, as well as to reduce recidivism. In addition to the staff required to run the program, each institution has a multidisciplinary ISUDT Steering Committee that meets monthly to assess the program and troubleshoot issues, and change ambassadors are tasked with cultural promotion of the program. Support is also provided with communications and outreach that are achieved through e-magazines, websites, and newsletters.

SUD affects one's health, relationships, housing, employment, and other aspects of life that are important for successful integration into the community. The program identified and prioritized incarcerated individuals at risk for harm related to SUD and provided treatment to reduce the risk of overdose and other conditions.

The program consists of five elements:

- SUD screening and assessment
- Medication-assisted treatment (MAT)
- CBI
- Supportive housing
- Enhanced prerelease planning and transition services<sup>9</sup>

Incarcerated persons can begin participating in the ISUDT program in several ways. Program placement was prioritized for individuals who were already receiving MAT, who were at a high risk of SUD based on their medical history, or who were within 15 to 18 months of release or a parole suitability hearing. In addition, individuals who did not meet the above criteria could request to be medically evaluated for treatment by submitting a health care request form. The screening and assessment steps were performed by health care staff.

---

<sup>9</sup> “Transforming Substance Use Disorder Treatment in California’s Prison System: Impacts of the Integrated Substance Use Disorder Treatment Program, April 2022,” California Correctional Health Care Services, accessed July 18, 2022, <https://cchcs.ca.gov/wp-content/uploads/sites/60/ISUDT/Impacts-ISUDT-Program2019-22.pdf>.

During the screening process, health care staff used questions developed by the National Institute on Drug Abuse (NIDA). Positive results indicated a possible need for SUDT whereas negative results indicated no current need for SUDT. During the past fiscal year, 8,157 out of 53,384 individuals screened for SUDT (15 percent) answered in the positive (Table 12) and were next assessed by staff for treatment. Table 11 breaks down screening outcomes from the past fiscal year by mental health classification: general population, Correctional Clinical Case Management System, Enhanced Outpatient, and Higher Level of Care. HLOC encompasses patients who require the highest level of care, such as acute care and inpatient mental health care.

**Table 11. ISUDT Screening Results by Mental Health Classification (Fiscal Year 2021–22)**

<b>NIDA Quick Screen Result</b>	<b>GP</b>	<b>CCCMS</b>	<b>EOP</b>	<b>HLOC</b>	<b>Total</b>
Positive	5,007	2,510	594	46	8,157
Negative	33,954	8,977	2,185	111	45,227
<b>Total</b>					<b>53,384</b>

Note: General population (GP), Correctional Clinical Case Management System (CCCMS), Enhanced Outpatient (EOP), and Higher Level of Care (HLOC).

Source: Data provided by California Correctional Health Care Services.

Incarcerated persons with positive screening results or other indications of SUD were then evaluated using a more comprehensive assessment that applied standard criteria managed by the American Society for Addiction Medicine (ASAM). The ASAM suite of assessments is a set of tools that determine an individual’s initial and ongoing treatment needs (ASAM Co-Triage), their anticipated needs upon release (ASAM RISE), and their treatment needs if the patient is not improving (ASAM Continuum).

The ASAM was used by medical staff to assist in program placement (see Table 12, next page). In fiscal year 2021–22, 17,150 cases were enrolled in ISUDT. This population included the 8,157 persons referred from the screening process as well as individuals who bypassed the screening step because of a high-risk substance use event. Participants who were screened prior to July 1, 2021, and were pending assessment were also included in this past fiscal year’s assessments.

**Table 12. ISUDT Level of Care as Determined by ASAM Assessment (Fiscal Year 2021–22)**

Level of Care	GP	CCCMS	EOP	HLOC	Total
Intensive Outpatient (ISI)	2,505	1,978	385	64	4,932
Outpatient (ISO)	5,677	3,916	709	94	10,396
Life Skills (CBI 2)	1,271	452	87	12	1,822
<b>Total</b>					<b>17,150</b>

Note: General population (GP), Correctional Clinical Case Management System (CCCMS), Enhanced Outpatient (EOP), and Higher Level of Care (HLOC).

Source: Data provided by California Correctional Health Care Services.

Treatment in the Intensive Outpatient and Outpatient levels of care could include MAT, as clinically indicated, for participants with opioid use disorder or alcohol use disorder. MAT could be used for a set period of time or as long-term treatment, under the guidance of a treatment provider. During fiscal year 2021–22, 21,509 patients received MAT, and 4,497 patients were released from prison while on MAT.

Three levels of standardized, evidence-based care were offered throughout all institutions: Intensive Outpatient (ISI), Outpatient (ISO), and Life Skills (CBI 2). SUD participants were placed in the ISO level of care, and those who were not progressing well or whose condition was worsening were assigned to ISI. CBI was integrated into the program to help change patterns of negative thoughts and behavior; reduce substance use, abuse, and dependency; and improve opportunities for success upon release. Participants requiring SUDT participated in CBI after they completed the 14-week-long ISI or ISO program. For those individuals who did not require a SUD program such as ISI or ISO, CBI could be taken alone as CBI 2. Participants who completed CBI were also awarded MCC.

The programs are organized as follows:

- Intensive Outpatient (ISI): Two hours per day, five days per week, for 14 weeks and licensed clinical social worker-led cognitive behavioral therapy in two-hour sessions, two days per week, for 90 days, followed by seven months of CBI 2.
- Outpatient (ISO): Two hours per day, three days per week, for 14 weeks, followed by seven months of CBI 2.
- CBI – Life Skills (CBI 2): CBI for two hours per day, three days per week, for approximately seven months.

As shown in Table 13 below, 3,346 patients completed an in-prison ISUDT program in fiscal year 2021–22, the majority of whom were enrolled in the ISO program.

Table 14 is a monthly summation of ISUDT program exits in terms of program completion. Participants could exit a program due to program completion or other reasons, such as transfer to another institution, refusal to attend the program once assigned, behavioral issues necessitating removal from the program, or other issues. In fiscal year 2021–22, completion of in-prison programs generally increased steadily each month, with the exceptions of January and February 2022. Completion rates were lower during these two months due to a surge in COVID-19 cases and the system-wide transition of SUD programming to a 14-week model to accommodate more participants. The number of participants completing and exiting the program more than doubled from 521 participants in May to 1,139 participants in June 2022. Furthermore, monthly completion rates for program exits have generally increased over the fiscal year and were at their highest at 86 percent in June 2022.

**Table 13. In-Prison ISUDT Program Completion (Fiscal Year 2021–22)**

Program Type	Program Completions*
ISI	0
ISO	2,401
CBI 2	945
<b>Total</b>	<b>3,346</b>

\* "Program Completions" are defined as participants who are unassigned from CBI classes with a status of "Completed" or "Unassigned" and a reason of "Program Completion" during FY 2021–22.

Source: Data provided by California Correctional Health Care Services.

**Table 14. In-Prison ISUDT Program Completion Rates (Fiscal Year 2021–22)**

Month	Program Completed	Program Not Completed	Percentage Completed
July 2021	88	260	25%
August 2021	61	178	26%
September 2021	102	205	33%
October 2021	137	132	51%
November 2021	109	95	53%
December 2021	188	108	64%
January 2022	48	171	22%
February 2022	138	191	42%
March 2022	449	137	77%
April 2022	366	174	68%
May 2022	521	141	79%
June 2022	1,139	178	86%
<b>TOTAL</b>	<b>3,346</b>	<b>1,970</b>	<b>63%</b>

The department has planned for the ISUDT program to include an in-prison aftercare program that is needed to address continuity of care. It will be implemented in the future for participants who have completed the program, but who are not yet released from prison. The purpose of the program is to provide a less intensive program in which participants can practice and strengthen their coping skills, communication skills, relapse prevention, and healthy living habits. The program is in the nascent stages, and implementation will be focused on institutions with the highest need. Plans for in-prison supportive housing units are also underway and will provide safety and staff support for incarcerated persons who want to live in an environment that supports rehabilitation.

Finally, the enhanced prerelease planning and transition process has been in place with the goal of facilitating a safe and smooth transition to the community. The prerelease planning and transition process is discussed in the **Prepare for Reentry** section of this report.

### **ISUDT – Future Departmental Plans**

The ISUDT program is continuing to expand to full implementation, at which time access to SUDT will be available to the entire population. The next phase of the program will introduce supportive housing units and in-prison aftercare.

Participation in the in-prison aftercare program will generally begin after a patient has completed the SUD and/or CBI program, but aftercare may also be available for persons on the waitlist who have not begun programming. The content will be given as a 12-week packet program with a one-hour weekly group session that is facilitated by an Alcohol and Other Drug (AOD) counselor. The aftercare program will employ 45 additional contracted AOD counselors and six supervising counselors to serve 13,260 indeterminate sentenced individuals who have completed the CBI-SUD program but will not be released soon.

Supportive housing units are being created by the department to provide a safe living environment that can support rehabilitative programming in every institution. In-prison SUD aftercare participants will also have access to peer mentors in the supportive housing units. Although the project was interrupted due to the pandemic, the department has been refining eligibility requirements for supportive housing, and the program is anticipated to resume in the summer or fall of 2022. Supportive housing will be prioritized for MAT and other ISUDT participants, and the department is in the process of training staff and ensuring compliance with the Americans with Disabilities Act, the medical needs of residents, and the mental health and developmental needs of residents.

CCHCS created a dashboard<sup>10</sup> to track various ISUDT performance indicators. The dashboard is updated daily and tracks screening, assessment, and treatment progress as well as delivery of MAT, CBI, and SUDT, and monthly overdose hospitalizations. Future dashboard data tabs will include supportive housing and the enhanced prerelease transition program.

## **Offender Mentor Certification Program**

The Offender Mentor Certification Program (OMCP), created by the department, provides long-term offenders and individuals serving life without the possibility of parole with education, training, and the opportunity to earn certification in AOD counseling from an organization recognized and approved by DHCS.

The approximately one-year-long OMCP training consisted of three phases: trainee, intern, and certified mentor. Participants completed a CBI intensive outpatient program, received 350 hours of formal classroom AOD education, completed 255 hours of practicum training, and took an AOD certification exam. Upon AOD certification, they returned to their original institutions and were able to cofacilitate CBI groups as mentors. All three phases of the program were treated as job assignments for which the incarcerated individual was compensated.

The department initially delayed the OMCP expansion in response to the pandemic, but it has expanded it to seven facilities as of fiscal year 2021–22. Incarcerated individuals are recruited from institutions statewide, and then

---

<sup>10</sup> “ISUDT Program Overview,” California Correctional Health Care Services, <https://cchcs.ca.gov/isudt/dashboard/>.

transferred to one of seven training sites. The new programs have assembled cohorts and begun programming.

As of July 1, 2022, there were 70 OMCP certified mentors, 71 participants in the OMCP intern program, and 147 participants in the OMCP trainee program. This was an increase of 10 mentors, 11 interns, and 95 trainees, respectively, as compared with the same count from July 1, 2021.

**Table 15. Offender Mentor Certification Program (2021–2022)**

OMCP Phase	July 2021	July 2022
Trainee	52	147
Intern	60	71
Certified mentor	60	70

## California Prison Industry Authority

CALPIA was established in 1983 as a self-supporting work training and production program led by 11 members who serve on the Prison Industry Board. CALPIA offers programming at all departmental institutions throughout the state, as shown in Appendix G. CALPIA operates over 100 service, manufacturing, and consumable enterprises that provide approximately 7,000 assignments for incarcerated individuals. In addition to the CTE expansion program previously mentioned in this report, CALPIA offers an industry employment program and a Joint Venture Program.

### Industry Employment Program

CALPIA also offers over 100 nationally recognized accredited certifications through its industry employment program. This program is focused on improving the ability of incarcerated people to effectively transition from prison to the community and successfully obtain jobs when they are released. Completion of an apprenticeship program included required on-the-job training hours as well as 144 annual hours of course curriculum for the enrolled apprenticeship occupation.

In fiscal year 2021–22, 5,493 participants successfully completed an accredited certification program. CALPIA participants can also earn State apprenticeship certificates. As of June 30, 2022, there were 2,572 participants registered in the State apprenticeship program, and a total of 1,932 individuals have completed the apprenticeship program.

### **Joint Venture Program**

CALPIA operates the Joint Venture Program, which provides job training opportunities for adult and juvenile offenders while they are incarcerated. These programs allow businesses and other entities to contract with institutions and hire incarcerated persons to work for them at their institutions at a pay level comparable to wages earned by people who are not incarcerated. As of July 22, 2022, Joint Venture Programs were located at five adult institutions and one youth facility. Programs consisted of coding, laundry services, agriculture, electronics, and cable-wire harness manufacturing.

In this program, business owners worked with institutional staff to establish minimum job qualifications and criteria. From there, interviews were held with the business owner. Participants in the program gained skills, a work ethic, and more hands-on work experience in the community. In addition to the benefits to both the incarcerated individuals and the employer, a portion of the wages made through this program were sent to restitution or local crime victims' programs, the participant's family for support, and to a savings account for use upon parole.

### **Conservation Camps**

Conservation camps are jointly managed by the department and the California Department of Forestry and Fire Protection (CAL FIRE). As of June 30, 2022, conservation camps house up to 3,908 incarcerated persons who constitute 152 firefighting crews. The conservation camp program provides the state agencies with an able-bodied, trained workforce for fire suppression and other natural emergencies, such as floods and earthquakes. Fire crews also work on conservation projects on public lands and provide labor for local community service projects, including the clearing of firebreaks, restoration of historical structures, park maintenance, and removal of fallen trees and debris.

The department provides educational opportunities through the alternative education model to students housed at 34 conservation camps for adults, two of which house female firefighters. Three designated institutions act as base facilities: California Correctional Center, California Institution for Women, and Sierra Conservation Center.

The alternative education model provides ABE and ASE via distance learning. Students in the alternative education model are provided access to computer-based tutorial support through a self-contained local area network at each conservation camp. Through the postsecondary and continuing education models, students housed at conservation camps may enroll in college correspondence and eLearning courses. Face-to-face college courses are provided by college professors from local community colleges at the Growlersburg, Mount Bullion, and Vallecito camp sites. Additionally, Cerro Coso Community College started providing face-to-face classes at Owens Valley camp during spring 2022.

In addition, two camps offer Alcoholic Anonymous, and 18 camps offer both Alcoholics Anonymous and Narcotics Anonymous programs. Some of the programs offered are eligible for milestone credits upon completion, and many provide certificates.

## **Inmate Activity Groups**

Inmate activity groups, also known as Inmate Leisure Time Activity Groups, have expanded significantly in all adult institutions, as a way to add innovative, low-cost programs. The programs are run under the Office of Community Partnerships. These volunteer activity groups are defined in Title 15 of the *California Code of Regulations*, Section 3233, as groups that “promote educational, social, cultural, and recreational interests of participating inmates.” These activity groups offer rehabilitative programming through an array of nonprofit, volunteer-led groups that provide cognitive behavioral services, religious services, higher education, and social awareness programs, in addition to cultural and recreational programs. Institutional staff can also apply to be a staff sponsor and receive overtime pay for supervising the groups.

Inmate activity group providers can apply to have their program RAC-approved. The qualifications for RAC approval include providing professional development, substance abuse treatment, victim impact or restorative justice, literacy, cognitive change, communication, prosocial relations, and peer support. Activity groups can also offer a variety of services, such as mentor programs, community reintegration programs, transitional housing, reentry services, employment, and community connections.

As of June 2022, approximately 1,300 individual inmate activity groups were available in the adult institutions with approximately 3,900 program sessions running. Appendix E shows the RAC-eligible programs by institution.

## DRP TV

To enhance and increase access to rehabilitative programming opportunities, the department developed DRP TV. This is a streaming network that delivers secure educational and rehabilitative television programming to incarcerated persons with opportunities to stream in classrooms, dayrooms, and cells. This network was built through the Internet Protocol Television Integration project completed in fiscal year 2017–18. All 34 adult institutions are fully operational with four exclusive DRP TV channels focused on education, wellness, reentry, and self-help, the last of which replaced the employment channel. A typical month of scheduling airs approximately 35 unique shows, including five eLearning video series used in conjunction with classroom education. In fiscal year 2021–22, 6,483 students participated in the eLearning courses via DRP TV, resulting in 2,065 class completions.

In September 2020, DRP TV added a fifth channel, ASL-TV, which provides American Sign Language-based content at nine institutions that house deaf individuals. DRP TV has continued to add important rehabilitative content onto all the DRP TV channels. The DRP TV schedule was updated in fiscal year 2021–22 to include two rotating 12-hour blocks of rehabilitative content. In addition to the channels, more than 2,000 videos have been made available in the video-on-demand library for instructional use.

## **MEASURE PROGRESS**

---

Once incarcerated persons are enrolled in programs consistent with their needs, it is important to monitor and measure their progress in both the program and along their rehabilitative path. Program staff should periodically evaluate a participant's progress and update treatment plans or coursework as needed. By measuring progress or the lack thereof, program and institutional staff can determine treatment gains and whether programs are appropriate.

### **Academic Education Progress**

Progress for academic education is measured with quarterly progress reports. These progress reports serve as a measure to ensure students are moving forward with their learning.

### **ISUDT Medication-Assisted Treatment (MAT) Monitoring**

Patients on MAT are monitored by their medical provider for their stability of health, mood, cravings, motivation to continue MAT, their participation in group programs, and adherence to their medication. The provider watches for warning signs of potential relapse that include events or patterns of behavior and treats such triggers or cravings. Providers also identify SUD-related complications and continuously implement motivational interviewing techniques to encourage participation. Random urine drug screening is used to confirm the patient is complying with MAT and not taking any illicit substances. Its primary purpose is to monitor the safety of the patient, and testing frequency decreases as patients progress through the program. Issues with noncompliance are handled by medical staff, and systemic issues are escalated to the ISUDT Steering Committee.

SUD participants who are not on MAT receive follow-up appointments with medical staff, based on their clinical condition.

## PREPARE FOR REENTRY

---

Reentry is the process in which incarcerated persons prepare for transitioning back to society. This is a vital step in ensuring they have the necessary tools and skills to be successful upon release. Incarcerated persons entering society after incarceration have different needs than when entering, based on the programs or treatments received while in prison.

Parolee needs assessments are discussed in the Assess Needs section of this report. The following section addresses the various programs associated with preparing individuals for reentry.

### ISUDT Reentry

Prerelease planning and transition began six months or so prior to an individual's release. Multidisciplinary transitions teams consisting of health care staff, DAPO staff, and postrelease community supervision staff created integrated case plans based on participants' needs. The reentry process included determining an individual's eligibility for benefits and social services, assisting them with the enrollment process, helping with appointments, setting up video conferences with community providers, and helping the individual find housing. Both communication and information sharing between internal and external partners were facilitated via team huddles and a shared data portal. The department reported that since January 2020, the ISUDT program has linked 2,211 participants with community SUD providers.<sup>11</sup>

### Transitions Program

The transitions reentry program is operated by OCE and aims to prepare students with the skills required for successful reentry into society, primarily during the last 24 months of incarceration. The transitions reentry program teaches job

---

<sup>11</sup> "Transforming Substance Use Disorder Treatment in California's Prison System: Impacts of the Integrated Substance Use Disorder Treatment Program, April 2022," California Correctional Health Care Services, July 18, 2022, <https://cchcs.ca.gov/wp-content/uploads/sites/60/ISUDT/Impacts-ISUDT-Program2019-22.pdf>.

readiness, job search skills, and financial literacy, and it provides students with community resources that may assist in their transition back into the community. The department identifies individuals with assessed needs for reentry-related services in each institution and yard.

“Another Chance, a Better Choice” is a program developed by the Sacramento Employment and Training Agency. The curriculum teaches job readiness, job search skills, and the prerequisite skills needed to be competitive in the job market. It includes practical and strategic information, hands-on activities, individual and team-oriented exercises, role playing, and motivational information. In addition to employment preparation, the program focuses on financial literacy and education curricula called “Money Smart.” DRP believes financial education fosters financial stability for individuals and for entire communities upon a student’s release.

During fiscal year 2021–22, 4,232 individuals completed transitions, 2,853 individuals had a need for transitions and were enrolled but were released before completing the program, and 13,954 individuals had an identified need but were released before being assigned. As of July 6, 2022, 20,320 individuals had an identified need for transition classes.

## **California Identification Card Project**

The California Identification Card (CAL-ID) program was implemented to assist eligible individuals in obtaining State identification cards to satisfy federal requirements for employment documentation. The department has continued to work with the California Department of Motor Vehicles (DMV) to provide DMV-eligible cameras inside institutions to obtain photographs of individuals who have an unusable photo. The previous requirement was if the individual had been incarcerated for more than 10 years, but legislation changed this requirement to be only an unusable photo. This would potentially increase the number of eligible participants for the CAL-ID program. As of July 2022, the department is testing preliminary DMV software on three loaner tablets.

In July 2019, CAL-ID program eligibility was expanded by increasing the screening period of incarcerated individuals from four-to-seven months prior to release to a screening period of zero-to-13 months prior to release. This change proved to be effective and increased eligibility, application screenings, and application submissions to the DMV. The department is continuing to work with the DMV to incorporate technological updates to allow for electronic submission of applications.

From July 1, 2021, to June 30, 2022, incarcerated persons who were within the screening time frame sent 14,037 applications to the DMV for processing, indicating the individual was both interested in and eligible to receive an identification card (see Table 16). As of June 30, 2022, the DMV had approved 9,990 identification cards. Of those approved, 6,373 persons were released with an identification card (64 percent of approved applications) and 2,036

identification cards were delivered after release as intended by the department, the DMV, or by probation offices (20 percent of approved applications). There were 1,581 identification cards pending issuance by the department. The department states these remaining cards will be delivered by the department, the DMV, or probation offices.

**Table 16. CAL-ID Applications and Cards Issued (Fiscal Years 2019–20, 2020–21, 2021–22)**

	FY 2019–20		FY 2020–21		FY 2021–22	
	Number	Percent of approved	Number	Percent of approved	Number	Percent of approved
CAL-ID applications submitted	16,654	–	15,863	–	14,037	–
Approved applications	13,005	100%	12,196	100%	9,990	100%
ID cards issued upon release	10,460	80%	8,726	72%	6,373	64%
ID cards issued after release	1,949	15%	2,996	25%	2,036	20%
ID cards pending issuance*	596	5%	474	4%	1,581	16%

\* Note: The department is required to postpone issuing identification cards until incarcerated persons are released from custody.

Source: Data as of June 30, 2020, 2021, and 2022 was provided by Division of Rehabilitative Programs.

## Transitional Case Management Program (TCMP)

The DAPO Transitional Case Management Program (TCMP) provides prerelease benefit assistance to all eligible individuals releasing to parole or postrelease community supervision (PRCS) within 120 days of release from prison. TCMP benefit workers provide Medi-Cal, Social Security Administration/Supplemental Security Income (SSA/SSI), and Veterans Administration (VA) benefit application assistance.

### Benefit Outcomes and TCMP Dispositions

DAPO continued to strengthen its relationship with counties by addressing specific issues with the application review process during monthly meetings with DHCS. The department continued to renew its data-sharing agreement with DHCS, which allowed both departments to track and exchange Medi-Cal application statuses for individuals serviced through TCMP. This data-sharing agreement helped the department more accurately report information related to benefit-application outcomes. The department depends on the 58 counties to complete the benefit-application process timely and return the approval or denial documentation to each prison prior to the incarcerated person's release.

Table 17 shows the TCMP dispositions for populations that were released for the past two fiscal years. The department screened nearly all incarcerated persons for

benefit eligibility. Compared with the prior fiscal year, the number of submitted applications increased by approximately 14 percentage points. The department was unable to submit applications for only 104 screened individuals (0.3 percent) because they were unavailable for reasons related to COVID-19. This was a marked improvement over fiscal year 2020–21, in which 3,417 or 9.5 percent were unavailable due to COVID-19.

**Table 17. TCMP Service Dispositions for Populations Released in Fiscal Years 2020–21 and 2021–22**

	FY 2020–21		FY 2021–22*	
Total releases	35,919	100%	29,947	100%
Screened	35,883	99.9%	29,887	99.8%
Submitted application	23,440	65.3%	23,674	79.1%
Access to other insurance	1,135	3.2%	1,346	4.5%

Refused services	883	2.5%	886	3.0%
Unknown (Improvement area)	20	0.1%	8	0.03%

\* Percentage calculated over total releases. Some of the percentages for FY 2021–22 differ slightly from percentages provided by the department.

Source: Data provided by Division of Adult Parole Operations.

Table 18 breaks down the TCMP dispositions into three mental health categories of EOP, CCCMS, and non-EOP/CCCMS, which consists of GP applicants and those who do not fall into the other two categories. Application submissions increased, and there was a decrease in persons unavailable as a result of COVID-19. Furthermore, applications were submitted in 78.8 percent of EOP releases, 82.5 percent of CCCMS releases, and 77.8 percent of non-EOP/non-CCCMS releases, indicating these individuals have nearly equivalent access to benefit applications.

Source: Data provided by Division of Adult Parole Operations.

Table 19 shows the outcomes of benefit applications for the past two fiscal years. Notably, the majority of Medi-Cal applications were approved by the time of

release, yet the status of most Social Security Administration/Supplemental Security Income (SSA/SSI) and Veterans Affairs (VA) applications were pending. For fiscal year 2021–22, 83 percent of applications for Medi-Cal benefits were approved, and the status of 16.7 percent was pending; these numbers are likely to improve as CalAIM and the partnership with DHCS are implemented. In contrast, the status of 70.4 percent of SSA/SSI applications and 77.6 percent of VA applications were pending at the time of release. The department stated these agencies have historically taken longer to process applications due to the need to verify applicant medical or mental health disabilities.

**Table 19. Benefit Application Outcomes (Fiscal Years 2020–21 and 2021–22)**

Benefit	Status	FY 2020–21		FY 2021–22	
SSA/SSI	Submitted	2,389		2,584	
	Pending	1,452	60.8%	1,820	70.4%
	Approved	547	22.9%	586	22.7%
	Denied	390	16.3%	178	6.9%

	Denied	74	25.4%	14	6.4%

\* Percentage point difference.

Source: Data provided by Division of Adult Parole Operations.

The status of benefit applications at the time of release is presented in Table 20, separated according to mental health classification and compared over the past two fiscal years. Submissions increased for all benefits for both EOP and CCCMS patients, with the exception of VA applications submitted by CCCMS patients, which remained mostly consistent with the previous fiscal year. Application submissions decreased for all three benefit types among the remaining non-EOP/CCCMS applicants, the largest mental health subset.

CCCMS and EOP patients are among the more vulnerable released populations, and their benefit statuses for Medi-Cal approval continued to be similar to non-EOP/non-CCCMS releases (EOP: 82.9 percent, CCCMS: 84.3 percent, non-EOP/non-CCCMS: 82.5 percent). CCCMS and non-EOP/non-CCCMS releases also experienced similar levels of SSA/SSI and VA benefit approval.

However, EOP releases required a higher level of mental health care and seemed to have a lower percentage of SSA/SSI and VA approvals compared with CCCMS and non-EOP/non-CCCMS patients.

**Table 20. Benefit Application Outcomes by Mental Health  
(Fiscal Years 2020–21 and 2021–22)**

## Pre-Release Video Conferencing

To better understand the future parolee's journey and to assist in a successful community transition, the department implemented Pre-Release Video Conferencing. Video conferencing was conducted with the person being released and parole or probation staff. This conferencing provided supervising agents with the opportunity to interact with clients and gave them a better understanding of the support and housing a person would have, once released. Possible conversation topics included supervising conditions, reporting requirements, housing, and any questions from the client. The department stated that DAPO collaborated with probation and parole agents statewide with this technology to help bridge the gap for offenders returning to the community.

## Transitional Community Programs

DRP provided community programs that allowed eligible incarcerated persons to serve the remainder of their sentence in the community. These programs provided a variety of rehabilitative services to aid in an incarcerated person's successful reintegration.

### Male Community Reentry Program

The department began offering this program in 2015 and allows incarcerated males the opportunity to serve up to two years of the remainder of their sentence in a community facility. Eligibility criteria have been listed on the department's website<sup>12</sup>, and those who met the criteria could be voluntarily placed in the program as approved by institutional staff. The Male Community Reentry Program was available in four counties: Butte, Kern, Los Angeles, and San Diego. The department stated the program helped participants reenter the community. The department has also shown this program helps to reduce recidivism by having Stanford University do a study. The study found recidivism decreased after participation in a Male Community Reentry Facility.<sup>13</sup> A number of community-based rehabilitative services were offered in areas such as family reunification, employment, and housing. In fiscal year 2021–22, 1,706 participants were served by this program.

### Custody to Community Transitional Reentry Program

Custody to Community Transitional Reentry Program facilities are for eligible female incarcerated individuals who have committed violent, serious, and nonserious crimes. It allows participants to spend the remainder of their sentence

---

<sup>12</sup> "Male Community Reentry Program," California Department of Corrections and Rehabilitation, <https://www.cdcr.ca.gov/rehabilitation/pre-release-community-programs/mcrp/>.

<sup>13</sup> "Effects of the Male Community Reentry Program (MCRP) on Recidivism in the State of California," Higuera, K., Jensen, G. and Morton, E. (2021), <https://purl.stanford.edu/bs374hx3899>.

in the community up to 32 months prior to the end of their sentences. This program offers an array of rehabilitative services including drug recovery, employment, education, housing, family reunification, and social support. The program locations include San Diego, Santa Fe Springs, Bakersfield, Stockton, Sacramento, and Los Angeles, with a total of 399 beds available between the six locations. In fiscal year 2021–22, 821 participants were served by the Custody to Community Transitional Reentry Program.

### **Alternative Custody Program**

The Alternative Custody Program (ACP) allows eligible incarcerated individuals a chance to spend the remainder of their sentence in a private residence, transitional care facility, or residential drug or other treatment program. Facility providers underwent an extensive qualification process to be accepted into ACP. For acceptance into the program various, reviews and/or assessments were required. These reviews and assessments could be of the residence or program, available community resources, individualized treatment and rehabilitation plans, criminal activity, or the individual's performance while incarcerated. Participants in this program were expected to maintain employment while furthering their education and rehabilitation. In fiscal year 2021–22, 208 participants were served by ACP.

### **Community Prison Mother Program**

Eligibility for the Community Prison Mother Program (CPMP) required the female incarcerated individual be either pregnant or a mother to children who are age six or under. This program only had one facility in Santa Fe Springs, housing 24 participants and up to 40 children. The program's main goal was to reunite mothers with their children and reintegrate the family unit into society. The program also aimed to create stability and strengthen the parent–child relationship. In fiscal year 2021–22, seven participants were served by CPMP.

**Table 21. Number of Participants in Transitional Community Programs  
(Fiscal Years 2019–20, 2020–21, 2021–22)**

Program	FY 2019–20	FY 2020–21	FY 2021–22
Male Community Reentry Program	1,767	1,444	1,706
Custody to Community Transitional Reentry Program	401	364	821
Alternative Custody Program	290	114	208
Community Prison Mother Program	17	1	7

## REINTEGRATE

---

Reintegration is the process by which an incarcerated individual transitions back to the community. The department provides different programs that facilitate a thorough reintegration process for recently released individuals. These programs can be managed solely by the department or in collaboration with other State and local entities. Emphasis is placed on providing support for recently released individuals, offering services or resources related to housing, employment, education, therapy, treatment, and other rehabilitative needs.

In fiscal year 2021–22, 9,864 parolees with a moderate to high CSRA score were released, of whom 9,715 (99 percent) had received a reentry COMPAS assessment. Of the released population, 86 percent had a moderate to high CSRA risk and at least one moderate to high COMPAS reentry need. Those released with moderate to high scores have a greater risk to reoffend, have rehabilitative needs that require additional programming or resources, or a combination of both.

**Table 22. Subsets of Parolees Released with a Moderate to High CSRA Score (Fiscal Year 2021–22)**

Parolee Subset	Total Released
Parolees released with a moderate to high CSRA score	9,864
Parolees released with a moderate to high CSRA score and a Reentry COMPAS	9,715
Parolees released with a moderate to high CSRA score and at least one moderate to high COMPAS reentry need	8,511

Source: Data as of June 30, 2022, provided by Division of Rehabilitative Programs.

The department utilized their case management system, the Automated Reentry Management System (ARMS), to track participation in all DRP offerings except for OCE programs. ARMS was used to identify the number of first-year parolees who participated in community-based programming based on their assessed needs. The results are shown in Table 23.

In the previous fiscal year, 39.5 percent of parolees with at least one need participated in at least one program consistent with their risk and need within their first year of release. The percentage decreased slightly in this reporting period to 35.6 percent. The total percentage of individuals with a risk and need who participated in any program within one year decreased from 42.2 percent to 35.8 percent.

**Table 23. Moderate-to-High-Risk Parolees and Participation in Programs Consistent With Needs Within First Year of Release (Fiscal Years 2019–20, 2020–21, 2021–22)**

Identified Need*	Status	FY 2019–20	FY 2020–21	FY 2021–22
Employment	Number of Parolees	6,053	5,148	4,655
	Participated in Program	2,769	2,020	1,732
	Percentage	46%	39%	37%
Education	Number of Parolees	5,089	4,373	5,834
	Participated in Program	2,635	1,801	2,008
	Percentage	52%	41%	34%
Substance Abuse	Number of Parolees	6,132	6,095	6,077
	Participated in Program	3,332	2,624	2,413
	Percentage	54%	43%	40%

	FY 2019–20	FY 2020–21	FY 2021–22
Parolees with needs who participated in at least one program consistent with need(s)	52.2%	39.5%	35.6%
Parolees with a risk and need who participated in a program	57.2%	42.2%	35.8%

\* Because parolees may have multiple needs, they may be counted in multiple categories. All scored moderate or high on the California Static Risk Assessment (CSRA) and had needs identified by the COMPAS assessment.

Source: Data provided by Division of Rehabilitative Programs.

## Long-Term Offender Reintegration Programs

### Long-Term Offender Reentry Recovery

During fiscal year 2019–20, DRP developed the Long-Term Offender Reentry Recovery program for the long-term offender/lifer population. The goal of the program is for participants to gain life skills and successfully reintegrate into the community. During the reporting period there were seven locations in six counties which provided participants with housing, meals, support services, resources, and programming. Participants can use services to address their needs and resources to help them obtain a stable income, employment, and stable housing. The program's duration is 180 calendar days, unless stated otherwise by the Board of Parole Hearings, but can be extended an additional 185 calendar days based on assessed needs. During fiscal year 2021–22, there were 449 participants served by the program and 181 completions.

**Table 24. Number of Participants in Long-Term Offender Reentry Recovery (Fiscal Years 2019–20, 2020–21, 2021–22)**

Program	FY 2019–20	FY 2020–21	FY 2021–22
Long-Term Offender Reentry Recovery	245	257	449

Source: Data provided by Division of Rehabilitative Programs.

### Transitional Housing Program

The Transitional Housing Program is a residential program for formerly incarcerated individuals with life sentences. The program provided housing, meals, support services, resources, and programming under supervision. During fiscal year 2021–22 the program had eight locations across four counties but was in the process of converting to the Long-Term Offender Reentry Recovery program. The Transitional housing sites that remain will continue operating through June of 2023. In fiscal year 2021–22, 941 participants were served and there were 191 completions.

### Peer Reentry Navigation Network

The Peer Reentry Navigation Network was created to provide peer-driven support, assistance, and guidance to previously incarcerated persons who had life sentences. The program provides previously incarcerated individuals, who had been sentenced to life, but are now thriving in reintegration, with training to become a Peer Reentry Navigator. Peer Reentry Navigators are trained to provide peer-based supportive services like resource linkage, peer mentoring, and successful reentry practices through identifying, articulating, and utilizing their own lived experiences. The three services they provide to their peers are in-reach, outreach, and individual support which help other formerly incarcerated individuals who had life sentences prepare for and transition back into the community. In addition to Peer Reentry Navigator services, this program offers Peer Reentry Navigator Network meetings and provider partnerships. The department states this program aims to address the risks and needs of formerly incarcerated individuals who were serving life sentences by being responsive to their unique characteristics.

### Behavioral Health Reintegration

The Behavioral Health Reintegration (BHR) program has provided clinical case management services to parolees. Program staff are composed of social workers, psychologists, and psychiatrists who are located at every parole office. The clinicians used a dynamic level of service needs assessments to develop individualized reintegration plans. The individualized plan focused on identifying

and addressing the needs of each parolee as well as the amount of support the parolee would need to access services. Clinicians helped parolees obtain services such as mental health services, medical services, substance use treatment, and transportation. They also worked to empower the parolees to problem solve and promote self-advocacy and self-determination. In addition, BHR staff provided mental health services, substance abuse services, and psychosocial support to parolees who had not yet secured long-term services or connections. Clinicians maintained contact with clients during the entire course of their parole terms.

## ISUDT Community Aftercare

As described in the **Reentry** section of this report, participants' transitions were facilitated by enhanced prerelease and transition services that connected them to resources available in their community. CCHCS is collaborating with DHCS through the CalAIM initiative for justice-involved populations. CalAIM connects individuals with SUD to county behavioral health services, enhanced care managers, and managed care plans. It is anticipated these efforts will contribute toward more successful transitions.

Separate from CCHCS, DRP also offers programs with SUDT services to parolees through outpatient and residential services. While SUDT services can be found in various DRP community-based programs, the Specialized Treatment for Optimized Programming (STOP) network is the largest SUDT-based service delivery system. STOP community-based services are available in most counties throughout the State, and parolees in counties lacking STOP service locations may be considered for placement in another county.

One of the specialized STOP services is the Female Offender Treatment Employment Program. The program provides female incarcerated persons who are transitioning to the community with intensive gender-responsive counseling services. The counseling services are in areas related to substance use disorder, family reunification, vocational training, and employment. The participants in this program, who can have their children reside with them, can participate in treatment for up to 15 months.

Every month for the past fiscal year, roughly 2,000 participants exited community aftercare SUDT programs, and in the same fiscal year, 32 percent completed the

program (see Table 25). Data presented in the department’s recidivism report<sup>14</sup> showed a promising correlation between completing community aftercare and lower recidivism rates that appeared to be independent of in-prison SUDT programming.

**Table 25. Community Aftercare SUDT Completion Rates (Fiscal Year 2021–22)**

Month and Year	Program Completed	Program Not Completed	Completion Rate
July 2021	586	1,216	33%
August 2021	577	1,151	33%
September 2021	599	1,183	34%
October 2021	599	1,302	32%
November 2021	532	1,208	31%
December 2021	570	1,165	33%
January 2022	697	1,493	32%
February 2022	516	1,361	26%
March 2022	851	1,495	36%
April 2022	761	1,381	36%
May 2022	680	1,352	33%
June 2022	590	1,473	29%
<b>TOTAL</b>	<b>7,558</b>	<b>15,780</b>	<b>32%</b>

Source: Data provided by Division of Rehabilitative Programs.

## Resource Programs

Resource programs are provided by DAPO and DRP to give parolees access to services or resources locally. Resource centers offer many services and resources involving counseling, training, education preparation, money management, and employment.

<sup>14</sup> “Recidivism Report for Offenders Released from the California Department of Corrections and Rehabilitation in Fiscal Year 2015–16,” California Department of Corrections and Rehabilitation, accessed February 22, 2022, <https://www.cdcr.ca.gov/research/wp-content/uploads/sites/174/2021/09/Recidivism-Report-for-Offenders-Released-in-Fiscal-Year-2015-16.pdf>.

## Community-Based Coalition and Day Reporting Center

In fiscal year 2021–22, DRP had two resource centers, Community-Based Coalitions (CBCs) and Day Reporting Centers (DRCs). CBCs and DRCs have over 20 locations, but are primarily nonresidential with limited transitional housing. Many services are available to parolees including group counseling, anger management, parenting and family reintegration, cognitive and life skills training, budgeting and money management, employment, substance use disorder education, and education preparation. In fiscal year 2021–22, DRCs served 5,022 participants and had 1,168 program completions. In addition, CBCs served 1,361 unique participants and had 273 program completions.

**Table 26. Number of Participants in Community-Based Coalition (Fiscal Years 2019–20, 2020–21, 2021–22)**

Program	FY 2019–20	FY 2020–21	FY 2021–22
Community-Based Coalition	1,139	1,089	1,361

Source: Data provided by Division of Rehabilitative Programs.

## Reentry Resource Center

DAPO developed and implemented Reentry Resource Centers (RRCs) located at Los Angeles, Stockton, Pomona, and Chico parole offices. In addition, one offsite location has been implemented in Oakland. The program was designed to ensure the reentry population had access to rehabilitation and reentry programs and resources.

## Parole and Community Team

The Parole and Community Team (PACT) was created to improve parolee access to needed services and to reduce crime in the community through partnerships with local law enforcement agencies, community resource providers, and social service agencies. A Parole Agent II serves as the PACT coordinator and liaison between the different entities that provide parolees with services such as substance abuse treatment, transitional living, employment resources, educational or vocational training, food, and transportation. Mandatory PACT orientation meetings have served as structured environments that provide individuals returning home with available community resources. The department states that mandatory participation enforces the individual's responsibility to engage in community-based programming, and by providing these resources in a timely manner, the program promotes successful reintegration while also improving public safety.

## Employment

### Ventura Training Center

The Life Skills Training program at the CAL FIRE Ventura Training Center, implemented in fiscal year 2018–19, was developed collaboratively by CAL FIRE, DAPO, and the California Conservation Corps. Parolees in this program receive extended training as they have gone through the fire camp programs while incarcerated. The 18-month program consisted of education for six months with on-the-job training at CAL FIRE as a Type I Fire Crew member for 12 months. Participants can earn certificates prior to graduation, making them eligible to obtain employment beyond the program before their scheduled graduation date.

In fiscal year 2021–22, 71 individuals enrolled in the 18-month-long program, and seven individuals completed it. The seven individuals who completed the program were all offered careers with CAL FIRE or other fire agencies. Although there have been five participants who failed the program, four of those five were able to still gain employment.

### Caltrans Parolee Work Crew Program

The department, in partnership with the California Department of Transportation (Caltrans), the Butte County Office of Education, San Bernardino Community College, and the City of Oakland, provide transitional employment to parolees through the Caltrans Parolee Work Crew Program. This program consists of litter abatement services that Caltrans provided through 17 daily crews who work across six locations statewide. In Oakland, the participants work five days a week, four of which are spent on the work crew with the fifth spent focusing on employment and permanent job placement services. Each crew consists of approximately six to eight people. Eligible parolee participants can volunteer to be in the program for up to 90 days. Participants who volunteer at the Butte County Office of Education and the San Bernardino Community College obtain referrals from Day Reporting Centers and are then assessed for job readiness to legally and physically work on crews that require manual labor. The program provides life skills, employment, and prepares participants for future employment.

## FOLLOW UP

---

The follow-up component of the California Logic Model involves tracking certain postrelease indicators for incarcerated persons who are released every year. The current measure of successful rehabilitation from criminal behavior is the rate of recidivism.

Regarding recidivism, the California Board of State and Community Corrections (BSCC) was required to define recidivism as part of the 2013 amendment to California Penal Code section 6027. The definition of recidivism as approved by BSCC is “conviction of a new felony or misdemeanor committed within three years of release from custody or committed within three years of placement on supervision for a previous criminal conviction.”<sup>15</sup> Alternatively, depending on the type of analysis and available data, recidivism rates can also be expressed as the number of new arrests, return to custody, or other parameters over the course of longer or shorter time periods. For the purposes of this report, the standard BSCC definition is referenced.

Below is a review of two recent reports on recidivism and rehabilitation programs associated with the department as well as a review of ISUDT performance. Recidivism rates for the 2015–16 release cohort were published in relation to various parameters, including the SUDT program. Recidivism rates associated with CALPIA participation are also reviewed, as are performance indicators for the ISUDT program as reported by CCHCS. Effective management of substance use disorder was measured in terms of overdose-related hospital visits and reduced deaths from overdose.

### Recidivism for Offenders Released in Fiscal Year 2015–16

In September 2021, the department released its recidivism report on incarcerated persons who were released in fiscal year 2015–16.<sup>16</sup> Recidivism outcomes were evaluated according to various parameters that included gender, age, race, mental health, California Static Risk Assessment (CSRA) scores, type and county of release, type of offense, and participation in the SUDT programs. The three-year reconviction rate of 33,756 released individuals was reported as 44.6 percent, a rate that has remained steady over the last few years.

Consistent with what is seen historically, recidivism rates decreased with increasing age, particularly among those released at age 40 or older. Recidivism

---

<sup>15</sup> “BSCC Definitions – AB 1050,” BSCC California, accessed July 12, 2022, <https://www.bscc.ca.gov/wp-content/uploads/AB-1050-Key-Term-Definitions.pdf>, [https://www.bscc.ca.gov/s\\_recidivism/](https://www.bscc.ca.gov/s_recidivism/).

<sup>16</sup> “Recidivism Report for Offenders Released from the California Department of Corrections and Rehabilitation in Fiscal Year 2015–16,” California Department of Corrections and Rehabilitation, accessed February 22, 2022, <https://www.cdcr.ca.gov/research/wp-content/uploads/sites/174/2021/09/Recidivism-Report-for-Offenders-Released-in-Fiscal-Year-2015-16.pdf>.

rates for those with CSRA scores continued a pattern seen in previous recidivism reports, with three-year conviction rates higher for individuals who scored high on the CSRA (60.3 percent) compared with moderate (43.1 percent) and low (21.6 percent) scores. This supports the general effectiveness of the CSRA as a predictor of recidivism.

In terms of mental health, rates were higher for individuals receiving mental health care (ranging from 48.5 to 63.3 percent) compared with individuals who were not in the mental health services delivery system (MHSDS) (43.2 percent), reinforcing the importance of increased postrelease assistance with the array of needs this population has, including access to mental health care, employment, and housing services.

The department examined the relationship between SUDT program participation and recidivism. In the population released to parole, results were promising for community aftercare, as recidivism rates among participants who completed a community aftercare SUDT program were less than half of what was reported among persons who had some or no aftercare, regardless of whether they had in-prison SUDT.

At the time, the COMPAS risk assessment was used to screen and refer individuals to the SUDT program. Of the persons released in fiscal year 2015–16, 19,052 were identified with a need for SUDT, and participation in in-prison SUDT appeared to slightly reduce recidivism in this population. Among the 8,067 parolees in this release cohort, three-year conviction rates generally decreased with participation in community aftercare. The lowest rates were observed among parolees who completed aftercare and were roughly half the rate of those who received no community aftercare.

## **Recidivism in CALPIA From August 2014 to July 2018**

In November 2021, the Center for Evidence-Based Corrections at the University of California, Irvine, published its recidivism study of CALPIA.<sup>17</sup> The study examined CALPIA participants compared with persons waiting for a CALPIA assignment, CALPIA career technical education (CTE) participants compared with non-CTE CALPIA program participants, and female CALPIA participants compared with females waiting for a CALPIA assignment. The study examined 2,453 persons who actively participated in CALPIA programs, comparing their progress with that of 6,150 persons who were on the waitlist. To prevent group differences from skewing recidivism results, propensity score matching was used to equalize the different background factors between groups. Rates were calculated for groups both before (unweighted) and after (weighted) propensity score matching. The differences between the unweighted and weighted data

---

<sup>17</sup> James Hess and Susan Turner, “The Effect of Prison Industry on Recidivism: An Evaluation of California Prison Industry Authority (CALPIA),” November 2021, CALPIA, accessed July 2022, [https://www.calpia.ca.gov/wp-content/uploads/calpia/news/Reports\\_and\\_Publications/The%20Effect%20of%20Prison%20Industry%20on%20Recidivism-V2-PIA.pdf](https://www.calpia.ca.gov/wp-content/uploads/calpia/news/Reports_and_Publications/The%20Effect%20of%20Prison%20Industry%20on%20Recidivism-V2-PIA.pdf).

demonstrated the impact that varying background characteristics have on study results and allowed the authors to portray with greater accuracy the relationship between active participation in CALPIA and recidivism rates.

Results showed significant differences in three-year reconviction rates between the following two comparison groups. Specifically, the CALPIA participant group had a weighted recidivism rate of 20.8 percent, compared with a rate of 25.8 percent for the waitlist group. Reduced recidivism rates were also observed when CALPIA CTE participants were compared with other CALPIA program participants, with weighted rates of 13.9 percent and 23.1 percent, respectively.

The CALPIA eligibility process is specified in section 8004 of Title 15. The process itself excluded certain characteristics that distinguished these groups from the rest of the incarcerated population. As a result, participation in CALPIA programs correlated with significantly lower three-year conviction rates. Going forward, the authors anticipate conducting studies to examine the integrity of the CALPIA process and outcomes, conducting studies that compare CALPIA to other in-prison programs, and assessing benefits that accrue from participation such as skill building and postrelease employment.

## **Impact of Integrated Substance Use Disorder Treatment Program**

According to a report on the impact of the ISUDT program released by the department and CCHCS in April 2022,<sup>18</sup> an overall decrease in overdose deaths by 58 percent was observed in the first year of the program, from 2019 to 2020. In addition, the overdose hospitalization rate among MAT recipients was 42 percent lower compared with participants on the MAT waitlist. Overdose hospitalizations among ISUDT participants decreased by 18 percent from late 2019 to the middle of 2021 (from 92 to 75 per 100,000 residents), and the number of bacterial and viral infections associated with substance abuse also decreased.

CCHCS reported it was the largest provider of MAT in any correctional system in the United States and attribute much of the ISUDT program's success to MAT. The reduction in overdose mortality from 52 deaths to 20 deaths per 100,000 residents (a 62-percent decrease) between the program's inception in 2019 and April 2021 is noteworthy. This change also shifted drug overdose from being the third leading cause of death in California prisons to being the eighth leading cause of death. The department reported a correlation with participation in MAT, which was accepted by nine out of 10 patients who were offered treatment.

For this past fiscal year, CCHCS reported 821 hospital or emergency department claims related to overdose events from July 1, 2021, through May 31, 2022. Data for the month of June 2021 were not available at the time of this report's

---

<sup>18</sup> "Transforming Substance Use Disorder Treatment in California's Prison System: Impacts of the Integrated Substance Use Disorder Treatment Program, April 2022," California Correctional Health Care Services, accessed July 18, 2022, <https://cchcs.ca.gov/wp-content/uploads/sites/60/ISUDT/Impacts-ISUDT-Program2019-22.pdf>.

publication due to unsubmitted or unprocessed claims. Overdose hospitalizations can also be viewed on the CCHCS ISUDT dashboard<sup>19</sup> that was launched in 2021.

---

<sup>19</sup> “ISUDT Outcomes and Other Trends,” California Correctional Health Care Services, accessed July 26, 2022, <https://cchcs.ca.gov/isudt/dashboard/>.

## 2022 FINDINGS

---

As seen under **Assess Risk** and **Assess Needs**, the department assesses static risk to reoffend and assesses four criminogenic needs. The department does not use dynamic risk assessments. Dynamic risk assessments could be useful for determining an incarcerated person's predictive risk to reoffend based on dynamic factors that change after receiving rehabilitative programming. The COMPAS suite has a dynamic risk tool, although it is not utilized by the department. An incarcerated person's likelihood to reoffend should be based not only on their prior history, but also on their rehabilitative progress, which could be shown in a dynamic risk assessment.

As seen in **Assess Needs**, the Reentry COMPAS assesses more needs than in the Core COMPAS. While a person may have different needs upon release, the rehabilitative process in prison is designed to address those needs to facilitate their success upon reintegration into society. In addition, the number of incarcerated people with moderate to high scores for all four of the assessed Core COMPAS needs have increased slightly from June 2020 to June 2022, yet the percentage of people who were eligible and received a Core COMPAS has decreased.

Measuring progress is also an important aspect of an incarcerated person's rehabilitative success. The Expert Panel identified that the department "should actively monitor [behavior or case] plans to keep track of the progress that offenders are making toward achieving their rehabilitation programming objectives." Progress is measured for education and ISUDT programs; however, the department does not measure rehabilitative progress in its entirety. While there are databases used to track some aspects of program participation, there is no tool that tracks a person's progress from the development of the rehabilitative plan through release from departmental custody.

Based on the department's latest recidivism report,<sup>20</sup> participation in the older SUDT program correlated with slightly reduced three-year reconviction rates in the 2015–16 release cohort. In comparison, parolee completion of post-release community aftercare programs correlated with three-year reconviction rates that were markedly lower, regardless of participation in in-prison SUDT. In consideration of the apparent success associated with community aftercare, it is concerning that only 32 percent of people who exited community aftercare in fiscal year 2021–22 completed the program.

The newer ISUDT program has achieved success with outcomes that include reduced overdose hospitalizations and overdose deaths, as well as reduced infections secondary to drug use. Provision of MAT and active monitoring of

---

<sup>20</sup> "Recidivism Report for Offenders Released from the California Department of Corrections and Rehabilitation in Fiscal Year 2015–16," California Department of Corrections and Rehabilitation, accessed February 22, 2022, <https://www.cdcr.ca.gov/research/wp-content/uploads/sites/174/2021/09/Recidivism-Report-for-Offenders-Released-in-Fiscal-Year-2015-16.pdf>.

patient progress has made SUDT safer and plans are in place to continue developing and expanding the program and its support network. It will be interesting to see what, if any, correlation with recidivism will be seen with the new program.

Data provided by the department showed the number of parolees with a moderate to high need for Reentry Financial has remained fairly consistent. In June of 2022, 46.1 percent of parolees had a moderate to high need, which is only a 2.7 percentage point decrease since June of 2020. The transitions program provided essential aspects of reintegration such as budgeting, resume building, and job searching. The data on the transitions program from the department showed 66 percent of offenders with a need for transitions programming did not receive it. Even further concerning is only 20 percent of persons who did participate in transitions completed the program. While early releases and COVID-19 precautionary measures may have been contributing factors, the numbers still show there are significantly more people who have a need for the programming that are not receiving it.

The TCMP program provides incarcerated persons with essential benefits that are needed upon reintegration to society. The four essential applications are for Medi-Cal benefits, VA benefits, SSA/SSI benefits, and ID cards. While processing seems timely for Medi-Cal benefits and ID cards, the number of pending applications for VA and SSA/SSI benefits has consistently remained high. The department reported that these agencies have historically taken longer to process applications.

The department had many noteworthy achievements during fiscal year 2021-22. In education, 647 associate degrees were earned, which was an approximate increase of 40 percent from the previous fiscal year. The number of bachelor's degrees earned increased over two-fold, with a total of 21 degrees earned. Master's degrees, as discussed, are pursued by the incarcerated person on their own as the department does not have a master's program, but there was a total of 9 persons who earned their master's while incarcerated. While the numbers have not returned to pre-pandemic levels there were 1,702 CTE industry certifications earned which is approximately 16 percent of their budgeted capacity for CTE programs. In addition, over the last few years the department has increased post-release programming with additions such as the STOP and CPMP programs which address not only the parolees needs but incorporate family reunification.

## BOARD RECOMMENDATIONS

---

To assist in evaluation of program efficacy, the department should utilize dynamic risk assessments to measure the predictive risk of recidivism before and after rehabilitative programming. While assessing static risk can be beneficial, as it calculates a person's likelihood to reoffend based on age and prior offenses, it does not show the likelihood to reoffend after participation in rehabilitative programming.

The department should create a streamlined data collection tool for rehabilitation. The tool should allow for all departmental entities who provide rehabilitation to access, monitor, and document a person's rehabilitative journey from the start of incarceration to release from departmental custody. The tool should be actively monitored and updated by rehabilitative staff to ensure persons are in programs consistent with their needs as well as, progressing, participating, and completing the programs. Active monitoring of progress allows for staff to identify if a program needs to be changed or if an incarcerated person needs assistance. Progress in these programs or lack of progress could indicate an incarcerated person's willingness to rehabilitate. This tool should also track successful employment, housing, and treatment while on parole allowing the department to see if person's rehabilitation while in prison is has aided in successful reintegration. The tool would also allow for the department to make evidence-based management decisions on allocation of resources.

The department should initiate the processing of SSA/SSI and VA benefit applications earlier, since the department indicated these agencies have historically taken longer to process applications. This would allow more incarcerated persons to have completed application dispositions upon release.

After a presentation by DRP at the June 30, 2022, C-ROB meeting the board asked what would be beneficial for them to provide rehabilitation. The answer was space. Although not discussed in this report, many reports prior have discussed space. Space continues to be an issue with the massive expansion of rehabilitative programming. There are limited spaces in which programming can occur. These spaces are often shared between the different rehabilitative programs at institutions. Institutional staff have worked well together to coordinate program schedules of shared spaces, but to allow for continued expansion of programs the department should work towards creating more programming space.

# APPENDIX G. CALPIA EDUCATIONAL LOCATIONS

## CALPIA Enterprise, Career Technical Education (CTE), Joint Venture (JV) and Free Venture (FV) Locations

### ADULT INSTITUTIONS

- 1 Pelican Bay State Prison (PBSP)**
- Construction Services & Facilities Maintenance
  - Laundry
  - Support Services
  - CTE Programs**
    - Computer-Aided Design
    - Computer Coding

- 2 High Desert State Prison (HDSP)**
- Construction Services & Facilities Maintenance
  - Support Services

- 3 California Correctional Center (CCC)**
- Construction Services & Facilities Maintenance
  - JV Program**
    - Barnum Farming

- 4 Folsom State Prison (FSP)**
- Construction Services & Facilities Maintenance
  - Digital Services
  - License Plates
  - Metal Products
  - Metal Signs
  - Modular Building
  - Printing
  - Support Services
  - CTE Programs**
    - Computer-Aided Design
    - Pre-Apprentice Carpentry
    - Pre-Apprentice Construction Labor
    - Pre-Apprentice Iron Worker
    - Pre-Apprentice Roofing

- Folsom Women's Facility (FWF)**
- Construction Services & Facilities Maintenance
  - CTE Programs**
    - Computer-Aided Design
    - Computer Coding
    - Culinary Arts Management
    - Pre-Apprentice Carpentry
    - Pre-Apprentice Construction Labor

- 5 CSP Sacramento (SAC)**
- Construction Services & Facilities Maintenance
  - Laundry

- 6 California Medical Facility (CMF)**
- Construction Services & Facilities Maintenance

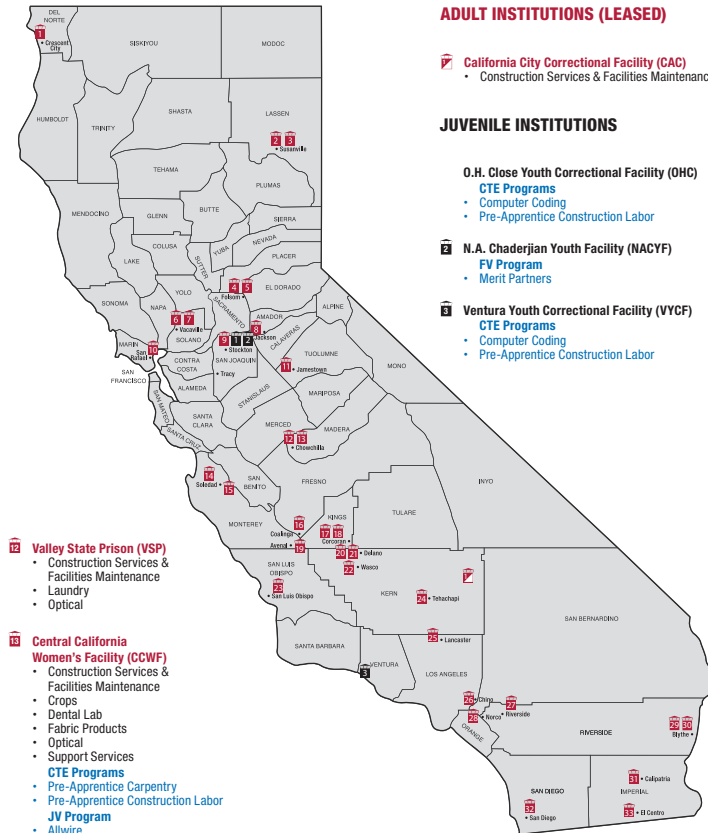

- 7 CSP Solano (SOL)**
- Bindery
  - Construction Services & Facilities Maintenance
  - Laundry
  - Metal Products
  - Optical
  - Support Services
  - JV Program**
    - Customer Model Laundry

- 8 Mule Creek State Prison (MCSF)**
- Coffee Roasting
  - Construction Services & Facilities Maintenance
  - Fabric Products
  - Food & Beverage Packaging
  - Laundry
  - Meat Cutting
  - Support Services

- 9 California Health Care Facility (CHCF)**
- Construction Services & Facilities Maintenance

- 10 CSP San Quentin (SQ)**
- Construction Services & Facilities Maintenance
  - Furniture
  - Mattress
  - Support Services
  - CTE Programs**
    - Computer Coding
    - Pre-Apprentice Construction Labor
  - JV Programs**
    - TLM Works

- 11 Sierra Conservation Center (SCC)**
- Construction Services & Facilities Maintenance
  - Fabric Products

- 12 Valley State Prison (VSP)**
- Construction Services & Facilities Maintenance
  - Laundry
  - Optical

- 13 Central California Women's Facility (CCWF)**
- Construction Services & Facilities Maintenance
  - Crops
  - Dental Lab
  - Fabric Products
  - Optical
  - Support Services
  - CTE Programs**
    - Pre-Apprentice Carpentry
    - Pre-Apprentice Construction Labor
  - JV Program**
    - Allwire

- 14 Correctional Training Facility (CTF)**
- Construction Services & Facilities Maintenance
  - Fabric Products
  - Furniture
  - Support Services

- 15 Salinas Valley State Prison (SVSP)**
- Construction Services & Facilities Maintenance

- 16 Pleasant Valley State Prison (PVSP)**
- Construction Services & Facilities Maintenance

- 17 CSP Corcoran (COR)**
- Construction Services & Facilities Maintenance
  - Crops
  - Dairy
  - Food & Beverage Packaging
  - Laundry
  - Support Services

- 18 Substance Abuse Treatment Facility (SATF)**
- Construction Services & Facilities Maintenance
  - Food & Beverage Packaging

- 19 Avenal State Prison (ASP)**
- Construction Services & Facilities Maintenance
  - Egg Production
  - Furniture
  - General Fabrication
  - Laundry
  - Poultry
  - Support Services

- 20 North Kern State Prison (NKSP)**
- Construction Services & Facilities Maintenance

### ADULT INSTITUTIONS (LEASED)

- California City Correctional Facility (CAC)**
- Construction Services & Facilities Maintenance

### JUVENILE INSTITUTIONS

- O.H. Close Youth Correctional Facility (OHC)**
- CTE Programs**
    - Computer Coding
    - Pre-Apprentice Construction Labor

- 21 N.A. Chaderjian Youth Facility (NACYF)**
- FV Program**
    - Merit Partners

- 22 Ventura Youth Correctional Facility (VYCF)**
- CTE Programs**
    - Computer Coding
    - Pre-Apprentice Construction Labor

- 21 Kern Valley State Prison (KVSP)**
- Construction Services & Facilities Maintenance
  - Support Services

- 22 Wasco State Prison (WSP)**
- Construction Services & Facilities Maintenance
  - Laundry
